Choosing Environmental Policy Winston Harrington, Richard D. Morgenstern, Thomas Sterner, 2010-09-30 The two distinct approaches to environmental policy include direct regulation sometimes called command and control policies and regulation by economic or market based incentives This book is the first to compare the costs and outcomes of these approaches by examining realworld applications In a unique format paired case studies from the United States and Europe contrast direct regulation on one side of the Atlantic with an incentivebased policy on the other For example Germany s direct regulation of SO₂ emissions is compared with an incentive approach in the U S Direct regulation of water pollution via the U S Clean Water Act is contrasted with Hollands incentive based fee system Additional studies contrast solutions for eliminating leaded gasoline and reducing nitrogen oxide emissions CFCs and chlorinated

solvents The cases presented in *Choosing Environmental Policy* were selected to allow the sharpest most direct comparisons of direct regulation and incentive based strategies In practice environmental policy is often a mix of both types of instruments This innovative investigation will interest scholars students and policymakers who want more precise information as to what kind of blend will yield the most effective policy Are incentive instruments more efficient than regulatory ones Do regulatory policies necessarily have higher administrative costs Are incentive policies more difficult to monitor Are firms more likely to oppose market based instruments or traditional regulation These are some of the important questions the authors address often with surprising results

Policy Instruments for Environmental and Natural Resource Management Thomas Sterner, Jessica Coria, 2013-10-30 Thomas Sterner's book is an attempt to encourage more widespread and careful use of economic policy instruments The book compares the accumulated experiences of the use of economic policy instruments in the U S and Europe as well as in rich and poor countries in Asia Africa and Latin America Ambitious in scope it discusses the design of instruments that can be employed in any country in a wide range of contexts including transportation industrial pollution water pricing waste fisheries forests and agriculture While deeply rooted in economics *Policy Instruments for Environmental and Natural Resource Management* is informed by political legal ecological and psychological research The new edition enhances what has already been widely hailed as a highly innovative work The book includes greatly expanded coverage of climate change covering aspects related to policy design international equity and discounting voluntary carbon markets permit trading in United States and the Clean Development Mechanism Focusing ever more on leading ideas in both theory and policy the new edition brings experimental economics into the main of its discussions It features expanded coverage of the monitoring and enforcement of environmental policy technological change the choice of policy instruments under imperfect competition and subjects such as corporate social responsibility bio fuels payments for ecosystem services and REDD

Fairness in International Climate Change Law and Policy Friedrich Soltau, 2009-09-14 Based on an overview of science and the development of the climate regime to date this book seeks to identify the elements of a working consensus on fairness principles that could be used to solve the hitherto intractable problem of assigning responsibility for combating climate change

Energy Policies and Climate Change in China Han Lin, 2019-08-02 In the face of growing environmental challenges including climate change and energy security countries across the globe are developing new policies and programs to address these challenges and China is no exception This book analyses China's two most significant climate related energy policies the Clean Development Mechanism CDM including the later Chinese Certified Emission Reduction CCER and the Energy Conservation and Emission Reduction Scheme ECERS This work specifically examines the strengths and weaknesses of these policies to highlight the deficiencies and advise how they can be optimised so China can better achieve its emission reduction goals It analyses the roles and relationships between relevant actors and identifies how successful their cooperation has been and what factors have affected it Importantly the

work draws on a wide range of sources from central ministries to civil society including interviews with Chinese officials scholars energy company managers environment non governmental organisation ENGO personnel media reports and online forum discussions In doing so the book not only analyses the thoughts of policymakers as many works do but also those implementing the policies and those impacted by the policies The book concludes by offering detailed and practical solutions to address each specific deficiency in the CDM and ECERS policies with the aim of providing innovations and alternative approaches to improve current and future policies in China This book will be of great interest to students scholars and policymakers interested in climate change energy and Chinese environmental policy and politics

Extraterritoriality and Climate Change Jurisdiction Natalie L Dobson, 2021-09-23 This book builds on the scholarship of the law of state jurisdiction engaging with fundamental questions about states legislative competence to respond to climate change Considering general theory the author advocates for a systemic analytical framework for the contested issue of extraterritoriality in international law Exploring the crystallisation of climate change jurisdiction the book provides a comprehensive exploration of the jurisdictional bases and limitations for unilateral climate protection measures In doing so cross cutting issues of world trade law international civil aviation law the law of the sea and importantly the customary international law of state jurisdiction are considered Amidst the myriad of developing norms a novel considerate design tool is introduced to assist policymakers in finding a better balance between regulatory autonomy development needs and the protection of common concerns
