Climate Governance In The Developing World:

Climate Governance in the Developing World David Held, Charles Roger, Eva-Maria Nag, 2014-01-24 Since 2009 a diverse group of developing states that includes China Brazil Ethiopia and Costa Rica has been advancing unprecedented pledges to mitigate greenhouse gas emissions offering new unexpected signs of climate leadership Some scholars have gone so far as to argue that these targets are now even more ambitious than those put forward by their wealthier counterparts But what really lies behind these new pledges What actions are being taken to meet them And what stumbling blocks lie in the way of their realization In this book an international group of scholars seeks to address these questions by analyzing the experiences of twelve states from across Asia the Americas and Africa The authors map the evolution of climate policies in each country and examine the complex array of actors interests institutions and ideas that has shaped their approaches Offering the most comprehensive analysis thus far of the unique challenges that developing countries face in the domain of climate change *Climate Governance in the Developing World* reveals the political economic and environmental realities that underpin the pledges made by developing states and which together determine the chances of success and failure

Governing Climate Change in Southeast Asia Jens Marquardt, Laurence L. Delina, Mattijs Smits, 2021-12-07 This volume showcases the diversity of the politics and practices of climate change governance across Southeast Asia Through a series of country level case studies and regional perspectives the authors in this volume explore the complexities and contested nature of climate governance in what can be considered as one of the most dynamic and multi faceted regions of the world They reflect upon the tensions between authoritarian and democratic climate change governance the multiple roles of civil society and non state interventions and the conflicts between state planning and market driven climate change governance Shedding light on climate change mitigation and adaptation efforts in Southeast Asia this book presents the various formal and informal institutions of climate change governance their relevant actors procedures and policies Empirical findings from a diverse set of environments are merged into a cross country comparison that allows for elaborating on similar patterns whilst at the same time highlighting the distinct features of climate change governance in Southeast Asia Drawing on case studies from all Southeast Asian countries namely Brunei Darussalam Cambodia Indonesia Laos Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Viet Nam this book will be of great interest to students scholars and practitioners dealing with climate change and environmental governance

Global Forest Governance and Climate Change Emmanuel O. Nuesiri, 2018-03-07 This edited collection assesses governance in forestry programmes and projects including REDD governance It examines political representation participation and decentralisation in forest governance providing insight as to how forest governance arrangements can be responsive to the socio economic interests of local people and communities who live adjacent to and depend on forests *Global Forest Governance and Climate Change* argues that inclusive complementary representation of local communities is required for strong participatory processes and democratic

decentralisation of forest governance Responsiveness to local people s socio economic interests in forestry initiatives require paying attention to not just the hosting of participatory meetings and activities but also to the full cast of appointed self authorized and elected representative agents that stand speak and act for local people This book will be of interest to students and academics across the fields of climate change governance forestry development studies and political economy It will also be a useful resource for policy makers and practitioners responsible for forestry and climate change initiatives

Pathologies of Climate Governance Paul G. Harris,2021-02-25 Earth s climate is in crisis Climate governance has failed This book diagnoses climate governance as if it were a sick patient uncovering the fundamental factors causing the worsening climate crisis It distils decades of global climate negotiations to reveal the features of international relations that are impeding climate action and it identifies political obstacles to climate governance across a variety of countries in the Americas Asia and Europe The psychosocial aspects of climate change are explored to show how human nature overconsumption and global capitalism conspire to stymie climate action Remedies are suggested for how to overcome hurdles to effective climate governance internationally and nationally with ideas provided for individuals to help them align their own interests with those of the global environment Covering all of the major recent events in climate politics and governance this is an accessible book for concerned readers who want to understand the climate crisis

Governing the World? Thomas G Weiss,2015-11-17 Problems posed by Syria s chemical weapons attacks Egypt s ouster of an elected government and myriad other global dilemmas beg the question of whether and how the world can be governed The challenge is addressing what former UN Secretary General Kofi Annan called Problems without Passports environmental economic humanitarian and political crises that threaten stability prosperity and even human survival Everything is globalized everything except politics which remain imprisoned behind national borders The world has changed but our basic way of managing it has not We pursue fitful tactical short term and local responses for actual or looming threats that require sustained strategic longer run and global actions With clarity and passion Thomas G Weiss argues for a diversity of organizational arrangements some centralized some decentralized and a plurality of problem solving strategies some worldwide some local He proposes a three pronged strategy the expansion of the formidable amount of practical global governance that already exists the harnessing of political and economic possibilities opened by the communications revolution and the recommitment by states to a fundamental revamping of the United Nations

Climate Governance in International and Comparative Perspective Peter F. Haruna,Laila El Baradei,Liza van Jaarsveldt,Abraham D. Benavides,Cristina M. Stanica,2024-05-01 This book pulls literature together to examine the quality of climate governance based in the experience of Global South regions Africa Latin America and Caribbean While these regions are resilient the IPCC 2022 Report indicates that the effects of climate change are crippling their thinly structured governance systems and limited capacities For example in addition to environmental devastation loss of life and livelihoods these regions have

endured most of the loss and damage due to climate change impacts How are they responding What are the outcomes And where do they go from here Given this background the book's goal is to question assumptions about climate governance patterns systems institutions and processes in these regions using comparative analytical techniques while distilling information about policy outcomes that other approaches do not provide It argues that these regions and individual countries within them have a lot to learn from and about each other rather than look to the Global North and wealthy countries for economic political and administrative models that hardly match their lived experience and ontological outlooks In doing so it aspires to promote a fruitful South South policy related dialogue via scholarly exchanges and also contribute to advance the study and practice of international and comparative public administration From this perspective scholars researchers educators public managers and practitioners will find the book relevant to and useful for their respective endeavors

Governing Climate Change Jolene Lin, 2018-06-21 First systematic study of global cities as lawmakers in the world of transnational climate change governance *Transnational Climate Change Governance* Harriet Bulkeley, Liliana B. Andonova, Michele M. Betsill, Daniel Compagnon, Thomas Hale, Matthew J. Hoffmann, Peter Newell, Matthew Paterson, Charles Roger, Stacy D. VanDeveer, 2014-07-21 The world of climate politics is increasingly no longer confined to the activities of national governments and international negotiations Critical to this transformation of the politics of climate change has been the emergence of new forms of transnational governance that cut across traditional state based jurisdictions and operate across public and private divides This book provides the first comprehensive cutting edge account of the world of transnational climate change governance Co authored by a team of the world's leading experts in the field and based on a survey of sixty case studies the book traces the emergence nature and consequences of this phenomenon and assesses the implications for the field of global environmental politics It will prove invaluable for researchers graduate students and policy makers in climate change political science international relations human geography sociology and ecological economics

The History of Global Climate Governance Joyeeta Gupta, 2014-02-06 What has happened globally on the climate change issue How have countries positions differed over time and why How are problems and politics developing on an increasingly globalised planet and can we find a solution This book explores these questions and more explaining the key underlying issues of the conflicts between international blocs The negotiation history is systematically presented in five phases demonstrating the evolution of decision making The book discusses the coalitions actors and potential role of the judiciary as well as human rights issues in addressing the climate change problem It argues for a methodical solution through global law and constitutionalism which could provide the quantum jump needed in addressing the problem of climate governance This fascinating and accessible account will be a key resource for policymakers and NGOs and also for researchers and graduate students in climate policy geopolitics climate change environmental policy and law and international relations **Research Handbook on Climate Governance** Karin Bäckstrand, Eva Lövbrand, 2015-11-27 The 2009 United Nations climate

conference in Copenhagen is often represented as a watershed in global climate politics when the diplomatic efforts to negotiate a successor agreement to the Kyoto Protocol failed and was replaced by a fragmented and decentralized climate governance order. In the post Copenhagen landscape the top down universal approach to climate governance has gradually given way to a more complex hybrid and dispersed political landscape involving multiple actors, arenas and sites. The Handbook contains contributions from more than 50 internationally leading scholars and explores the latest trends and theoretical developments of the climate governance scholarship.
