Praise for Acceptance and Mindfulness in Cognitive Behavior Therapy Understanding and Applying the New Therapies One of the most fruitful aspects of the encounter between classical Buddhist knowledge and modern science has been the emergence of new therapeutic and educational approaches that integrate contemplative practice such as mindfulness and contemporary psychology methods such as those of cognitive therapy The systematic approach of this book wherein the insights of both classical Buddhist and contemporary psychology are integrated represents a most beneficial and powerful method of ensuring a healthy mind and heart His Holiness the Dalai Lama What has been missing in the midst of partisan battles between orthodox CBT therapists and enthusiastic proponents of newer acceptance mindfulness approaches is a reasoned scientifically grounded discourse that would help researchers and clinicians alike sort through the various claims and counterclaims This book skillfully conceived and edited by James Herbert and Evan Forman provides just such a sober and open minded appraisal of a trend that has sometimes suffered both from too much hype from one side and too sweeping a rejection by the other This volume encourages careful consideration of both positions and can advance evidence based psychosocial therapy both conceptually and procedurally to the benefit of all From the Foreword by Gerald C Davison PhD University of Southern California

Symptom-Focused Dynamic Psychotherapy Mary E. Connors, 2013-05-13 Traditionally psychoanalytically oriented clinicians have eschewed a direct focus on symptoms viewing it as superficial turning away from underlying psychopathology But this assumption is an artifact of a dated classical approach it should be reexamined in the light of contemporary relational thinking So argues Mary Connors in *Symptom Focused Dynamic Psychotherapy* an integrative project that describes cognitive behavioral techniques that have been demonstrated to be empirically effective and may be productively assimilated into dynamic psychotherapy What is the warrant for symptom focused interventions in psychodynamic treatment Connors argues that the deleterious impact of symptoms on the patient's physical and emotional well being often impedes psychodynamic engagement Symptoms associated with addictive disorders eating disorders OCD and posttraumatic stress receive special attention With patients suffering from these and other symptoms Connors finds specific cognitive behavior techniques may relieve symptomatic distress and facilitate a psychodynamic treatment process with its attentiveness to the therapeutic relationship and the analysis of transference countertransference Connors model of integrative psychotherapy which makes cognitive behavioral techniques responsive to a comprehensive understanding of symptom etiology offers a balanced perspective that attends to the relational embeddedness of symptoms without skirting the therapeutic obligation to alleviate symptomatic distress In fact Connors shows active techniques of symptom

management are frequently facilitative of treatment goals formulated in terms of relational psychoanalysis self psychology intersubjectivity theory and attachment research A discerning effort to enrich psychodynamic treatment without subverting its conceptual ground Symptom Focused Dynamic Psychotherapy is a bracing antidote to the timeworn mindset that makes a virtue of symptomatic suffering
