Hoekzema,2012-12-06 At the outset of the research leading to this book I held a position somewhere close to the standard Copenhagen interpretation of QM I was strongly attracted to in particular the philosophy of Niels Bohr However being aware of some of the problematic sides and ambiguities of his views and of new developments which have taken place in QM after his time the main challenge would

be to develop a more up to date version of his approach and express it in a philosophically unobjectionable way
 Traces of this original attitude can still be found in views I hold nowadays For instance I think that I now know a satisfactory and correct way of dealing with features like complementarity and I still see this as a relevant subject In many other respects however there have been major changes in my position In fact during certain stages of my research my views simply started moving and kept on doing so at an irritating pace and for uncomfortably long periods of time I learned for example that at least some of the classical ideas about theory structure are much better than I had realized and cannot just be pushed aside for anything even as impressive as empirical success

Ecphrastic Shields in Graeco-Roman Literature Karel Thein,2021-09-30 This volume takes a fresh look at ekphrasis as a textual practice closely connected to our embodied imagination and its verbal dimension it offers the first detailed study of a large family of ancient ecphrastic shields often studied separately but never as an ensemble with its own development The main objective consists of establishing a theoretical and historical framework that is applied to a series of famous ecphrastic shields starting with the Homeric shield of Achilles The latter is reinterpreted as a paradigmatic thing whose echoing down the centuries is reinforced by the fundamental connection between ekphrasis and artefacts as its primary objects The book demonstrates that although the ancient sources do not limit ekphrasis to artificial creations the latter are most efficient in bringing out the intimate affinity between artefacts and vivid mental images as two kind of entities that lack a natural scale and are rightly understood as ontologically unstable

Ecphrastic Shields in Graeco Roman Literature The World s Forge should be read by those interested in ancient culture art and philosophy but also by those fascinated by the broader issue of imagination and by the interplay between the natural and the artificial

Phenomenology, Architecture and the Built World James Dodd,2017-01-05 Phenomenology Architecture and the Built World is an introduction to the methods and basic concepts of phenomenological philosophy through an analysis of the phenomenon of the built world The conception of the built world that emerges is of space and time fashioned in accordance with a living understanding of what it is for human beings to exist in the world Human building and making is thus no mere supplementary instrument in the pursuit of the ends of life but a fundamental embodiment of the self understanding of human beings Phenomenological description is uniquely capable of bringing into view the physiognomy of this understanding its texture and complexity thereby providing an important basis for a critique of what constitutes its essence and its conditions of possibility
