The Sword in Japanese Martial Traditions, Vol. 1 Michael DeMarco, 2017-12-02 If the Way of the warrior is the soul of Japan their magnificent swords were the tools utilized to form the nation and forge their spirit You ll find an abundance of information in this special anthology in support of this thesis Kimberley Taylor wrote four chapters the first being an interview with 7th dan Matsuo Haruna Haruna offers great advice for practitioners based on his first hand experience Taylor s two highly researched chapters give overviews of two major iaido schools Excellent photos and descriptions of katas accompany the text Taylor s finale is a short piece describing two of his favorite techniques while Deborah Klens Bigman s chapter deals with two of her favorite techniques Another top ranking swordsman Nicklaus Suino gets to the finicky details of sword drawing techniques as performed by masters From his two chapters we learn how to watch for telltale signs of expertise and come to a greater appreciation of the art of drawing the sword Jonathan Seckler s chapter translates and comments on an essay written by Chozanshi Shissai in 1729 He argues that Neo Confucianism rather than Zen became the foundation of swordsmanship and illustrates how the sword arts began to be appreciated for their use for self development Andrew Bryant s chapter focuses on poems passed down within the Muso Jikiden Eishin ryu School of Iaido These poems correspond to techniques contained within the system created in the 17th century The author presents each poem and offers provides textual descriptions of their corresponding applications with each sword technique illustrated Joseph Svinth s research presents the earliest kendo clubs to form in Canada The socio cultural settings add much flavor to this chapter Information is provided regarding notable instructors training and competitions Another way to better understand a martial tradition of one country is to compare it with another Matthew Galas compares and contrasts sword arts in Germany with the Japanese traditions The focus is on general principles and combat philosophy Devotees to sword practice are well aware that scabbards get damaged Michael Babin s chapter shows how to build a serviceable scabbard according to the talents of anyone moderately handy with tools The twelve chapters described above should inspire further research and practice in the Japanese sword arts plus bring a greater appreciation for their unique place in world history and culture

Rediscovering Budo Roald Knutsen, 2021-10-25 In an environment where Budo has lost much of its original spirit in the inevitable process of changing attitudes towards sport Roald Knutsen reappraises and reaffirms the profound and intrinsic importance of the underlying warrior culture and its real legacy Technical knowledge rests entirely in the dojo this book is intended to show those interested something of the roots that underpin the true Bujutsu and Budo and to throw some light on the other complex influences from the past that have enriched so many of the surviving traditions A number of these roots are purely warrior based in nature others are intellectual or even esoteric If a student is only searching for technique then this book will be of limited value But for those inclined to look below the surface there is much to commend it Indeed it will be widely welcomed by more serious Budo practitioners as well as interested observers who are looking for a return to first principles

concerned more about substance than style and thereby gain valuable insight into the mind set of Japan's unique warrior culture

Legacies of the Sword Karl F. Friday, Seki Humitake, 1997-07-01 Western scholars and educators are generally far less familiar with the samurai in his original and ostensibly primary role as warrior and masters of arms than in his other functions as landowner feudal lord literature or philosopher Yet any attempt to comprehend fully the samurai without considering his military abilities and training bugei is futile With verve and wit Karl Friday combines the results of nearly two decades of fieldwork and archival research to examine samurai martial culture from a broad perspective as a historical phenomenon as a worldview and as a system of physical spiritual and moral education

Classical Budo Donn F. Draeger, 1990-10-01 Donn Draeger was one of the most famous and well respected martial artists of the twentieth century and he was a pioneer in bringing Asian martial arts study to the West Here he illuminates the compelling historical political and philosophical events that gave rise to the development of the budo arts The classical budo or martial ways are not combat systems like their forerunner bujutsu or martial arts nor are they sports like modern judo kendo or karate They are first and foremost spiritual disciplines whose ultimate goal achieved through the most rigorous mental and physical training is self realization in the tradition of Zen Buddhism The author details the history philosophy and methods of a variety of these martial ways some using weapons and some weaponless and reveals how they evolved from their combative roots The book includes fascinating artwork from classical sources and archival photographs of modern budo masters in action

Tengu Roald Knutsen, 2011-08-15 This fully illustrated volume including an eight page colour plate section is the first in depth study in English to examine the warrior and shamanic characteristics and significance of tengu in the martial art culture bugei of Muromachi Japan 1336 1573 According to Roald Knutsen who is widely known for his writings on the samurai tradition prompting his life long study of tengu the part human part animal creatures was the early discovery that the tengu of the Muromachi period were interacting with the deadly serious bugei masters teaching the arts of war Here were beings who did not conform to the comic goblin like creatures of common folklore and were not the creations of the Buddhist priests intent on demonizing that which they did not understand and could not control As this study shows the part hidden tengu under review passed on and taught the clearest theory of tactics and strategy to bushi of the highest calibre the absorption and mastery of which often decided if the warrior and his clan lived or were annihilated on the all too frequent killing grounds of the Muromachi age Tengu will be widely welcomed in many contexts including studies relating to martial arts religion and folklore shamanism and mythology and the social and military history of Japan

Teaching and Learning Japanese Martial Arts: Scholarly Perspectives, Vol. 2 Michael DeMarco, 2017-03-21 In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing This is the very definition of scholarly This two volume anthology brings together the best scholarly works published in the Journal of Asian Martial Arts on the topic of teaching and learning Japanese martial

arts In this second volume you ll find eight chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved Chapter one asks What defines and gives meaning to the practice of karate The Dr Wingate looks to the ideology of karate as presented in the writings of founder Ginchin Funakoshi and traditional Japanese martial arts as ways of self cultivation This ideology is often greatly different from the ideology held by modern practitioners This chapter explores the differences Next Dr Donohue comments on the ideological complex surrounding training in the Japanese martial traditions These systems while remaining relatively uniform through time have in fact been subject to considerable philosophical interpretation and emphasis Why many practice martial artists has little to do with the essential nature of these arts Dr Grossman presents a thesis in his chapter that we can arrive at a deeper understanding of any martial arts using aikido as an example if we consider it to be a symbolic form of communication as well as a martial art and utilize the science of semiotics to translate the message encoded in the body language of aikido techniques A photographic technical section illustrates this process The next chapter by Sakuyama Yoshinaga discusses the potential growth for learning in children How can adults provide the best learning environment The author believes that inspiration comes through subtle emotions of the human heart influencing others The theory is found in ancient samurai traditions and applied by the author in teaching Shorinji Kempo Chapter five by Dr Dykhuizen point out how Asian martial arts are being practiced in cultures other than those within which they originated Specific information concerning how practitioners from different cultures understand them becomes increasingly useful to martial artists and martial arts scholars This chapter summarizes findings of an investigation among aikido practitioners The Japanese Imperial family is said to have been given three symbols of authority by the gods a mirror a jewel and a sword Dr Donohue uses this symbolic structure to discuss varying perspectives on the Japanese martial arts Each aid in our understanding and appreciation of the multifaceted dimensions of the martial arts In his chapter Dr Edinborough examines how Japanese martial arts specifically the approach developed by Inaba Minoru can be functionally understood as a form of art Through referring to the aesthetic theories the article examines budo as a means of organizing experience recognizable alongside painting dance theater and literature The final chapter by Marvin Labbate looks close at the training hall Dressed in a uniform students line up in a ready position come to attention sit meditate and bow This ritualized pattern is performed at the beginning during and at the end of each class but what does it mean In this chapter each element of the ritualized pattern will be discussed to provide a clear understanding of its original intent If you are interested in Japanese martial traditions you will find much in these eight chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher s way of instructing and help a student understand what to expect out of his or her studies The Art of Longsword Fighting Benjamin J.

Smith,2021-09-30 The teaching of Historical European Martial Arts has widespread appeal with numerous clubs in many countries However comparatively few people who run their own club have qualifications that would make them an instructor in traditional martial arts organizations Even those with such qualifications lack in depth cohesive resources for teaching a given style often because they can only work from incomplete sources Thus the need for a book which is grounded in exhaustive research into historical teaching methods and in particular focusing on the specific style of Sigmund Ringeck who was himself a teacher of fighting arts in the late 14th century or the early or mid 15th century In *The Art of Longsword Fighting* Benjamin J Smith therefore offers the broader information necessary for teachers of historical swordsmanship to deliver courses based on original authentic techniques This includes the various cutting methods the role of competition in learning these arts the mechanics of the interpretive process and insights into how to use a wide range of activities to enhance students experience All of this is achieved through a panoply of photographs showing each move along with explanatory diagrams as well as detailing how and when to introduce each next step in a manner that is faithful to Ringeck s style There is no current literature available which demonstrates how each move should be undertaken and most importantly why each step should be taken in the sequences described There is no doubt that a book of this nature has been long awaited and will be welcomed by instructors and students alike as well as those general readers interested in fencing and the longsword of the Renaissance period

The Practice of Freedom Wendy Palmer,2016-08-01 Drawing on the poetic wisdom of the Tao Te Ching American sensei Wendy Palmer translates the powerful teachings of aikido for use in everyday life With poignant reflections on her own life including teaching inmates in a woman s federal prison she describes how we can regain our sense of freedom vitality and integrity when under the duress of life s attacks by transforming our negativity into budo or unconditional love *The Practice of Freedom* is invaluable not only for students of aikido and other movement and martial arts but also for those who seek to live with confidence and self reliance to establish clear and compassionate boundaries and to deepen their capacities for relationships

East Asian Pedagogies David Lewin,Karsten Kenklies,2020-07-13 This book opens up philosophical spaces for comparative discussions of education across East and West It develops an intercultural dialogue by exploring the Anglo American traditions of educational trans formation and European constructions of Bildung alongside East Asian traditions of trans formation and development Comparatively little research has been done in this area and many questions concerning the commensurability of North American European and East Asian pedagogies remain Despite this dearth of theoretical research there is ample evidence of continued interest in self formation through various East Asian practices from martial arts to health and spiritual practices e g Aikido Tai Chi Yoga mindfulness etc suggesting that these traditional practices and pedagogical relations have something important to offer despite their marginal standing in educational discourse This book will appeal to all researchers and students of comparative education studies with an interest in issues of interpretation and translation between different traditions and cultures
