Classics Of Criminology:

Classics of Criminology Joseph E. Jacoby, 2004 If students read only about and not in criminology their experience is but secondhand and their conclusions are determined by textbook authors says Joseph Jacoby in the preface to this edition of his well known collection *Classics of Criminology* By reading scholarly works in their original form readers can share in the discovery and unfolding of powerful ideas in each author's own words *Classics of Criminology* is a compilation of writings produced over the last 240 years These writings represent the most influential approaches to describing and explaining crime and the social responses to crime The organization of the collection enables readers to follow the development and application of key ideas from one major author to the next

African American Classics in Criminology and Criminal Justice Shaun L Gabbidon, Helen Taylor Greene, Vernetta D Young, 2002 Congratulations to SAGE author Shaun L Gabbidon for becoming the second scholar in the college's history to be named a Distinguished Professor by the University's Office of the President Pennsylvania State University Harrisburg This collection of writings is crucially important in part because it reminds us the theoretical paradigms of these and other African American scholars are excluded when crime its causes and its control are discussed by criminologists criminal justice practitioners and policy makers To understand crime fully the perspectives advanced by these scholars must become an integral part of discussions about who is a criminal and which public policies will best control crime From the forward by Anne Thomas Sulton Ph D J D From W E B Dubois through Lee Brown this anthology provides a collection of the key articles in criminology and criminal justice written by black scholars Available in a single volume for the first time the articles collected in this book reflect the voices of African American scholars and display the diversity of perspectives sought after in today's academic community Crime in the African American community is examined from social economic and political perspectives and the historical context of each article is provided by the editors Spanning the 20th century these works present a historical chronology of African American views on crime and its control with theoretical perspectives that have often been tangential to mainstream scholarship For your courses in Criminological Theory Race and Crime Crime and Social Policy Minorities and Criminal Justice

Classics of Criminology Joseph E. Jacoby (ed), 2004

Classics in Environmental Criminology Martin A. Andresen, Paul J. Brantingham, J. Bryan Kinney, 2010-05-25 A careful analysis of environmental factors is key to understanding the causes of crime to solving crimes and eventually helping to predict and prevent them *Classics in Environmental Criminology* is a comprehensive collection of seminal pieces from legendary contributors who focus on the role that the immediate environment plays in the occurrence of a crime Defines the field Divided into three parts the book begins by highlighting the development of environmental criminology as a discipline through its origins in spatial criminology It examines social disorganization theory which explains criminal activity with reference to the characteristics of the community that delinquents live in It then discusses the ecology of crime with reference to macroenvironments and microenvironments The next section introduces concepts such as routine

activity theory the geometric theory of crime the rational choice theory of offending and crime pattern theory Offers perspectives on prevention The last part focuses on the concept of crime prevention examines the idea of altering the environment in order to prevent crime and discusses situational crime factors and efforts to reduce the opportunities for crimes to be committed It considers the impact of routine activities on crime prevention initiatives and advocates a flexible approach to crime prevention based on the dynamic nature of our environment The book concludes with a chapter outlining how environmental criminology has evolved in recent years and provides a future outlook on where it may be headed Invaluable as a textbook and as a professional reference this volume is a comprehensive survey of a critical field in contemporary criminological theory Offering insight assembled by top academic figures within the criminology community this work is destined to provoke further inquiry and research

The Handbook of the History and Philosophy of Criminology Ruth Ann Triplett, 2018-01-04 Featuring contributions by distinguished scholars from ten countries The Wiley Handbook of the History and Philosophy of Criminology provides students scholars and criminologists with a truly a global perspective on the theory and practice of criminology throughout the centuries and around the world In addition to chapters devoted to the key ideas thinkers and moments in the intellectual and philosophical history of criminology it features in depth coverage of the organizational structure of criminology as an academic discipline world wide The first section focuses on key ideas that have shaped the field in the past are shaping it in the present and are likely to influence its evolution in the foreseeable future Beginning with early precursors to criminology s emergence as a unique discipline the authors trace the evolution of the field from the pioneering work of 17th century Italian jurist philosopher Cesare Beccaria up through the latest sociological and biosocial trends In the second section authors address the structure of criminology as an academic discipline in countries around the globe including in North America South America Europe East Asia and Australia With contributions by leading thinkers whose work has been instrumental in the development of criminology and emerging voices on the cutting edge The Wiley Handbook of the History and Philosophy of Criminology provides valuable insights in the latest research trends in the field world wide the ideal reference for criminologists as well as those studying in the field and related social science and humanities disciplines

Building a Black Criminology, Volume 24 James D. Unnever, Shaun L. Gabbidon, Cecilia Chouhy, 2018-10-26 In light of the Black Lives Matter movement and protests in many cities race plays an ever more salient role in crime and justice Within theoretical criminology however race has oddly remained on the periphery It is often introduced as a control variable in tests of theories and is rarely incorporated as a central construct in mainstream paradigms e g control social learning and strain theories When race is discussed the standard approach is to embrace the racial invariance thesis which argues that any racial differences in crime are due to African Americans being exposed to the same criminogenic risk factors as are Whites just more of them An alternative perspective has emerged that seeks to identify the unique racially specific conditions that only Blacks experience Within the United States these conditions are rooted in the

historical racial oppression experienced by African Americans whose contemporary legacy includes concentrated disadvantage in segregated communities racial socialization by parents experiences with and perceptions of racial discrimination and disproportionate involvement in and unjust treatment by the criminal justice system Importantly racial invariance and race specificity are not mutually exclusive perspectives Evidence exists that Blacks and Whites commit crimes for both the same reasons invariance and for different reasons race specific A full understanding of race and crime thus must involve demarcating both the general and specific causes of crime the latter embedded in what it means to be Black in the United States This volume seeks to explore these theoretical issues in a depth and breadth that is not common under one cover Again given the salience of race and crime this volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper level undergraduate courses
