Classics of International Relations Henrik Bliddal, Casper Sylvest, Peter Wilson, 2013-07-24 Classics of International Relations introduces, contextualises and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory from advanced undergraduates to academic specialists, it asks why are these works considered classics? Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* 1909 and concludes with Daniel Deudney's award-winning *Bounding Power* 2006. The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics* but seeks to expand the IR canon beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's *critical sociology of moral boundaries*, Men and Citizens in the Theory of International Relations and Enloe's pioneering gender analysis *Bananas Beaches and Bases*. It also innovatively considers certain alternative format classics such as Kubrick's satire on the nuclear arms race *Dr Strangelove* and Errol Morris's powerful documentary on war and US foreign policy *The Fog of War*. With an international cast of contributors, many of them leading authorities on their subject, *Classics of International Relations* will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field. *Classics of International Relations* is designed to become a standard reference text for advanced undergraduates, postgraduates and lecturers in the field of IR.

International Politics Scott P. Handler, Robert T. Person, 2020-12-23 Why do states do what they do? Who are the relevant nonstate actors in international politics and why do they do what they do? What causes conflict and cooperation in the international system? These are some of the most basic questions that the discipline of International Relations (IR) seeks to answer; they are also the questions that drive the objectives, organization and content of this book. *International Politics: Classic and Contemporary Readings*, Second Edition, seeks to help students engage critically with some of the world's most challenging questions through the use of leading classic and contemporary scholarship in the field of international relations. The first five chapters of the book explore the leading theoretical traditions in international relations, while subsequent chapters explore the themes of international security, international political economy and contemporary challenges in international relations. This organization makes the book easy to use as standalone text or alongside core text. Class tested on over 10,000 students in the last decade, this text was built from the ground up to introduce students to the traditions and new foundations of international relations as well as to the principles of intellectually rigorous thought.

Hegemony

Richard Howson, Kylie Smith, 2008-05 The originality and depth of Gramsci s theory of hegemony is now evidenced in the wide ranging intellectual applications within a growing corpus of research and writings that include social political and cultural theory historical interpretation gender and globalization The reason that hegemony has been so widely and diversely adopted lies in the unique way that Gramsci formulated the problematics of structure superstructure coercion consensus materialism idealism and regression progression within the concept hegemony However in much of the contemporary literature the full complexity of hegemony is either obfuscated or ignored Hegemony through comprehensive and systematic analyses of Gramsci s formulation a picture of hegemony as a complex syncretism of these dichotomies In other words hegemony is presented as a concept that is as much about aspiration and progressive politico social relations as it is about regressive and dominative processes Thus the volume recognises and presents this complexity through a selection of contemporary theoretical as well as historico social investigations that mark a significantly innovative moment in the work on hegemony

Special Features

of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master's theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD's BEPS project on the UN Model the OECD's BEPS project on the UN Model
