Climat Investigation Philippe Verdier:

Climat investigation Philippe Verdier, 2015-10-01 Le climat est aujourd'hui une guerre, une religion. Tout avis contraire sera éliminé. Quelle voix s'élèvera pour rompre le silence, pour faire clater la vérité avant le sommet de Paris ? Il n'existe aujourd'hui plus de lien entre le climat et le discours alarmiste sur ce sujet. Les Français sont maintenus dans la peur par un matraquage sans précédent. Cette prise d'otages constitue un enjeu diplomatique pour la Conférence de Paris. Au plus haut sommet de l'État, le cheic de la COP 21 est diagnostiqué depuis longtemps, mais la manipulation et le spectacle s'amplifient davantage. Le GIEC ultra-politisé se dilate sous les scandales et ses méthodes critiquables. La parole scientifique est inaudible. Les Nations Unies plongées dans la corruption patagent volontairement depuis une génération de pourparlers. Lobbies économiques, associations écologistes, gouvernements et religions tissent des liens dangereux. Les ambassadeurs du climat entretiennent cette crise aussi bruyante qu'impalpable. La France figure pourtant parmi les pays les moins touchés par le changement climatique. Notre économie et notre société bénéficient aussi des avantages considérables du réchauffement. Le développement des énergies renouvelables menace notre sécurité et ne compensera aucunement l'explosion démographique identifiée comme une cause principale du problème. Qui osera ouvertement briser ces tabous sous la pression extrême des dirigeants ? **Les cieux**

sont tombés sur la tête Philippe Verdier, 2016-03-16 Au cours de ses vingt années, faire la pluie et le beau temps, la télévision Philippe Verdier a collecté une somme de petites et grandes histoires incroyables, la fois drôles et savantes. Des terrains de sports aux coulisses de la politique, dans le milieu du showbiz ou chez les animaux, la météo s'invite partout. Vous saurez qui est propriétaire du soleil, quelle tour devient infernale par grand vent et le temps idéal pour l'économie immobilière, le crime et la drague. Et aussi tous les chiffres, records insolites et anecdotes farfelues de la météo pour ne plus avoir l'air naïf de la dernière pluie. Les mélanges du temps qu'il fait par Monsieur Météo, Journaliste radio et téléspécialiste de la météo. Philippe Verdier est notamment l'auteur de *Climat investigation*.

Le contentieux climatique : une révolution judiciaire mondiale Christian Huglo, 2018-05-23 Le droit climatique a été officialisé au Sommet de la Terre en 1992, duquel est issue la Convention-cadre des Nations unies sur les changements climatiques. Par la suite, la société civile a manifesté son intérêt pour faire face aux défis du réchauffement climatique, c'est ainsi que sont nées des coalitions d'organisation pour promouvoir la justice climatique comme l'initiative pour la justice environnementale et le changement climatique. Les mouvements religieux ont également souligné l'importance de la justice climatique, la protection des équilibres climatiques et de l'environnement. Les praticiens du droit de l'environnement traversent notamment la mission confiée en juin 2015 par le Président François Hollande. Corinne Lepage se sont clairement prononcés en faveur d'une justice climatique pour répondre aux appels de la société civile. Le texte qui en est issu est un projet de Déclaration universelle des droits de l'humanité dans laquelle l'Homme est appelé à ses devoirs vis-à-vis de l'environnement. Mais c'est au cours des années 2000 que le juge américain va ouvrir la voie au contentieux climatique national dans l'affaire dite *Massachusetts v EPA* n° 05-1120 jugée en avril 2007, selon laquelle la plus haute juridiction des États-Unis a

impose l'Agence américaine de protection de l'environnement de regrouper les missions des gaz effet de serre sur le fondement du Clean Air Act Par la suite la justice climatique a été mise en œuvre par d'autres juridictions nationales travers le monde comme l'illustrent les affaires Urgenda foundation v Kingdom of the Netherlands Hollande Ashgar Leghari v Federation of Pakistan Pakistan qui vont largir les règles traditionnelles de procédure contentieuse compense preuve causalité Le succès du contentieux climatique repose entre les mains des juges nationaux lesquels s'appuient généralement sur les travaux du GIEC relatif à l'évaluation des risques climatiques De plus certaines décisions de justice sont allées jusqu'à proclamer et reconnaître des droits supérieurs au droit constitutionnel interne C'est dire que le sujet de la justice climatique qui se propage grande vitesse près de 700 décisions de justice recensées aujourd'hui devient un extraordinaire laboratoire en vue de l'élaboration d'un droit efficient pour l'avenir des hommes et de la planète Cet ouvrage s'adresse aux juristes galement aux non juristes tous les étudiants et chercheurs ainsi qu'aux praticiens et professionnels du droit

Mythes et légendes écologistes Benoît Rittaud, 2023-11-15 Depuis 50 ans l'effondrement écologique est pour demain Curieusement pourtant ces 50 dernières années ont vu l'humanité progresser en nombre en espérance et en qualité de vie des niveaux inédits dans l'histoire Comment un décalage aussi norme entre le réel et sa perception a-t-il pu s'installer Loin d'être l'expression d'un consensus scientifique les totems que sont la crise climatique ou la sixième extinction des espèces manent d'un cartel de recherche qui interdit la dissidence et ne tolère pas la nuance Refusant la discussion celui-ci a rompu avec la méthode scientifique ainsi qu'avec tout projet raisonnable de préservation de l'environnement Benoît Rittaud montre que la science sert désormais d'outil de censure au profit d'une idéologie qui sous couvert de sauver la planète installe ses rituels ses légendes et ses prescriptions toujours plus exigeantes au cœur de notre société Mlange de paradis perdu et de fin du monde la mythologie écologiste postmoderne n'a rien d'une vision naïve et bien intentionnée Derrière son sympathique imaginaire de faade se cache en réalité un projet totalitaire qui combat l'aspiration même un monde plus prospère et plus libre Benoît Rittaud est mathématicien et essayiste

L'urgence climatique est un leurre François Gervais, 2018-10-31 La terre se réchauffe dangereusement et si nous ne faisons rien demain verra la fin du monde En matière de climat le marché de la peur est florissant Une peur bien utile véritable instrument de pouvoir fondé sur la manipulation des motions au détriment de la raison Faut-il en effet rappeler quelques unes des prophéties mises en 1970 par les premières assises écologistes du Jour de la Terre pour l'horizon de l'an 2000 plus une goutte de pollution généralisation des famines sur tout le globe et réduction de l'espérance de vie 49 ans aux États Unis Sans oublier le cri d'alarme lancé en 2008 par Al Gore prix Nobel de la Paix 2007 et ancien vice président américain qui annonçait la disparition totale de la calotte glaciaire estivale au pôle nord en 2013 Pour François Gervais s'il y a une urgence c'est celle de retrouver nos esprits scientifiques Car contrairement ce que disent les responsables du GIEC il est absolument faux d'affirmer qu'il existe un consensus des chercheurs autour des questions climatiques Ce livre le prouve en détail Le catastrophisme des modèles virtuels actuels source de politiques dispendieuses dont certaines n'ont de durable que l'

affichage est en revanche et sans aucun doute une vraie catastrophe annoncée. Physicien professeur à l'université de Tours, François Gervais a été directeur d'un laboratoire du CNRS UMR 6157. Auteur de six ouvrages dont *l'Innocence du carbone* Albin Michel 2013, il a été expert reviewer du rapport AR5 du Groupe d'experts intergouvernemental sur l'évolution du climat GIEC.

Climarnaque Jean-Michel Jacquemin-Raffestin, 2025-10-13. Ce livre permet de connaître le passé de notre Terre que l'on ne nous enseigne plus, et où la facilité de faire croire ce que l'on veut aux gens. Les explications et les études sur le CO2 depuis des centaines de milliers d'années existent. Les différents changements climatiques, une époque où l'homme n'était pas présent sur Terre avec un CO2 bien plus important, l'activité solaire très importante dans le changement et le réchauffement de la planète que les médias oublient. Ce fameux CO2 ne représente que 0,04 % de notre atmosphère. Savez-vous qu'en 0,02 % la végétation meurt, l'homme meurt, la vie s'arrête. De nombreuses études montrent que le CO2 suit l'augmentation de chaleur avec 800 ans de retard. Ils ne veulent pas sauver la planète, au contraire, ils font tout l'inverse : déforestation massive, voitures électriques et leur pollution plus importante que celle des voitures thermiques qui ne doivent plus exister en 2035 selon le docteur d'Ursula. Vous parlez donc de ces enfants de 8 ans qui descendent dans les mines en Afrique pour extraire les matières qui servent votre batterie de voiture. En d'autres temps, cela s'appelait de l'esclavage, est-ce sauver la planète ? Une étude explique que le mouvement environnemental avec son Net Zero voulu est une idéologie anti-humaine qui va provoquer la mort de 4 milliards de personnes. Avez-vous compris ce qu'ils veulent ? La dépopulation de la planète dont ils parlent depuis un demi-siècle.

L'objectif de ce livre, premier tome d'une trilogie, est un appel à se réveiller, sauter dans le train de l'illumination et grandir dans l'unité jusqu'à une masse critique pour résister à cette tyrannie imposée.

Réactions françaises François Krug, 2023-03-31 00:00:00+02:00. Ils sont trois visages et trois tentes de gondole de la littérature française : Michel Houellebecq, Sylvain Tesson ou encore Yann Moix. Des parcours différents mais un point commun : ignorer de leurs lecteurs. Dans l'ombre, tous ont été et sont restés des compagnons de route de l'extrême droite. Cette enquête sur l'itinéraire de ces trois stars révèle comment s'est constituée une coterie littéraire très réactionnaire où se côtoient depuis les années 1990 de petits et de grands crivains, des diteurs, des journalistes, des animateurs TV et des idéologues peu fréquentables. C'est l'histoire d'une génération qui par goût de la provocation, du pris de son époque ou pure conviction a franchi la ligne rouge, ou plutôt t brune. Sait-on que Michel Houellebecq n'a jamais cessé de prendre sous son aile des royalistes de l'Action française puis des blogueurs stars de la fachosphère jusqu'aux dirigeants de Valeurs actuelles ? Sait-on que Sylvain Tesson, l'crivain voyageur, a fait ses débuts sur Radio Courtoisie, la station d'extrême droite ? Que son premier voyage, un tour du monde, venait se faire sous le guide d'une association d'anciens de l'Algérie française et du FN ? Qu'il entretient des liens troits avec la Nouvelle Droite ? Sait-on que les liens de Yann Moix avec des antisémites et même des négationnistes sont plus troits qu'il ne veut le dire ? Que ses douteux amis ont joué un rôle dans ses plus grands succès ? Une enquête implacable sur les dessous d'une histoire mal connue. François Krug est journaliste indépendant. Il collabore régulièrement au Monde et son magazine.
