Climate Change Impacts On Ocean And Coastal Law Us And International Perspectives:

Climate Change Impacts on Ocean and Coastal Law Randall Abate, 2015 Ocean and coastal law has grown rapidly in the past three decades as a specialty area within natural resources law and environmental law. The protection of oceans has received increased attention in the past decade because of sea level rise, ocean acidification, the global overfishing crisis, widespread depletion of marine biodiversity such as marine mammals and coral reefs, and marine pollution. Paralleling the growth of ocean and coastal law, climate change regulation has emerged as a focus of international environmental diplomacy and has gained increased attention in the wake of disturbing and abrupt climate change related impacts throughout the world that have profound implications for ocean and coastal regulation and marine resources. *Climate Change Impacts on Ocean and Coastal Law* effectively unites these two worlds. It raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents to resources in the oceans and coasts of the U.S. and the world. This comprehensive work assembles the insights of global experts from academia and major NGOs, e.g., Center for International Environmental Law, Ocean Conservancy, and Environmental Law Institute, to address regulatory challenges from the perspectives of U.S. law, foreign domestic law, and international law. *Climate Change Impacts on Ocean and Coastal Law* Randall S. Abate, 2015-01-28 *Climate Change Impacts on Ocean and Coastal Law* effectively unites the two worlds of climate change and ocean and coastal management. It raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents to resources in the oceans and coasts of the U.S. and the world. This comprehensive work assembles the insights of global experts from academia and major NGOs, e.g., Center for International Environmental Law, Ocean Conservancy, and Environmental Law Institute, to address regulatory challenges from the perspectives of U.S. law, foreign domestic law, and international law. **Sovereignty and Territorial Temptation** Christopher R. Rossi, 2017-04-27 This powerful book stands on its head the most venerated tradition in international law and discusses the challenges of scarcity, sovereignty, and territorial temptation. Newly emergent resources accessible through global climate change, discovery, or technological advancement highlight time-tested problems of sovereignty and challenge liberal internationalism's promise of beneficial or shared solutions. From the High Arctic to the hyper-arid reaches of the Atacama Desert, from the South China Sea to the history of the law of the sea, from doctrinal and scholarly treatments to institutional forms of global governance, the historically recurring problem of territorial temptation in the ageless age of scarcity calls into question the future of the global commons and illuminates the tendency among states to share resources but only when necessary. **Peaceful Maritime Engagement in East Asia and the Pacific Region**, 2022-12-28 *Peaceful Maritime Engagement in East Asia and the Pacific Region* includes contributions from the most influential figures in the law of the sea to provide context and direction for developing maritime governance in East Asia and the Pacific Ocean. Peaceful management of disputes includes cooperation over deep seabed mining negotiations for a legally

binding instrument on biodiversity beyond national jurisdiction contending approaches to baselines and East Asia maritime boundary disputes freedom of navigation and maritime law enforcement Chapters also explore new interpretations for preservation of the marine environment and the special problems posed by marine plastics and nexus between the ocean and climate change

Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities under UNCLOS Chuxiao Yu, 2022-10-17 The scope of marine scientific research has long been debated due to a lack of definition of the term in the United Nations Convention on the Law of the Sea UNCLOS The introduction of new forms and methods of ocean data collection adds another layer of legal uncertainty in this field Marine Scientific Research and the Regulation of Modern Ocean Data Collection Activities Under UNCLOS thus strives to identify the possible limits of the existing legal framework mainly the UNCLOS marine scientific research regime and the ways in which the identified gaps can be bridged In the analysis Chuxiao Yu carries out two case studies one on access to marine genetic resources and the other on operational oceanographic activities

The Law of Coastal Adaptation Linda Schumacher, 2020-07-16 This work investigates law as an instrument to deal with the challenges of sea level rise As the two countries chosen as examples differ significantly in their adaptation strategies and the corresponding legal regulations the author presents general ideas on how any legal framework facing similar challenges could be improved In particular flood risk assessments coastal defences and flood resistant design as well as spatial and land use planning are discussed including managed retreat Moreover conflicts as well as potential synergies of coastal adaptation and nature conservation are examined Due to the thorough analysis this book is not just an essential read for policymakers and researchers interested in the coastal area but climate change adaptation in general as many general findings are transferrable to other impacts

Climate Change Impacts on Fisheries and Aquaculture Bruce F. Phillips, Mónica Pérez-Ramírez, 2017-09-18 The first comprehensive review of the current and future effects of climate change on the world's fisheries and aquaculture operations The first book of its kind Climate Change Impacts on Fisheries and Aquaculture explores the impacts of climate change on global fisheries resources and on marine aquaculture It also offers expert suggestions on possible adaptations to reduce those impacts The world's climate is changing more rapidly than scientists had envisioned just a few years ago and the potential impact of climate change on world food production is quite alarming Nowhere is the sense of alarm more keenly felt than among those who study the warming of the world's oceans Evidence of the dire effects of climate change on fisheries and fish farming has now mounted to such an extent that the need for a book such as this has become urgent A landmark publication devoted exclusively to how climate change is affecting and is likely to affect commercially vital fisheries and aquaculture operations globally Climate Change Impacts on Fisheries and Aquaculture provides scientists and fishery managers with a summary of and reference point for information on the subject which has been gathered thus far Covers an array of critical topics and assesses reviews of climate change impacts on fisheries and aquaculture from many countries including Japan Mexico South

Africa Australia Chile US UK New Zealand Pacific Islands India and others Features chapters on the effects of climate change on pelagic species cod lobsters plankton macroalgae seagrasses and coral reefs Reviews the spread of diseases economic and social impacts marine aquaculture and adaptation in aquaculture under climate change Includes special reports on the Antarctic Ocean the Caribbean Sea the Arctic Ocean and the Mediterranean Sea Extensive references throughout the book make this volume both a comprehensive text for general study and a reference guide to further research for fisheries scientists fisheries managers aquaculture personnel climate change specialists aquatic invertebrate and vertebrate biologists physiologists marine biologists economists environmentalist biologists and planners

Causation in National and International Climate Change Litigation Meike Krakau, 2025-03-05 This book presents a comprehensive analysis of causation in climate change litigation across a range of regional national and international legal jurisdictions By doing so it offers clarity and potential solutions for legal professionals scholars and courts navigating the complex legal terrain of climate change litigation Constructing causal chains in climate litigation poses significant difficulties for the judicial system Factual challenges range from causal overdetermination to the vast spatial and temporal scale of climate related cause and effect relationships Normative obstacles are posed inter alia by the multitude of greenhouse gas emitters and the wide range of climate influencing practices Drawing on diverse understandings of causation from various legal perspectives as well as from other disciplines such as computer science metaphysics and philosophy this book provides a fundamental understanding of climatic causation in law Further it lays the groundwork and clarifies the requirements for the use and development of continuous causal chains in climate change litigation

Research Handbook on Climate Change Adaptation Policy E.C.H. Keskitalo, B.L. Preston, 2019 This topical and engaging Research Handbook illustrates the variety of research approaches in the field of climate change adaptation policy in order to provide a guide to its social and institutional complexity

Sustainable Ocean Resource Governance Markus Kotzur, Nele Matz-Lück, Alexander Proelss, Roda Verheyen, Joachim Sanden, 2018-01-03 In Sustainable Ocean Resource Governance an international group of eminent authors offer perspectives on the legal interface between sustainable economic growth effective marine resource management and urgent environmental protection of the sea by addressing three key issues deep sea mining marine energy generation and seabed pipeline and cable systems In light of the sectoral nature of current ocean governance and the existing patchwork of management arrangements for the oceans this book gives insights in search for a coherent and consistent sustainability approach
