Climate Politics And The Climate Movement In Australia:

Climate Politics and the Climate Movement in Australia Hans A Baer, Verity Burgmann, 2012-06-15 Climate change is the hottest topic of the twenty first century and the climate movement a significant global social movement This book examines the broad context of Australian climate politics and the place of the climate movement within it Acting from above are the most powerful forces corporations and governments both Labor and Coalition with the media framing the issues Climate movement actors in the middle include the Australian Greens major environmental and climate organisations public intellectuals think tanks academics and the union movement Acting from below are the numerous local climate action groups and various regional and national networks This lowest level is the primary location of the climate movement and grassroots mobilisation the source of its vitality Burgmann and Baer s study offers a vision for an alternative Australia based upon the principles of social equity and environmental sustainability

Climate Politics And The Climate Movement In Australia Verity Burgmann, Hans Baer, 2012-08-01 Climate change is the hottest topic of the twenty first century and the climate movement a significant global social movement This book examines the broad context of Australian climate politics and the place of the climate movement within it Acting from above are the most powerful forces corporations and governments both Labor and Coalition with the media framing the issues Climate movement actors in the middle include the Australian Greens major environmental and climate organisations think tanks academics public intellectuals and the union movement Acting from below are the numerous local climate action groups and various regional and national networks This lowest level is the primary location of the climate movement and grassroots mobilisation the source of its vitality To advocate a safe climate and climate justice the book ends by offering a vision for an alternative Australia based upon the principles of social equity and environmental sustainability

Climate Action Upsurge Stuart Rosewarne, James Goodman, Rebecca Pearse, 2013-11-20 In the late 2000s climate action became a defining feature of the international political agenda Evidence of global warming and accelerating greenhouse gas emissions created a new sense of urgency and despite consensus on the need for action the growing failure of international climate policy engendered new political space for social movements By 2007 a climate justice movement was surfacing and developing a strong critique of existing official climate policies and engaging in new forms of direct action to assert the need for reduced extraction and burning of fossil fuels Climate Action Upsurge offers an insight into this important period in climate movement politics drawing on the perspectives of activists who were directly engaged in the mobilisation process Through the interpretation of these perspectives the book illustrates important lessons for the climate movement today In developing its examination of the climate action upsurge the book focuses on individual activists involved in direct action Climate Camps in Australia while drawing comparisons and highlighting links with climate campaigns in other locales The book should be of interest to scholars and researchers in climate change environmental sociology politics policy and activism

Climate Change and Capitalism in Australia Hans A. Baer, 2021-09-30

Recognizing that climate politics has been an increasingly contentious and heated topic in Australia over the past two decades this book examines Australian capitalism as a driver of climate change and the nexus between the corporations and Coalition and Australian Labor parties As a highly developed country Australia is punching above its weight in terms of contributing to greenhouse gas emissions despite rising temperatures droughts water shortages and raging bushfires storm surges and flooding and the bleaching of the Great Barrier Reef Drawing upon both archival and ethnographic research Hans Baer examines Australian climate politics at the margins namely the Greens the labour union the environmental NGOs and the grass roots climate movement Adopting a climate justice perspective which calls for system change not climate change as opposed to the conventional approach of seeking to mitigate emissions through market mechanisms and techno fixes particularly renewable energy sources this book posits system challenging transitional steps to shift Australia toward an eco socialist vision in keeping with a burgeoning global socio ecological revolution Accessibly written and including an interview with renowned comedian and climate activist Rod Quantock OAM this book is essential reading for academics students and general readers with an interest in climate change and climate activism Routledge Handbook of the Climate Change Movement

Matthias Dietz, Heiko Garrelts, 2014-01-10 This handbook provides a comprehensive overview of the growing transnational climate movement A dual focus on climate politics and civil society provides a hitherto unavailable broad and systematic analysis of the current global movement highlighting how its dynamic and diverse character can play an important role in environmental politics and climate protection The range of contributors from well known academics to activist scholars look at climate movements in the developed and developing world north and south small and large central and marginal The movement is examined as a whole and as single actors thereby capturing its scope structure development activities and influence The book thoroughly addresses theoretical approaches from classic social movement theory to the influence of environmental justice frames and follows this with a systematic focus on regions specific NGOs and activists cases and strategies as well as relations with peripheral groups In its breadth balance and depth this accessible volume offers a fresh and important take on the question of social mobilization around climate change making it an essential text for advanced undergraduates postgraduate students and researchers in the social sciences **Climate Change and**

Anthropos Linda Connor, 2016-02-05 Anthropos in the sense of species as well as cultures and ethics locates humans as part of much larger orders of existence fundamental when thinking about climate change This book offers a new way of exploring the significance of locality and lives in the epoch of the Anthropocene a time when humans confront the limits of our control over nature Many scholars now write about the ethics policies and politics of climate change focussing on global processes and effects The book s innovative approach to cross cultural comparison and a regionally based study explores people s experiences of environmental change and the meaning of climate change for diverse human worlds in a changing biosphere The main study site is the Hunter Valley in southeast Australia an ecological region defined by the Hunter River catchment a

dwelling place for many generations of people and a key location for transnational corporations focussed on the mining burning and export of black coal Abundant fossil fuel reserves tie Hunter people and places to the Asia Pacific the engine room of global economic growth in the twenty first century and the largest user of the planet s natural resources The book analyses the nexus of place and perceptions political economy and social organisation in situations where environmental changes are radically transforming collective worlds Based on an anthropological approach informed by other ways of thinking about environment people relationships this book analyses the social and cultural dimensions of climate change holistically Each chapter links the large scales of species and planet with small places commodity chains local actions myths and values as well as the mingled strands of dystopian imaginings and strivings for recuperative renewal in an era of transition

The Routledge Handbook of Grassroots Climate Activism Sabine von Mering, Thomas E. Bell, Alexandre da Silva Faustino, Wendy Steele, Ann Ward, Mariana Arjona Soberón, 2024-12-19 The Routledge Handbook of Grassroots Climate Activism introduces contemporary forms of grassroots climate activism from around the world through the lenses of a variety of academic disciplines methodologies and perspectives Focusing on bottom up case studies it showcases innovative and creative approaches as well as the knowledge of those working towards swift decarbonisation just transitions and climate justice Grassroots climate activism presents a rich body of material to be studied not only by anthropologists sociologists geographers and political scientists but also by scholars in the humanities and the creative arts This timely handbook explores climate activism across six continents and it provides perspectives from climate activists themselves The authors interrogate a range of key questions what forms of mobilisation organisation and practice constitute grassroots climate activism and how have these changed over the last decade What are the boundaries of the climate movement and how does it interact with or differ from other social movements How do activists engage with the moral dimensions of the climate crisis How do grassroots engagements with climate struggles give shape to plural site specific but nonetheless interconnected forms of climate activism What tools do climate activists use to create functioning and effective local national and transnational networks How has climate activism been impacted by the Covid 19 pandemic What is the relationship between critical scholarship and climate activism What methodologies are particularly effective for studying climate activism and why This handbook aims to inspire others to devote more attention to grassroots climate activism It brings together established and up and coming scholars scholar activists and practitioners who present novel cutting edge research and new findings exploring current developments in different parts of the world This book will be of particular interest to students and scholars of climate activism climate solutions climate and society human environmental crises grassroots activism and social movements It will also be of interest to practitioners involved in climate action and to all those who are ready to launch their own grassroots initiatives or support one of the many already underway

Politics and Resistance of Coal in Australia and India Ruchira Talukdar, 2025-01-31 Since 2009 international climate activism has focused on stopping coalmining in

solidarity with local and Indigenous struggles that are resisting coalmining Based on ethnographic and historic research in Australia and India this book compares the politics and resistance to coal in the two countries particularly focusing on the time period between 2009 and 2018 and the case of the Carmichael coalmine in Queensland and the Mahan coalmine in central India This book shows differences and similarities in the political economy of coal and creates understanding about the significantly different imperatives and narratives of anti coal environmentalism in Australia and India Through the Stop Adani movement and its collaboration with the Wangan and Jagalingou Traditional Owners and farmers against coalmining in Queensland and Greenpeace and forest based communities resisting coalmining in Madhya Pradesh Ruchira Talukdar not only explores anti coal movement dynamics but also how these movements grapple with the violation of Indigenous land rights through coal extraction in both places Drawing on differences and patterns in Australian and Indian anti coal activisms this book proposes a global outlook an intersectional framework beyond the singularity of stopping coal that can encapsulate visions for secure futures of communities on the frontlines of fossil fuel struggles for climate activism The conclusions help to decolonize climate activism as well as make it cognizant of global North South contextual differences for effective solidarity The author s unique vantage point through experience in environmental activism over 20 years across Australia and India combined with research in both countries makes this book a crucial resource for scholars and practitioners in just transition climate politics and environmental activism across the global North and South

Grappling with Societies and Institutions in an Era of Socio-Ecological Crisis Hans A. Baer,2020-12-10 **Grappling with Societies and Institutions in an Era of Socio Ecological Crisis** is an autobiographical ethnography of the journey through various societies and institutions and how they function in the midst of an era of socio ecological crises The volume traces the steps of the author in becoming a radical anthropologist namely through the experience of immigration and naturalization from Peru to the United States and then to Australia politicization while working as an engineer in the aircraft industry during the late 1960s socialization in and subsequent exit from Roman Catholicism and experiences as an academic working in the corporate university As well the author illuminates the practices of research and engagement as a scholar activist on various topics such as the Levites of Utah and African American Spiritual churches socio political and religious life in East Germany complementary and alternative medicine the Australian climate movement and democratic eco socialism

The Anthropology of Climate Change Hans Baer,Merrill Singer,2014-04-24 In addressing the urgent questions raised by climate change this book provides a comprehensive overview of the anthropology of climate change guided by a critical political ecological framework It argues that anthropologists must significantly expand their focus on climate change and their contributions to responding to climate change as a grave risk to humanity The book presents a human socioecological framework for conceptualizing climate change It examines the emergence and slow maturation of the anthropology of climate change reviews the historic foundations for this work in the archaeology of climate change and presents three alternative contemporary theoretical

perspectives in the anthropology of climate change The book synthesizes anthropological work and perspectives on climate change in the form of case studies in various regions of the world revealing the nature of global climate change as constituting multiple and somewhat diverse changes in local settings It explores the applied anthropology of climate change in terms of the ways anthropologists are contributing to climate policy working with communities on climate change issues as well as within the climate movement both internationally and nationally Finally it provides an overview of what other the social sciences are saying about climate change and explores ways that the anthropology of climate change can interface with sociology political science and human geography in order to create an integrated social science of climate change This book gives researchers and students in Environmental Anthropology Climate Change Human Geography and Sociology a novel framework for understanding climate change that emphasizes human socioecological interactions
