Traian Stoianovich

Climates Of Hunger Mankind And The Worlds Changing Weather:

Climates of Hunger Reid A. Bryson, 1977-06-01 In recent years world climate changes have drawn more attention than at any other time in history What we once called crazy weather just a few years ago is now beginning to be seen as a part of a logical and in part predictable pattern an awesome natural force that we must deal with if man is to avoid disaster of unprecedented proportions *Climates of Hunger* is a book of paramount importance for our time It will be essential reading not only for professionals in the field including agricultural meteorologists political scientists geographers sociologists and business counselors but for all who are concerned in any way with environmental trends world and domestic food supplies and their effects on human institutions *Balkan Worlds: The First and Last Europe* Traian Stoianovich, 2015-05-20

Encompassing the period from the Neolithic era to the troubled present this book studies the peoples societies and cultures of the area situated between the Adriatic Sea in the west and the Black Sea in the east between the Alpine region and Danube basin in the north and the Aegean Sea in the south This is not a conventional history of the Balkans Drawing upon archaeology anthropology economics psychology and linguistics as well as history the author has attempted a total history that integrates as many as possible of the avenues and categories of the Balkan experience *Coba* William J.

Folan, 2014-06-28 *Coba* *Constructing the World Polity* John Gerard Ruggie, 2002-09-11 Ruggie is one of the most important and influential International Relations theorists of the last twenty years Brings together in one volume Ruggie s most influential theoretical ideas Includes extensive introduction and material covered by essays is contextualised throughout the book Controversial includes an extended critique of mainstream theorizing *Existential Threats* Lisa Vox, 2017-05-12 Americans have long been enthralled by visions of the apocalypse Will the world end through nuclear war environmental degradation and declining biodiversity Or perhaps through the second coming of Christ rapture of the faithful and arrival of the Antichrist a set of beliefs known as dispensationalist premillennialism These seemingly competing apocalyptic fantasies are not as dissimilar as we might think In fact Lisa Vox argues although these secular and religious visions of the end of the world developed independently they have converged to create the landscape of our current apocalyptic imagination In *Existential Threats* Vox assembles a wide range of media science fiction movies biblical tractates rapture fiction to develop a critical history of the apocalyptic imagination from the late 1800s to the present Apocalypticism was once solely a religious ideology Vox contends which has secularized in response to increasing technological and political threats to American safety Vox reads texts ranging from Christianity Today articles on ecology and the atomic bomb to Dr Strangelove and from Mary Shelley s *The Last Man* to the *Left Behind* series by Tim LaHaye and Jerry B Jenkins demonstrating along the way that conservative evangelicals have not been as resistant to science as popularly believed and that scientists and science writers have unwittingly reproduced evangelical eschatological themes and scenarios in their own works *Existential Threats* argues that American apocalypticism reflects and propagates our ongoing debates over the

authority of science the place of religion uses of technology and America s evolving role in global politics **Modern World Development** Michael Chisholm,2020-05-06 Since the time of Adam Smith there has been a voluminous literature concerned with the differing wealth of nations and the variation in the nature of economic growth and several schools of thought have held precedence at different times The fundamental mechanisms have been regarded by some as capital accumulation and investment and by others as entrepreneurial ability Modern World Development first published in 1982 shows that the length of time under consideration materially affects the relative significance assigned to the factors involved similarly the size of an area cannot be ignored Through an examination of the major theories of economic growth the role of natural resources the core periphery model of world development environmental change and the concept of human capital Professor Chisholm has written a stimulating and important book which will appeal to students of economics history and geography **Bulletin of the Atomic Scientists** ,1973-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Revista mexicana de estudios antropológicos** ,1983
 University Press Books for Public Libraries ,1979 **Investigaciones recientes en el área maya** Sociedad Mexicana de Antropología. Mesa Redonda,1984
