Clinical Diagnostic Ultrasound:

Clinical Diagnostic Ultrasound E. Barnett, Patricia Morley, 1985 *Diagnostic Ultrasound* Stephen W. Smith, 1976

Practical Point-of-Care Medical Ultrasound James M. Daniels, Richard A. Hoppmann, 2015-11-02 This book serves as a comprehensive guide for integrating point of care ultrasound into clinical care. It includes detailed chapters on the use of ultrasound in cardiology, dermatology, obstetrics and gynecology and pediatrics as well as for the assessment of the abdomen, musculoskeletal system, eyes and thorax. Over the last decade, the use of diagnostic point of care ultrasound at the bedside has been widely adopted by healthcare professionals in the United States. This technology has spread into many new areas of clinical medicine and more non-radiologists are seeking training and an up-to-date resource on use of the ultrasound machine. This book provides guidance on how to best approach patients with particular problems, practical guidelines on how to operate the machine and choose probes, descriptions and illustrations that depict the patient's position and structures that are scanned and the anatomy and pathophysiology of each area. Practical Point of Care Medical Ultrasound is a valuable addition to the library of any resident fellow physician or other healthcare provider who uses ultrasound in a clinical setting.

Training in Diagnostic Ultrasound World Health Organization, 1998 This report defines the essential training and skills necessary for the effective employment of diagnostic ultrasound in different health care settings. It reviews the present situation in ultrasonography and the trends in the utilization of diagnostic ultrasound in clinical practice. The report also examines worldwide practice with respect to ultrasonography training for physicians, sonographers and other categories of medical professionals such as midwives, nurses and assistant physicians. It presents outlines of recommended training curricula for physicians in general, advanced and specialized ultrasonography and discusses various other factors that must be taken into account in organizing the training process. The report describes the recommended training for allied health professionals specializing in ultrasonography and presents the basic science and instrumentation aspects of the curricula. It then discusses the level of competence that should be reached by those trained in the use of diagnostic ultrasound as well as the recommended standards for training programs including the requirements for instructors and training centers. Recommendations for the implementation of training programs are included. An appendix outlines the applications of diagnostic ultrasound. Contains 36 references.
