Cancel The Apocalypse The New Path To Prosperity:

Cancel the Apocalypse Andrew Simms, 2013 In fascinating and iconoclastic detail on everything from the cash in your pocket to the food on your plate and the shape of our working lives *Cancel The Apocalypse* describes how the relentless race for economic growth is not always one worth winning how excessive materialism has come at a terrible cost to our environment and hasn't even made us any happier in the process Simms believes passionately in the human capacity for change and shows how the good life remains in our grasp

Generation Impact Adam Richards, Jeremy Nicholls, 2021-01-08 *Generation Impact* fills a significant gap in the impact accounting literature about how ambitions pressures and misgivings can be addressed dealt with and harnessed into forward looking programmes for the creation measurement and management in social accounting

Human Geography Mark Boyle, 2021-03-29 Revised Extended and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography As with the First Edition Boyle follows the premise that history makes geography whilst geography makes history and that the key to studying the principal demographic social political economic cultural and environmental processes in any region in the world today is to look at how that region has been impacted by and in turn has impacted the story of the rise reign and decline of the West Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical political and institutional project Informed by recent developments in post colonial scholarship the book covers key concepts seminal thinkers and influential texts in the field Although designed for the beginner student Boyle does not shy away from ideas and debates often avoided in introductory texts clearly communicating theory without condescension In addition he places human geography in its larger academic context discussing the influences on the field from related subjects Notable features in the Second Edition include Extensive revision and updating of coverage of key ideas developments debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid 19s geographies New learning resources figures tables plates maps Deep Dive boxes etc throughout the text plus learning objectives essay questions checklists summarizing key ideas and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter by chapter lectures and PowerPoint slides for each chapter new multiple choice exam paper and additional essay style exam questions and a wide range of student tutorial exercises *Human Geography An Essential Introduction* Second Edition is an excellent foundational text for undergraduate courses in human geography globalization Western civilization historiographies of intellectual thought the grand public problems confronting humanity in the twenty first century and other wider social science courses

Picturing the Apocalypse Natasha O'Hear, Anthony

O'Hear,2015-06-25 The book of Revelation has been a source of continual fascination for nearly two thousand years Concepts such as The Lamb of God the Four Horsemen the Seventh Seal the Beasts and Antichrist the Whore of Babylon Armageddon the Millennium the Last Judgement the New Jerusalem and the ubiquitous Angel of the Apocalypse have captured the popular imagination One can hardly open a newspaper or click on a news web site without reading about impending financial or climate change Armageddon while the concept of the Four Horsemen pervades popular music gaming and satire Yet few people know much about either the basic meaning or original context of these concepts or the multiplicity of different ways in which they have been interpreted by visual artists in particular The visual history of this most widely illustrated of all the biblical books deserves greater attention This book fills these gaps in a striking and original way by means of ten concise thematic chapters which explain the origins of these concepts from the book of Revelation in an accessible way These explanations are augmented and developed via a carefully selected sample of the ways in which the concepts have been treated by artists through the centuries The 120 visual examples are drawn from a wide range of time periods and media including the ninth century Trier Apocalypse thirteenth century Anglo Norman Apocalypse Manuscripts such as the Lambeth and Trinity Apocalypses the fourteenth century Angers Apocalypse Tapestry fifteenth century Apocalypse altarpieces by Van Eyck and Memling D rer and Cranach s sixteenth century Apocalypse woodcuts and more recently a range of works by William Blake J M W Turner Max Beckmann as well as film posters and stills cartoons and children s book illustrations The final chapter demonstrates the continuing resonance of all the themes in contemporary religious political and popular thinking while throughout the book a contrast will be drawn between those readers of Revelation who have seen it in terms of earthly revolutions in the here and now and those who have adopted a more spiritual otherworldly approach

Transitioning to a Post-Carbon Society Ernest Garcia, Mercedes Martinez-Iglesias, Peadar Kirby, 2016-12-27 This book deals with one of the most pressing social and environmental issues that we face today The transition to a post carbon society in which the consumption of fossil fuels decreases over time has become an inevitability due to the need to prevent catastrophic climate change the increasing cost and scarcity of energy and complex combinations of both of these factors As the authors point out this will not only entail political adjustments and the replacement of some technologies by others but will be accompanied by social and cultural changes that bring about substantial modifications in our societies and ways of life This book examines whether the current conditions which date back to the crisis that began in 2007 favour a benign and smooth transition or will make it more difficult and prone to conflict It argues that even if this transformation is unavoidable the directions it will take and the resulting social forms are much less certain There will be many post carbon societies the authors conclude and any number of routes to social change *Transitioning to a Post Carbon Society* therefore represents a significant contribution to global debates on the environment and is vital reading for academics policymakers business leaders NGOs and the general public alike

What if Money Grew on Trees? David Boyle, 2013-10-14 Asking the big

questions about economics What if are the two words that sow the seeds for human speculation experimentation invention evolution revolution and change In an uncertain age economists are asking What if growth stopped growing scientists What if light speed were overtaken and politicians What if the third world became the first What If Money Grew On Trees challenges a team of scholars to put their minds to 50 speculations on economics at a time when the banking system seems to be failing and the whole idea of capitalism is up for debate Consider a world where gold is worthless nobody makes anything and the bulls and bears are locked out of the market and en route accumulate the knowledge to debate the shape that our financial world might take in the future The Cultural Politics of Austerity R. Bramall,2013-10-31 This timely book examines

austerity's conflicted meanings from austerity chic and anti austerity protest to economic and eco austerity Bramall's compelling text explores the presence and persuasiveness of the past developing a new approach to the historical in contemporary cultural politics **Achieving Environmental Justice** Karen Bell,2014-04-28 Environmental justice aspires to a healthy environment for all as well as fair and inclusive processes of environmental decision making In order to develop successful strategies to achieve this it is important to understand the factors that shape environmental justice outcomes This optimistic accessible and wide ranging book contributes to this understanding by assessing the extent of and reasons for environmental justice injustice in seven diverse countries United States Republic of Korea South Korea United Kingdom Sweden China Bolivia and Cuba Factors discussed include race and class discrimination citizen power industrialisation processes political economic context and the influence of dominant environmental discourses In particular the role of capitalism is critically explored Based on over a hundred interviews with politicians experts activists and citizens of these countries this is a compelling analysis aimed at all academics policy makers and campaigners who are engaged in thinking or action to address the most urgent environmental and social issues of our time *Addicted to Growth* Robert Costanza,2022-12-29 This book takes a compelling approach to describing what is needed to create the kind of future that most people on Earth really want Our global society is hopelessly addicted to a particular vision of the world and a future that has become both unsustainable and undesirable Addicted to Growth frames our current predicament as a societal addiction to a growth at all costs economic paradigm While economic growth has produced many benefits its side effects are now producing existential problems that are rapidly getting worse Robert Costanza considers lessons from what works at the individual level to overcome addictions and applies them to a societal scale Costanza recognises that the first step to recovery is recognising the addiction and that it is leading to disaster however simply pointing out the dire consequences of our societal addiction is only the first step and can be counterproductive by itself in motivating change The key next step is creating a truly shared vision of the kind of world we all want and the book explores creative ways to implement this societal therapy The final step is using that shared vision to motivate the changes needed to achieve it including adaptive transformations of our economic systems property rights regimes and governance institutions An exciting contribution from a

key thinker in the field this book will be a valuable resource to students and scholars of public policy and sustainability studies and anyone interested in understanding and overcoming our societal addiction to growth We Are More Than This
