The Complete Natural Medicine Guide to the 50 Most Common Medicinal Herbs Heather Boon, Michael Smith, 2004 The most current scientific information from the world's leading medical journals. Although there is growing consumer awareness of alternative and complementary medicine, there is a lack of comprehensive information available on herbal products. While pharmacists, physicians and other health care professionals sometimes offer advice, their patients want more information. The Complete Natural Medicine Guide to the 50 Most Common Medicinal Herbs is a comprehensive, fully illustrated reference to the 50 most commonly prescribed herbs. A complete description of each herb is featured along with its other common names, possible adverse effects, therapeutic uses for treating illness and disease, as well as potential drug interactions. Some of the herbs included are Aloe Vera, Evening Primrose, Goldenseal, Scullcap, Burdock, Turmeric, Tea Tree Oil, Meadowsweet. This guide is written by professional pharmacists and a naturopathic doctor using the most current research and clinical testing. The authors' easy-to-understand text combined with the latest findings and clear directions for safe dosages makes this practical reference on medicinal herbs a primary resource of data. *Cancer's Cause, Cancer's Cure: The Truth About Cancer, Its Causes, Cures, and Prevention* Morton Walker, D.P.M., 2013-09-17 Cancer is an illness we all dread simply because it is very difficult to cure. Massive amounts of money have been spent not only trying to find a cure but to help potential victims prevent the disease from occurring in the first place. Following on the heels of the discovery of DNA's double helix, Dr. Mirko Beljanski, a microbiologist at the Pasteur Institute, discovered some fundamental truths about cancerous DNA and how carcinogens act on DNA. In the course of his discoveries, he also discovered highly powerful and scientifically proven botanical agents that kill cancer cells. Beljanski found that his botanicals were selective: they only harmed the cancerous cells but didn't harm healthy cells. In the process, Dr. Beljanski was vilified by the French government but he continued on with his research and found that when his botanical agents are coupled with traditional chemo and radiation cancer therapies, each becomes more effective, thus finding a highly viable integrative cancer solution. Current

studies on Dr Beljanski's products have been conducted through the Cancer Treatment Centers of America and the Center for Holistic Urology at Columbia University. There is more research that needs to be done to confirm Dr Mirko Beljanski's major breakthroughs in cancer treatments. There is a way to make this most feared of diseases manageable. The war on cancer is winnable but only if we all band together and demand that the research be done so that anyone who ever hears the dreaded words you have cancer doesn't feel like they've been handed a death sentence. **Subject Guide to Books in**
