Cancer Research Frontier Volume 13 Chinese Edition:

Drug Metabolism and Transport: The Frontier of Personalized Medicine, volume II Junmin Zhang, Junmei

Wang, Rong Wang, 2025-10-31 This Research Topic is part of a series with <https://www.frontiersin.org/research-topics/44712> drug metabolism and transport the frontier of personalized medicine There are many unique challenges in personalizing drug therapy Research on pharmacokinetics and pharmacodynamics of drugs is beneficial to ensure the safety and efficacy of clinical medication There have been many advances in technology and drug model metrology in drug metabolism and transport studies but our understanding of the factors that influence drug disposition and efficacy still needs to be refined The purpose of this special issue is to report on factors influencing the pharmacokinetics of drugs such as drug dosage forms drug drug interactions metabolic enzymes transporters pharmacogenetic polymorphisms pharmacomicrobiome and specific environments etc It aims to standardize personalized medicine and promote clinical rational drug use This Research Topic will include but is not limited to reporting Effects of dosage form dose and route of administration on pharmacokinetics Pharmacokinetic alterations and mechanisms mediated by drug drug interactions Mechanism of drug metabolizing enzyme alterations mediated by external factors such as high altitude hypoxia Mechanism of drug transporter changes or gut microbiota mediated by external factors such as high altitude hypoxia or antibiotic Effects of gene polymorphisms of drug metabolizing enzymes on drug action Research methods of intestinal drug transporters Effect of intestinal flora on drug metabolism Discovery of specific probes for drug metabolizing enzymes Implications of drug interactions mediated by transporters or metabolizing enzymes for precision medicine

Precision Medical Imaging for Cancer Diagnosis and Treatment - Vol. II Alla Reznik, Mitchell Albert, Laura Curiel, 2025-06-02 Given the success of the Research Topic Precision Medical Imaging for Cancer Diagnosis and Treatment we are pleased to launch a second volume The ability to detect and diagnose medical conditions accurately and at the earliest stage of disease is often critical for effective treatment and recovery In this regard continued developments of medical imaging systems have vastly improved our ability to visualize body tissues and processes enabling more accurate detection of medical conditions However recent trends for personalized or precision medicine i.e. delivering the right treatment to the right patient at the right time imposes new requirements for imaging modalities and calls for new approaches to provide the highest efficacy in diagnostic and predictive capabilities The main goal of this Research Topic is to improve and expand readers knowledge of novel medical imaging techniques and trends that have a direct impact on the advancement of precision medicine in cancer diagnosis and treatment and incorporating it in clinical reality This Research Topic highlights the latest advances in medical imaging for cancer diagnosis including those that open up new possibilities in the field of precision medicine The implementation of precision medicine requires a shift towards organ targeted high resolution high sensitivity imaging methods that provide disease specific information at the diagnostic stage Precision imaging is also intertwined with the development of new indicators that not

only visualize disease but also pinpoint its specific type greatly improving adherence to treatment plans and ultimately saving lives

Sarwar,Dalia Streimikiene,Rida Waheed ,Abdul Rauf,2025-10-10 Sustainable economic growth is important due to its

implications for the ecosystem natural resources and human development Public health is also a key factor in developing a

sustainable economy and it is a national asset because of its impact on labor supply and productivity Health conditions

depend on various factors such as environmental hazards availability of public facilities economic conditions pandemics etc

Green energy has an association with health as it guarantees a clean environment Such measures are necessary to improve

the public s mental and physical health leading to sustainable economic growth Hence green energy governance and health

are the potential avenues to enhance public health promoting sustainable economic growth Good health guarantees higher

economic growth as when more people are healthy and suitable to work the labor supply will increase and the economy

grows Likewise when health improvements are made the productivity of people improves because healthy people prove to be

more active both physically and mentally When overall productivity improves the economy would also benefit However some

factors affect public health including environmental degradation process Green energy helps to improve overall health by the

reduction in emission of dangerous gasses Preservation of balance in terms of atmospheric gasses becomes possible through green energy and a clean environment resulting in fewer diseases and deaths making the economy grow by providing healthier people with higher productivity Previous studies tried to investigate the channel through which public health can affect economic growth and added environmental pollution as a health problem However the literature sheds light on the importance of a clean environment for the economy by checking its impact on public health Although there is a lack of investigation into how governance and green energy can influence public health which lead to increase the economic growth calling scholars to add this beneficial factor in future research This Research Topic focuses on sustainable economic growth through public health and green energy to add valuable information to the current knowledge in green energy environment public health as well as sustainable economic growth The main focus of research for this topic is emerging economies as these are the most vulnerable in terms of health and energy issues and economic growth sustainability It is assumed that the use of nonrenewable energy has a high environmental impact on health Hence there should be some practical solution to improve health without interrupting the energy supply As a result scholars must hypothesize and test new solutions and this Research Topic is an attempt to do so Topics covered by us would be governance green energy environment and sustainable economic growth This Research Topic provides an avenue for discussion as well as practical research on areas related to green energy public health sustainable environment sustainable economic growth and energy related issues of developed and developing economies
