The Negotiated Reformation, **The Negotiated Reformation** Christopher W. Close, 2009-09-30 Utilizing evidence from numerous imperial cities this book offers an explanation for the spread and survival of urban reform during the sixteenth century By analyzing the operation of regional political constellations it reveals a common process of negotiation that shaped the Reformation in the Holy Roman Empire It reevaluates traditional models of reform that leave unexplored the religious implications of flexible systems of communication and support among cities Such networks influenced urban reform in fundamental ways affecting how Protestant preachers moved from city to city as well as what versions of the Reformation city councils introduced This fusion of religion and politics meant that with local variations negotiation within a regional framework sat at the heart of urban reform The Negotiated Reformation therefore explains not only how the Reformation spread to almost every imperial city in southern Germany but also how it survived imperial attempts to repress religious reform

Lord of the Sacred City: The Episcopus exclusus in Late Medieval and Early Modern Germany Jeff J. Tyler, 2021-10-11 Urban histories have emphasized the rise of civic autonomy and proto democracy Based on chronicle and archival sources this volume focuses on German bishops former lords of the city and fierce opponents of civic freedom The author investigates how bishops contested exclusion from political economic and religious dimensions of civic life Episcopus exclusus which culminated in the Protestant Reformation Four chapters are devoted to episcopal expulsion throughout Germany and the cities of Constance and Augsburg in particular A remarkable section explores the puzzle of the bishop's civic survival in the later Middle Ages made possible through episcopal ritual The emphasis on city bishop and ritual will be of special interest to urban historians as well as to scholars of medieval religion the reformation church history church state relations and social history

From Priest's Whore to Pastor's Wife Marjorie Elizabeth Plummer, 2016-04-22 On 13 June 1525 Martin Luther married Katharina von Bora a former nun in a private ceremony

officiated by city preacher Johann Bugenhagen Whilst Luther was not the first former monk or Reformer to marry his marriage immediately became one of the iconic episodes of the Protestant Reformation From that point on the marital status of clergy would be a pivotal dividing line between the Catholic and Protestant churches Tackling the early stages of this divide this book provides a fresh assessment of clerical marriage in the first half of the sixteenth century when the debates were undecided and the intellectual and institutional situation remained fluid and changeable It investigates the way that clerical marriage was received and viewed in the dioceses of Mainz and Magdeburg under Archbishop Albrecht of Brandenburg from 1513 to 1545 By concentrating on a cross section of rural and urban settings from three key regions within this territory Saxony Franconia and Swabia the study is able to present a broad comparison of reactions to this contentious issue Although the marital status of the clergy remains perhaps the most identifiable difference between Protestant and Roman Catholic churches remarkably little research has been done on how the shift from a celibate to a married clergy took place during the Reformation in Germany or what reactions such a move elicited As such this book will be welcomed by all those wishing to gain greater insight not only into the theological debates but also into the interactions between social identity governance and religious practice

The Impact of the European Reformation Bridget Heal, Ole Peter Grell, 2008 Recent decades have witnessed the fragmentation of Reformation studies High level research has tended to be confined within specific geographical confessional or chronological boundaries By bringing together scholars working on a wide variety of topics this volume aims to counteract this centrifugal trend and to provide a broad perspective on the impact of the European reformation The essays present new research from historians of politics of the church and of belief Their geographical scope ranges from Scotland and England via France and Germany to Transylvania and their chronological span from the 1520s to the 1690s Together they demonstrate that movements for religious reform left no sphere of European life untouched
