Rees, 2019-07-25 Avant garde film is almost indefinable It is in a constant state of change and redefinition In his highly acclaimed history of experimental film A L Rees tracks the movement of the film avant garde between the cinema and modern art with its postmodern coda But he also reconstitutes the film avant garde as an independent form of art practice with its own internal logic and aesthetic discourse In this revised and updated edition Rees introduces experimental film and video to new readers interested in the wider cinema as well as offering a guide to enthusiasts of avant garde film and new media arts Ranging from C zanne and Dada via Cocteau Brakhage and Le Grice to the new wave of British film and video artists from the 1990s to the present day this expansive study situates avant garde film between the cinema and the gallery with many links to sonic as well as visual arts The new edition includes a review of current scholarship in avant garde film history and includes updated reading and viewing lists It also features a new introduction and concluding chapter which assess the rise of video projection in the gallery since the millennium and describe new work by the latest generation of experimental film makers The new edition is richly illustrated with images of the art works discussed The Uses of Photography Jill Dawsey, Pamela M. Lee, Benjamin Young, Judith Rodenbeck, David Antin, 2016-09-21 The Uses of Photography examines a network of artists who were active in Southern California between the late 1960s and early 1980s and whose experiments with photography opened the medium to a profusion of new strategies and subjects These artists introduced urgent social issues and themes of everyday life into the seemingly neutral territory of conceptual art through photographic works that took on hybrid forms from books and postcards to video and text and image installations Tracing a crucial history of photoconceptual practice The Uses of Photography focuses on an artistic community that formed in and around the young University of California San Diego founded in 1960 and its visual arts department founded in 1967 Artists such as Eleanor Antin Allan Kaprow Fred Lonidier Martha Rosler Allan Sekula and Carrie Mae Weems employed photography and its expanded forms as a means to dismantle modernist autonomy to contest notions of photographic truth and to engage in political critique The work of these artists shaped emergent accounts of postmodernism in the visual arts and their influence is felt throughout the global contemporary art world today Contributors include David Antin Pamela M Lee Judith Rodenbeck and Benjamin J Young Published in association with the Museum of Contemporary Art San Diego Exhibition dates Museum of Contemporary Art San Diego September 24 2016 January 2 2017 *Encyclopedia of Twentieth-Century Photography, 3-Volume Set* Lynne Warren, 2005-11-15 The Encyclopedia of Twentieth Century Photography explores the vast international scope of twentieth

Video Art Historicized Malin Hedlin Hayden, 2016-03-03 Video art emerged as an art form that from the 1960s and onwards challenged the concept of art hence art historical practices From the perspective of artists critics and scholars engaged with this new medium art was seen as too limiting a notion Important issues were to re think art as a means for critical investigations and a demand for visual reconsiderations Likewise art history was argued to be in crisis and in need of adapting its theories and methods in order to produce interpretations and thereby establish historical sense for moving images as fine art Yet as this book argues video art history has evolved into a discourse clinging to traditional concepts ideologies and narrative structures manifested in an increasing body of texts Video Art Historicized provides a novel insightful and also challenging re interpretation of this field by examining the discourse and its own premises It takes a firm conceptual approach to the material examining the conceptual theoretical and methodological implications that are simultaneously contested by both artists and authors yet intertwined in both the legitimizing and the historicizing processes of video as art By engaging art history s most debated concepts canon art and history this study provides an in depth investigation of the mechanisms of the historiography of video art Scrutinizing various narratives on video art the book emphasizes the profound and widespread hesitations towards but also the efforts to negotiate traditional concepts and practices By focusing on the politics of this discourse theoretical issues of gender nationality and particular themes in video art Malin Hedlin Hayden contests the presumptions that inform video art and its history David Lamelas María José

Herrera, Kristina Newhouse, 2017-09-16 Published by the University Art Museum California State University Long Beach in association with Getty Publications The renowned Argentine conceptual artist David Lamelas born 1946 has an expansive oeuvre of sensory restive and evocative work This book published to coincide with the first monographic exhibition of the artist s work in the United States offers an incisive look into Lamelas s art The guiding analytic theme is the artist s adaptability to place and circumstance which invariably influences his creative production Lamelas left Argentina in the mid 1960s to study at Saint Martin s in London Since then he has divided his time among various cities While the typical narrative invoked about artists like Lamelas is one of internationalism his nomadic movement from one place or conceptual framework to the next has always been more postnational than international
