Health Equity in Hospital Medicine Sujatha Sankaran, 2023-11-16 Hospital based physicians are privy to some of the most meaningful moments of people s lives including life changing diagnoses pivotal medical procedures complex medical decisions and critical end of life decisions Yet hospitalists have no framework for how to incorporate the varied social factors that impact care such as race gender identity cultural background immigration status sexual orientation primary language housing status and poverty into clinical decision making As hospital physicians we may use interpreters for our limited

English proficiency patients or try to incorporate questions about cultural practices into our admission histories or even ask our patients about the ways in which they feel racism has affected their care but these practices are inconsistently applied and lack a systematic framework for ensuring that the hospital care we provide is truly equitable In my own practice as a hospital based physician I can recall scores of hospitalized patients where we tried hard to provide equitable care but fell short I remember the Spanish speaking patient with multiple comorbidities who received neurosurgery and was on the road to recovery on an acute care unit when on day three he complained of vague abdominal discomfort and ended up dying of a perforated bowel No interpreter was used by the team to fully delve into the details of the pain he was experiencing I remember the young Black patient with terminal malignancy who had multiple repeated conversations with physicians recommending hospice care but refused until he saw a physician who was able to explain hospice within the context of racism that has historically defined clinical care for Black people and was able to present hospice not as a way to hasten death but rather as a way to live the remainder of his days in comfort I remember the elderly Pakistani female patient whose demanding son antagonized staff and clinicians alike until he was banned from visiting because of his aggressiveness with staff and whose inability to visit his mother caused her extreme distress as she felt that she had lost the unique voice that only her oldest son could provide Imagine if the hospital physicians in these cases had a resource to help them provide care that is culturally humble that goes beyond just speaking in the patient's first language but that also includes active listening and truly takes into consideration the life experiences and culture that have made this patient who they are This is what this book will provide for hospital medicine physicians a framework to help hospital physicians deeply incorporate social factors into the care they provide

Medicine Morning Report - E-Book Raj Dasgupta, Sophia Li, Darren W. Wong, Hui Yi Shan, 2022-05-07 Medicine Morning Report Subspecialties Beyond the Pearls is a case based reference that covers the key material included on USMLE and shelf exams Focusing on the practical information you need to know it teaches how to analyze a clinical vignette in the style of a morning report conference sharpening your clinical decision making skills and helping you formulate an evidence based approach to realistic patient scenarios This subspecialties volume expands on Dr Dasgupta's popular Medicine Morning Report with more comprehensive coverage of internal medicine topics that you will encounter in clerkship and on exams Each case has been carefully chosen and covers scenarios and questions frequently encountered on board exams shelf exams and clinical practice integrating both basic science and clinical pearls Beyond the Pearls tips and secrets all evidence based with references provide deep coverage of core material Morning Report Grand Rounds format begins with the chief complaints to the labs relevant images and includes a pearl at the end of the case Questions are placed throughout the case to mimic practical decision making both in the hospital and on the board exam Written and edited by experienced teachers and clinicians each case has been reviewed by board certified attending practicing physicians

Beyond Evidence-Based Medicine Ralph Junckerstorff, Sharmayne Brady, Ar Kar Aung, 2023-12-07

This textbook assembles the wealth of clinical experiences across multiple medical specialties and offers clinical pearls that will result in better patient care and are highly relevant to daily practice. This book has been compiled by many renowned clinicians, medical educators, and researchers who are experts in their respective disciplines across Australia, New Zealand, and the United States. The chapters provide multiple cases in vignette format illustrating the clinical pearls and finish with a discussion and practical tips. This format will allow the reader to easily understand how the clinical pearls can be applied in clinical practice. Evidence-based medicine and clinical guidelines help us choose the best management and treatment options for our patients. However, many questions in medicine have not been researched or are not readily amenable to research. In fact, there is more to the art and mastery of practicing clinical medicine than the evidence-based approach. Information gained over years of reflective clinical practice and cumulative wisdom adds value to evidence-based clinical medicine. With experience and clinical gestalt playing an equal if not a more prominent role than what evidence can offer in a physician's approach to solving clinical problems, this book offers unique perspectives on the practice of medicine. Beyond Evidence-Based Medicine Clinical Pearls from Experienced Physicians will be valuable for later-year medical students, medical educators, doctors in training, and consultant physicians alike. Aiming to improve the day-to-day medical practices of professionals, the Editors have invited experienced physicians to share their expertise culminating in a unique book with broad applicability and appeal.

The Art of Paediatric Medicine Beyond the Evidence Base Catherine F Lynch, Sarah Arachchi, Sharmayne Brady, Ar Kar Aung, Ralph Junckerstorff, 2025-09-24. This book assembles the acquired wisdom of experienced paediatricians and other clinicians involved in the care of children of all ages and stages. Its broad applicability will assist and improve healthcare of children around the world. The art of paediatrics is complex, and the scope of clinical medicine extends far beyond that for which there is a scientific evidence base. In fact, there are many aspects of paediatrics that have not been tested in a clinical trial nor are they easily amenable to research. With the belief that the best clinical practice is a combination of evidence-based medicine and collective anecdotal wisdom of experienced clinicians, this book offers a unique perspective on the practice of paediatric medicine. The book is divided into four sections organised by Ages and Stages rather than organ systems, reflecting the developmental nature of paediatric practice. One section contains pearls of wisdom that are applicable to all ages. Each chapter begins with a clinical case that demonstrates how the pearl can be applied in clinical practice. This is followed by a discussion of the topic with relevant evidence-based references. The Other Gems section allows authors to share other practice points relevant to but not directly related to the clinical pearl. The purpose of this book is a desire to share information to improve the lives of our patients by helping those who care for them.
