Data Envelopment Analysis Let The Data Speak For Themselves:

Data Envelopment Analysis Joe Zhu, 2014-05-06 The current book introduces the methodology of data envelopment analysis DEA as a data oriented operations analytics This data analysis tool analyzes multiple performance metrics integrates multi dimensional data into a composite index and recommends directions for improvement A number of DEA books have been written for conventional and new DEA models Yet many of these books still require fundamental and necessary knowledge on linear mathematical optimization This book is uniquely designed to present the DEA methodology in an applied setting where a reader is not required to have the knowledge on linear programming and linear algebra *Data*

Envelopment Analysis: Theory, Methodology, and Applications Abraham Charnes, William W. Cooper, Arie Y. Lewin, Lawrence M. Seiford, 1995-07-31 This book represents a milestone in the progression of Data Envelopment Analysis DEA It is the first reference text which includes a comprehensive review and comparative discussion of the basic DEA models The development is anchored in a unified mathematical and graphical treatment and includes the most important modeling extensions In addition this is the first book that addresses the actual process of conducting DEA analyses including combining DEA and 1 parametric techniques The book has three other distinctive features It traces the applications driven evolution and diffusion of DEA models and extensions across disciplinary boundaries It includes a comprehensive bibliography to serve as a source of references as well as a platform for further developments And finally the power of DEA analysis is demonstrated through fifteen novel applications which should serve as an inspiration for future applications and extensions of the methodology The origin of this book was a Conference on New Uses of DEA in Management and Public Policy which was held at the IC Institute of the University of Texas at Austin on September 27-29 1989 The conference was made possible through NSF Grant SES 8722504 A Charnes and 2 W W Cooper co PIs and the support of the IC Institute *Data Envelopment Analysis in*

the Financial Services Industry Joseph C. Paradi, H. David Sherman, Fai Keung Tam, 2017-11-21 This book presents the methodology and applications of Data Envelopment Analysis DEA in measuring productivity efficiency and effectiveness in Financial Services firms such as banks bank branches stock markets pension funds mutual funds insurance firms credit unions risk tolerance and corporate failure prediction Financial service DEA research includes banking insurance businesses hedge pension and mutual funds and credit unions Significant business transactions among financial service organizations such as bank mergers and acquisitions and valuation of IPOs have also been the focus of DEA research The book looks at the range of DEA uses for financial services by presenting prior studies examining the current capabilities reflected in the most recent research and projecting future new uses of DEA in finance related applications **Performance Assessment of**

Urban Infrastructure Services Enrique Cabrera Jr, Miguel Angel Pardo, 2008-03-01 Performance assessment has been one of the hottest topics in the water industry in the past decade In that period the International Water Association has played a key role and the performance indicators systems developed for drinking water and wastewater utilities have become a

reference worldwide This book represents a collection of the papers presented to the Pi08 Conference in Valencia Spain March 2008 The conference represents the final stage in the COST C18 Action funded by the EU and brings together some of the most relevant professionals in the water industry The book covers the latest trends in performance assessment as well as relevant case studies from practical applications in utilities around the globe Themes Performance Indicators Metric Benchmarking Process Benchmarking Asset Management Regulation Case Studies Signal and Information Processing, Networking and Computers Yue Wang,Jiaqi Zou,Lexi Xu,Zhilei Ling,Xinzhou Cheng,2024-05-02 This book collects selected papers from the 11th Conference on Signal and Information Processing Networking and Computers held in Chengdu China in September 2023 The book focuses on the current works of information theory communication system computer science aerospace technologies big data and other related technologies People from both academia and industry of these fields can contribute and find their interests from the book The 11th International Conference on Signal and Information Processing Networking and Computers ICSINC was held in Chengdu China in September 2023 which focused on the key technologies and challenges of signal and information processing schemes network application computer theory space technologies big data and other related technologies **The Routledge Handbook of Transport Economics** Jonathan Cowie,Stephen Ison,2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation understand that and you alleviate the problem Featuring contributions from world leading scholars and practitioners from across the globe all of the chapters within this book are written from a practical perspective theory is applied and developed using real world examples The book examines concepts issues ideas and practicalities of transport provision in five key topic areas public transport public transport reform economic development and transport modelling transport and the environment freight transport A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living Practical and insightful this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning appraisal regulation and freight and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation **Advances in Efficiency and Productivity II** Juan Aparicio,C. A. Knox Lovell,Jesus T. Pastor,Joe Zhu,2020-07-20 This book surveys the state of the art in efficiency and productivity analysis examining advances in the analytical foundations and empirical

applications The analytical techniques developed in this book for efficiency provide alternative ways of defining optimum outcome sets typically as a technical production frontier or as an economic cost revenue or profit frontier and alternative ways of measuring efficiency relative to an appropriate frontier Simultaneously the analytical techniques developed for efficiency analysis extend directly to productivity analysis thereby providing alternative methods for estimating productivity levels and productivity change through time or productivity variation across producers This book includes chapters using data envelopment analysis DEA or stochastic frontier analysis SFA as quantitative techniques capable of measuring efficiency and productivity Across the book s 15 chapters it broadly extends into popular application areas including agriculture banking and finance and municipal performance and relatively new application areas including corporate social responsibility the value of intangible assets land consolidation and the measurement of economic well being The chapters also cover topics such as permutation tests for production frontier shifts new indices of total factor productivity and also randomized controlled trials and production frontiers

Mathematical Modelling: Selected Objects And Processes Anatoliy A Martynyuk, Boguslaw Radziszewski, 2025-04-11 This is the first book on the problems of mathematical modelling that combines a generalised approach to the problem of mathematical modelling processes and phenomena in the real world with developing modelling methods in relation to specific objects and processes Some of the problems discussed here include the stability and bifurcation of simplified models of supply and demand and resultants of various approaches such as standardisation unification partial ordering and data packaging As well as touching upon the general principles of modelling the book studies the stability of mathematical models using the generalised direct Lyapunov method based on matrix valued auxiliary functions It has significant potential for application in the design of new moving objects nano robots manipulators drones etc and processes related to artificial intelligence multidimensional interaction of related data arrays that can be described by differential equations of different types Written by two respected specialists in the field of the qualitative theory of equations and problems of modelling real world phenomena this book is primarily targeted at specialists in the field of engineering sciences but is also suitable for graduate courses
