better understanding of a rapidly evolving topic      **The Food Industry Innovation School** Helmut Traitler, 2015-04-13

Innovation and new product development are increasingly perceived as drivers of profits in the food industry. Companies are dedicating a large amount of resources to these areas and it is crucial that individuals understand how to be part of this new strategy. Food Industry Innovation School focuses on key skills needed to drive new ideas from initial concepts through to successful products on the shelf. The author argues that any individual can learn how to lead innovation within complex organizations utilizing companies' commercial and financial resources. The book focuses on the impact of single individuals on company successes. Case studies from the marketplace provide valuable examples of accomplishments and failures. Product development involves a plethora of activities such as R D innovation, engineering, packaging and design, manufacturing, logistics and supply chain management as well as marketing, sales and finance, and the book addresses all these crucial functions undertaken by food companies and manufacturers of other packaged consumer goods. The learning principles and examples based on the author's personal experience are valid in many fast-moving consumer goods organizations, and so the principles, best practices and solutions offered in the 12 chapters are relevant to a wide audience in the food industry and beyond, including those working in household products, retail, the automotive industry, computers and IT, furniture and even media and publishing. **Food and Nutrition Security in the Kingdom of Saudi Arabia, Vol. 2** Adam E. Ahmed, Jameel M. Al-Khayri, Azharia A. Elbushra, 2024-01-01

Food and nutrition security is a major concern for Saudi Arabia and the surrounding regions due to the range of challenges they face. These challenges include limited agricultural resources, low self-sufficiency in key food staples, climate change and high levels of food loss and waste. This book aims to evaluate and analyze the current situation and future prospects of food and nutrition security in Saudi Arabia. Additionally, it seeks to analyze and assess the roles and functions of various institutions related to food security, providing a deeper understanding of the complex problems associated with it. Furthermore, this book aligns with Kingdom Vision 2030, which includes a set of strategies and programs focused on agriculture, food and water security. It also aligns with the institutional identity of King Faisal University's Food Security and Environmental Sustainability. The book consists of four volumes. Volume 2 is entitled 'Macroeconomic Policy Implications on Food and Nutrition Security'. It covers various areas including food price, loss and waste, processing, finance, trade, investment, quality and safety, consumption patterns, climate change, early warning systems, nutrition, institutions, oil revenue and the significance of date, palm and Hassawi rice, genetically modified food and edible insects in ensuring food and nutritional security. This book is highly significant for professionals, researchers, policymakers and entrepreneurs involved in food and nutrition security in Saudi Arabia, the Gulf Cooperation Council and various national and international organizations. It offers a comprehensive analysis of the obstacles and possibilities in ensuring food and nutrition security as well as presenting practical approaches to address these issues. Additionally, graduate students studying in fields related to food and nutrition security will benefit from this book.
