InfoSphere DataStage Parallel Framework Standard Practices Julius Lerm, Paul Christensen, IBM Redbooks, 2013-02-12 In this IBM Redbooks publication we present guidelines for the development of highly efficient and scalable information integration applications with InfoSphere™ DataStage DS parallel jobs InfoSphere DataStage is at the core of IBM Information Server providing components that yield a high degree of freedom For any particular problem there might be multiple solutions which tend to be influenced by personal preferences background and previous experience All too often those solutions yield less than optimal and non scalable implementations This book includes a comprehensive detailed description of the components available and descriptions on how to use them to obtain scalable and efficient solutions for both batch and real time scenarios The advice provided in this document is the result of the combined proven experience from a number of expert practitioners in the field of high performance information integration evolved over several years This book is intended for IT architects Information Management specialists and Information Integration specialists responsible for delivering cost effective IBM InfoSphere DataStage performance on all platforms

USB

Complete: The Developer's Guide, Fifth Edition Jan Axelson, 2015-03-01 Developers who design and program USB devices have a new resource in the fifth edition of *USB Complete The Developer's Guide* This edition adds an introduction to USB 3.1 and SuperSpeedPlus bus which offers a 2x increase in bus speed over USB 3.0's SuperSpeed For designs that don't require USB 3.1's capabilities the book also covers USB 2.0 technology and applications *USB Complete Fifth Edition* bridges the gap between the technical specifications and the real world of design and programming Author Jan Axelson distills the fundamentals of the protocols and guides developers in choosing device hardware deciding whether to target a USB class driver or another host driver and writing device firmware and host applications Example code in Visual C shows how to detect and access USB devices and how to program and communicate with vendor defined devices that use the human interface device HID class driver and Microsoft's WinUSB driver Also covered are how to use bus power including new advanced power delivery capabilities wireless communications for USB devices and developing embedded hosts including dual role USB On The Go devices Programmers and hardware designers can rely on *USB Complete's Fifth Edition* to help get projects up and running quickly Students and hobbyists will learn how to use the interface built into every PC Instructors will find inspiration and guidance for class projects

Metadata Management with IBM InfoSphere Information Server

Wei-Dong Zhu, Tuvia Alon, Gregory Arkus, Randy Duran, Marc Haber, Robert Liebke, Frank Morreale Jr., Itzhak Roth, Alan Sumano, IBM Redbooks, 2011-10-18 What do you know about your data And how do you know what you know about your data Information governance initiatives address corporate concerns about the quality and reliability of information in planning and decision making processes Metadata management refers to the tools processes and environment that are provided so that organizations can reliably and easily share locate and retrieve information from these systems Enterprise wide information integration projects integrate data from these systems to one location to generate required reports and analysis During this type of implementation process metadata management must be provided along each step to ensure that the final reports and analysis are from the right data sources are complete and have quality This IBM Redbooks publication introduces the information governance initiative and highlights the immediate needs for metadata management It explains how IBM InfoSphereTM Information Server provides a single unified platform and a collection of product modules and components so that organizations can understand cleanse transform and deliver trustworthy and context rich information It describes a typical implementation process It explains how InfoSphere Information Server provides the functions that are required to implement such a solution and more importantly to achieve metadata management This book is for business leaders and IT architects with an overview of metadata management in information integration solution space It also provides key technical details that IT professionals can use in a solution planning design and implementation process

InfoSphere DataStage for Enterprise XML Data Integration

Chuck Ballard, Vinay Bhat, Shruti Choudhary, Ravi Ravindranath, Enrique Amavizca Ruiz, Aaron Titus, IBM Redbooks, 2012-05-23 XML is one of the most common standards for the exchange of information

However organizations find challenges in how to address the complexities of dealing with hierarchical data types particularly as they scale to gigabytes and beyond In this IBM Redbooks publication we discuss and describe the new capabilities in IBM InfoSphere DataStage 8.5 These capabilities enable developers to more easily manage the design and processing requirements presented by the most challenging XML sources Developers can use these capabilities to create powerful hierarchical transformations and to parse and compose XML data with high performance and scalability Spanning both batch and real time run times these capabilities can be used to solve a broad range of business requirements As part of the IBM InfoSphere Information Server 8.5 release InfoSphere DataStage was enhanced with new hierarchical transformation capabilities called XML Stage provides native XML schema support and powerful XML transformation functionality These capabilities are based on a unique state of the art technology that allows you to parse and compose any complex XML structure from and to a relational form as well as to a separate hierarchical form This book is targeted at an audience of systems designers and developers who focus on implementing XML integration support in their environments

Acceptance of cable systems using prestressing steels FIB – International Federation for Structural Concrete, 2019-03-01 Cable stayed structures have become increasingly popular over the last 30 years and have been used in all parts of the world Modern cable stayed bridges have a history of over 50 years and have been constructed with span lengths ranging from 15 m to over 1000 m Many long span cable stayed bridges have been built for railway and highway traffic applications Stay cables have also been used on pedestrian structures many of which are architecturally striking and have become landmark structures There is growing use in building structures particularly for cable supported roofs Most of the cable supported structures have been in the form of cable stayed bridges but in recent years extradosed bridges have seen increased popularity among the designers Led by the experience in Japan more than 200 extradosed bridges have been constructed worldwide in the past 15 years The first edition of these fib recommendations was published as fib Bulletin 30 in 2005 and was the first specification published by fib for stay cable systems This new bulletin has been updated based on Bulletin 30 with the aim to reflect the current state of the art and encompass the latest knowledge in cable systems In addition it has been the aspiration of Commission 5 and Task Group 5.5 to harmonize the guidance in this updated bulletin with other stay cable recommendations from around the world including those from Europe Japan and the USA This new bulletin is intended to supersede and replace fib Bulletin 30 It is recommended that it be used in lieu of fib Bulletin 30 for all future cable supported applications The updated bulletin introduces several significant enhancements to the specifications These recommendations are applicable to both stay cable and extradosed cable applications In the past there has been some debate over the boundary between cable stayed and extradosed bridges This bulletin presents a new continuous approach valid for both A completely new testing requirement to assess the performance of cable systems under bending fatigue including both anchorages and saddles if applicable has been added Testing requirements for saddle systems have been reformulated In

addition to the bending fatigue test noted above new testing procedures for stay cable saddles with isolated tensile elements are introduced This includes tests for saddle axial fatigue friction and tensile testing and determination of the effective saddle friction coefficient Expanded system qualification including requirements for both stay cable and extradosed applications Includes new provisions for MTE qualification and additional load transferring connection devices Minimum number of tests is specified for each A new in situ damping measurement test has been added to verify the actual damping ratio of the damping devices installed By testing on site selected cables may be excited to vibrate without and with the damping devices so that the observed v vibration behaviour can be compared to the specified value Other revisions have been made to reflect the current state of practice Expanded quality control testing requirements Inclusion of epoxy coated prestressing steel as a protection layer Previous recommendations only considered zinc coatings Specifications for epoxy coating material are given Requirements for stainless steel components such as pipes caps and plates Updated guidance for designing lightning protection systems Detailed recommendations for different levels of inspection of cable systems including initial routine detailed and exceptional inspections An updated list of references relevant standards and extended literature
