Anthony Reid

Charting The Shape Of Early Modern Southeast Asia:

Charting the Shape of Early Modern Southeast Asia Anthony Reid, 2000-08-01 In this volume Anthony Reid positions Southeast Asia on the stage of world history. He argues that the region not only had a historical character of its own but that it played a crucial role in shaping the modern world. Southeast Asia's interaction with the forces uniting and transforming the world is explored through chapters focusing on Islamization, Chinese, Siamese, Cham, and Javanese trade, Makassar's modernizing moment, and slavery. The last three chapters examine from different perspectives how this interaction of relative equality shifted to one of an impoverished third world region exposed to European colonial power. **Intertidal History in Island Southeast Asia** Jennifer L. Gaynor, 2016-06-15 Intertidal History in Island Southeast Asia shows the vital part maritime Southeast Asians played in struggles against domination of the seventeenth century spice trade by local and European rivals. Looking beyond the narrative of competing mercantile empires, it draws on European and Southeast Asian sources to illustrate Sama sea people's alliances and intermarriage with the sultanate of Makassar and the Bugis realm of Bone. Contrasting with later portrayals of the Sama as stateless pirates and sea gypsies, this history of shifting political and interethnic ties among the people of Sulawesi's littorals and its land-based realms, along with their shared interests on distant coasts, exemplifies how regional maritime dynamics interacted with social and political worlds above the high water mark.

Sovereign Women in a Muslim Kingdom Sher Banu A.L. Khan, 2018-04-27 The Islamic kingdom of Aceh was ruled by queens for half of the 17th century. Was female rule an aberration? Unnatural? A violation of nature comparable to hens instead of roosters crowing at dawn? Indigenous texts and European sources offer different evaluations. Drawing on both sets of sources, this book shows that female rule was legitimised both by Islam and adat (indigenous customary laws) and provides original insights on the Sultanah's leadership, their relations with male elites, and their encounters with European envoys who visited their court. The book challenges received views on kingship in the Malay world and the response of indigenous polities to east-west encounters in Southeast Asia's Age of Commerce. *Encounters on the Opposite Coast: The Dutch East India Company and the Nayaka State of Madurai in the Seventeenth Century* Markus Vink, 2015-10-14 In *Encounters on the Opposite Coast*, Markus Vink provides a narrative of the first half century of cross-cultural interaction between the Dutch East India Company (VOC), one of the great northern European chartered companies, and Madurai, one of the great southern Nayakas and successor states of the Vijayanagara empire in southeast India, c. 1645-1690. A shared interest in trade and at times converging political objectives formed the unstable foundations for a complex relationship fraught with tensions, a mixture of conflict and coexistence typical of the age of contained conflict. Drawing extensively on archival materials, Markus Vink covers a topic neglected by both Company historians and their Indian counterparts and sheds important light on a black hole in South Indian history. Islamisation A. C. S. Peacock, 2017-03-08 The spread of Islam and the process of Islamisation, meaning both conversion to Islam and the adoption of Muslim culture, is explored in the twenty-four chapters of this volume.

Taking a comparative perspective both the historical trajectory of Islamisation and the methodological problems in its study are addressed with coverage moving from Africa to China and from the seventh century to the start of the colonial period in 1800 Key questions are addressed What is meant by Islamisation How far was the spread of Islam as a religion bound up with the spread of Muslim culture To what extent are Islamisation and conversion parallel processes How is Islamisation connected to Arabisation What role do vernacular Muslim languages play in the promotion of Muslim culture The broad comparative perspective allows readers to develop a thorough understanding of the process of Islamisation over eleven centuries of its history

Pelagic Passageways Rila Mukherjee, 2011 Due to the frontierization of nation states maritime historians have tended to ignore the northern Bay of Bengal Yet this marginal region now dispersed over the four nation states of India China Myanmar and Bangladesh was not marginal in the past Until recently however historians have concentrated largely on the big four the Gujarat Malabar Coromandel and western Bengal coasts Extreme eastern South Asia Bengal and the lands to its north east fanning into Burma and China or modern India's north east and beyond is the focus of Pelagic Passageways This regional unit including diverse topographic features plains forests estuaries deltas rivers mountains lakes plateaus and remote passes oscillates between unity and fragmentation between centrality and marginality in the larger space of the Bay of Bengal To attempt a history of this space is indeed challenging There is not one but two deltas here the western delta corresponding to present West Bengal in India and centred now on Kolkata and the south eastern delta in present Bangladesh centred on Dhaka and running into Arakan Not merely in terms of location but on a historical axis too the two deltas are vastly different as they have followed disparate trajectories dictated in part by their geographies Pelagic Passageways therefore questions the conventional fault line located on the south eastern Bengal delta between the historiography of South and South East Asia Concentrating on commodity and currency flows travel trade routes and interactive networks Pelagic Passageways visualizes the cultural space of the northern Bay of Bengal as embracing upland landlocked areas Ava Yunnan the Tripuri Dimas and Ahom states not usually seen as part of maritime history This collection of essays suggests that they too were a part of the social and commercial networks of the Indian Ocean While these countries literally fell off the map this volume proposes that we see these areas instead as crossroads mediating flows between the land dwelling and aquatic worlds

Reimagining the Silk Roads Julian Henderson, Stephen L. Morgan, Matteo Salonia, 2024-12-17 This book brings together scholars from many disciplines to shed light on the long history of the silk roads to redefine it and to demonstrate its vitality and importance Reimagining the Silk Roads illuminates economic spiritual and political networks bridging different chronologies and geographies Richly illustrated it explores fascinating topics including archaeological discoveries oceanic explorations the movement and impact of ideas and the ways in which the silk roads broadly defined contributed to processes of globalization Reconciling the study of land and sea routes and paying attention to themes such as material culture environment trade and the role of religious faiths the authors offer

complex yet accessible studies of the history of interactions and perceptions across Eurasia over the last 3 000 years The editors critically respond to the recent politicisation of the silk roads and reflect on their polycentric character The book challenges and revives silk roads studies and it will be relevant not only to researchers in archaeology history heritage and related fields but also to the general reader The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

The Belt and Road Initiative and the Future of Regional Order in the Indo-Pacific Nick Bisley, Michael Clarke, Matthew Sussex, 2020-01-20 The Belt and Road Initiative BRI is emerging as a vital lynch pin in China's efforts to establish a maritime and continental zone of influence in the Indo Pacific region The Belt and Road Initiative and the Future of Regional Order in the Indo Pacific interrogates to what extent BRI represents an achievable vision of a China centric order in Asia and explores its major security implications for the region The contributions to this volume provide up to date analysis of the effect of BRI on the region's foreign policy and alliance patterns its connection to geo economics and domestic Chinese politics and the policy responses of key Indo Pacific actors While acknowledging that BRI remains prey to a variety of internal and exogenous shocks the contributors conclude that at the very least BRI will continue to disrupt the existing alignments of economic and strategic interests in the Indo Pacific and that on this minimal basis BRI will likely be judged a success by China For regional actors however the BRI simultaneously enhances choice while presenting strategic and economic risks of greater dependency on China a dilemma intensified by the disruptive effects of the Trump administration on regional confidence in the longevity of American commitments and leadership

European Slave Trading in the Indian Ocean, 1500-1850 Richard B. Allen, 2015-01-01 Between 1500 and 1850 European traders shipped hundreds of thousands of African Indian Malagasy and Southeast Asian slaves to ports throughout the Indian Ocean world The activities of the British Dutch French and Portuguese traders who operated in the Indian Ocean demonstrate that European slave trading was not confined largely to the Atlantic but must now be viewed as a truly global phenomenon European slave trading and abolitionism in the Indian Ocean also led to the development of an increasingly integrated movement of slave convict and indentured labor during the late eighteenth and early nineteenth centuries the consequences of which resonated well into the twentieth century Richard B Allen's magisterial work dramatically expands our understanding of the movement of free and forced labor around the world Drawing upon extensive archival research and a thorough command of published scholarship Allen challenges the modern tendency to view the Indian and Atlantic oceans as self contained units of historical analysis and the attendant failure to understand the ways in which the Indian Ocean and Atlantic worlds have interacted with one another In so doing he offers tantalizing new insights into the origins and dynamics of global labor migration in the modern world

A History of the World in Sixteen Shipwrecks Stewart Gordon, 2015-04-22 Roman triremes of the Mediterranean The treasure fleet of the Spanish Main Great ocean liners of the Atlantic Stories of disasters at sea fire the imagination as little else can

whether the subject is a historical wreck the Titanic or the Bismark or the recent capsizing of a Mediterranean cruise ship Shipwrecks also make for a new and very different understanding of world history A History of the World in Sixteen Shipwrecks explores the ages long immensely hazardous persistently romantic and still ongoing process of moving people and goods across far flung maritime worlds Telling the stories of ships and the people who made and sailed them from the earliest ancient Nile craft to the Exxon Valdez A History of the World in Sixteen Shipwrecks argues that the gradual integration of localized and separate maritime regions into fewer larger and more interdependent regions offers a unique window on world history Stewart Gordon draws a number of provocative conclusions from his study among them that the European Age of Exploration as a singular event is simply a myth many cultures east and west explored far flung maritime worlds over the millennia and that technologies of shipbuilding and navigation have been among the main drivers of science and technology throughout history Finally A History of the World in Sixteen Shipwrecks shows in a series of compelling narratives that the development of institutions and technologies that made terrifying oceans familiar and turned unknown seas into sea lanes profoundly matters in our modern world
