Michael Workman, 2021-10-29 Revised edition of Information security for managers **Retirement's Agony, Adventure, Fun, and Exasperation** Cyrus Tahernia, MD, 2016-04-07 This book consists of twelve chapters. Each chapter portrays a different era of the author's life during his retirement. The manuscript actually is a continuation and supplement to a memoir that was published several years ago. These chapters demonstrate the tide and ebb of the author's life which the author endured associated with the tumultuous nature of his life manifested by his and his family's numerous health problems. These usually but not always pop up during later age coincidental with the retirement period. This time describes why he has entitled his book Retirement's Agony, Adventure, Fun, and Exasperation. This period is associated with some misery as well as the fun and the joyous time of life. This span makes him question the meaning of golden age. On the other hand, it gives him an opportunity to spend more time with his family and doing the things that were not feasible during his hectic personal and professional work. The author realized it is of paramount importance to keep himself busy with numerous trips to the exotic parts of this world. This is why the author started to make several adventures to write books about the continuous itinerary of his life which entails numerous cruises and trips to exciting events such as his silver and golden anniversary while enjoying watching his grandchildren's a bundle of joys growth and development. One caveat about this era of his life is going through a lot of misdiagnosis by esteemed colleagues and being exposed to many unethical jargons and unjustified procedures and experimental tests. But we must remember that medical professionals while delivering good care to their patients are poor patients themselves of medical care providers. This does not mean that we do not have an access to good mannered well experienced and astute care providers albeit unfortunately not many of them are around at the present time. Therefore like a roller coaster he has good and bad and up and down spans of his retirement. Our society has gone through an enormous number of changes that we have ever imagined and or predicted a decade ago such as IT and the new discoveries and peculiar behaviors. Remember retirement is not the end of life but something we must look forward to. Don't retire if you do not have many hobbies and you are enjoying your job. This is one of the many reasons the author opted for the title of this manuscript to be Retirement's Agony, Adventure, Fun, and Exasperation. The author is retired officially but not functionally for

he is writing attending different medical conferences doing daily exercises and getting involved in the fascinating knowledge in the field of anthropology Remember for your own sanity you must stay active in society and avoid social isolation which is a killer The author is not only doing quite a bit of research and study about anthropology but also is getting involved in the domains of lifestyle politics and especially domestic and foreign policies This is why he has allocated one of the longest chapters of the book chapter 12 to this subject which comprises contemporary and hot topics of today's events and what exactly is going on in our beloved country in Europe and especially in the Middle East dilemma and last but not least in the African hemisphere It is concluded that altogether now retirement age is nothing but a number You are only as old as you feel The environment aggravates everything in your retirement from insomnia to indigestion and many other problems but you have to learn how to cope with them
