Documents on the Law of UN Peace Operations Bruce Oswald, Helen Durham, Adrian Bates, 2010-03-25 United Nations peacekeepers currently play a crucial role in international responses to threats to peace and security across the globe Since 1948 the UN has been involved in over 60 peacekeeping operations However in the current environment of complex and rapidly changing threats to peace there has been a dramatic increase in the use of UN peacekeepers to deal with situations of instability In 2009 alone over 100 000 individuals are deployed on such missions This situation has resulted in a range of new and pressing challenges to the legal framework applicable during such collective international action This book provides for the first time a

comprehensive account of the legal framework regulating this area of collective international action The book contains key documents in the areas of privileges and immunities human rights law international humanitarian law and international criminal law Types of documents featured include foundational treaties international rules and regulations memoranda judgments of the International Court of Justice and some mission specific documents Before each document a prefatory note is included outlining the historical development of the document as well as its relevance to UN peace operations To further assist scholars and practitioners in their work the work concludes with a guide on undertaking further legal research on the laws relevant to peace operations a list of all UN peace operations and relevant enabling resolutions and a suggested approach to interpreting Security Council mandates From scholars and students to policy makers representatives in the military police and humanitarian organisations this book will be an invaluable resource in the development of a better understanding of the legal framework surrounding the establishment management and conduct of peace operations that are mandated and controlled by the UN

and critique of past experiences that is essential to the comprehension of the failures of current peacekeeping and requirements for future success *The Oxford Handbook of United Nations Peacekeeping Operations* Joachim Alexander Koops, Norrie MacQueen, Thierry Tardy, Paul D. Williams, 2015 This volume presents an authoritative and accessible examination and critique of UN peacekeeping operations *United Nations Peacekeeping* Marjorie Ann Browne, Nina M. Serafino, Richard F. Grimmett, 2003 Regulating the Use of Force by United Nations Peace Support Operations Charuka Ekanayake, 2021-05-30 This Book attempts to deduce regulatory standards that can close the gaps between the Promises made and the Outcomes secured by the United Nations in relation to its use of force It explores two broad questions in this regard why the contemporary legal framework relevant to the regulation of force during Armed Conflict cannot close the gaps between the said Promises and Outcomes and how the Unified Use of Force Rule formulated herein achieves this This is the first book to coherently analyse the moral as well as legal aspects relevant to UN use of force UN peace operations are rapidly changing Deployed peacekeepers are now required to use force in pursuance of numerous objectives such as self defence protecting civilians and carrying out targeted offensive operations As a result questions about when where and how to use force have now become central to peacekeeping While UN peace operations have managed to avoid catastrophes of the magnitude of Rwanda and Srebrenica for over two decades crucial gaps still exist between what the UN promises on the use of force front and what it achieves Current conflict zones such as the Central African Republic Eastern Congo and Mali stand testament to this This book searches for answers to these issues and identifies how an innovative mix of the relevant legal and moral rules can produce regulatory standards that can allow the UN to keep their promises The discussion covers analytical ground that must be traversed behind the scenes of UN deployment well before the first troops set foot on a battlefield The analysis ultimately produces a Unified Use of Force Rule that can either be completely or partially used as a model set of Rules of Engagement by UN forces This book will be immensely beneficial to law students researchers academics and practitioners in the fields of international relations international law peacekeeping and human rights
