Development And Evaluation Of High Resolution Climate System Models:

Development and Evaluation of High Resolution Climate System Models Rucong Yu, Tianjun Zhou, Tongwen Wu, Wei Xue, Guangqing Zhou, 2016-01-11 This book is based on the project Development and Validation of High Resolution Climate System Models with the support of the National Key Basic Research Project under grant No 2010CB951900 It demonstrates the major advances in the development of new dynamical Atmospheric General Circulation Model AGCM and Ocean General Circulation Model OGCM cores that are suitable for high resolution modeling the improvement of model physics and the design of a flexible multi model ensemble coupling framework It is a useful reference for graduate students researchers and professionals working in the related areas of climate modeling and climate change Prof Rucong Yu works at the China Meteorological Administration Prof Tianjun Zhou works at LASG the Institute of Atmospheric Physics Chinese Academy of Sciences Tongwen Wu works at Beijing Climate Center China Meteorological Administration Associate Prof Wei Xue works at the Department of Computer Science and Technology Tsinghua University Prof Guangqing Zhou works at the Institute of Atmospheric Physics IAP Chinese Academy of Sciences

Climate, Planetary and Evolutionary Sciences Guido Visconti, 2021-04-14 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content
