Corporate Recovery Stuart St. P. Slatter, David Lovett, 1999 An insightful book filled with practical advice on what to do with a corporation that is about to fail unless corrective action is taken *Corporate Financial Distress* Alberto Tron, 2021-01-21 Financial distress and crises for businesses can be used to implement substantial organizational changes and turnaround the damage done to achieve financial equilibrium in the short term and financial stability in the long term Plans methodology and tools are provided here to examine how this turnaround can be achieved [The Executive Guide to Corporate Bankruptcy](#) Thomas J. Salerno, 2010 A comprehensive yet easy to read guide through the intricacies of the Chapter 11 corporate bankruptcy process Ideal for executives management board members and other professionals who need to become conversant in the corporate bankruptcy process **Practicing Strategy - A South African Steel Industry Context** Andretta Tsebe, 2021-10-28 Discussion on strategic management practices that have been applied in the South African steel industry including theory on business rescue that was applied to turn around the industry **Sustainable Value Management-New Concepts and Contemporary Trends** Dariusz Zarzecki, Marek Jabłoński, 2020-12-29 Sustainable value management reveals a new space for studying business models The traditional approach is based on the assumption that the goal of any business is to make money All decisions regarding supply and production should be made to maximize profit The discrepancy in creating non economic value is sometimes the result of separating ownership from control over an enterprise Although shareholders are interested in maximizing profit management that actually makes decisions can also pursue other goals In addition to economic aspects the management intentions of modern managers are also influenced by factors arising from the organizational culture built co created within the organization and sometimes with the participation of external actors such as suppliers and customers The sources of the creation of social values will be the management intentions of top management often initiated by the adopted values and rules on the basis of which resources are bound within the structure of the business model The value of sustainability is based on the identification of those creative sources that relate to economic and social value Economic value is created through social value and vice versa This allows the complementarity of the value created to be mutually supportive The business model that integrates both of these values should be more resistant to crises than the one that is oriented only toward producing economic value Concurrent implementation of economic and social goals increases resilience and affects the success of modern business models This is due to the specificity of the business ecosystem that is built as part of the business model which in essence is based on the use of social factors to merge the business model into a complex ecosystem capable of producing value [Court-Supervised Restructuring of Large Distressed Companies in Asia](#) Wai Yee Wan, 2022-07-28 This book provides an in depth analysis of 4 economically significant Asian jurisdictions Mainland China India Hong Kong and Singapore These jurisdictions have recently either reformed or are considering reforming their corporate restructuring laws to promote regimes conducive to

restructuring financially distressed but otherwise economically viable companies Mainland China India Hong Kong and Singapore continue to adhere to a framework that requires the court's final approval but draw references from Chapter 11 of the Bankruptcy Code 1978 in the United States and or the schemes of arrangement in the United Kingdom However the institutional and market structures are very different in Asia in particular Asia has a far higher concentration in shareholdings among listed firms including holdings by families and the state and a different composition of creditors The book explains how notwithstanding the legal transplantation corporate restructuring laws in these Asian jurisdictions have adapted and evolved due to the frictions in shareholder creditor and creditor creditor relationships and the role of the state in resolving non performing loans and financial distress of state owned enterprises which are listed or which issue public debt The study argues that any reforms must go beyond professionalising the insolvency professionals and the judiciary but must be designed to address fundamental issues of corporate governance bank regulation and enforcing non bankruptcy rules It offers invaluable insights for academics and policy makers alike
