Dimensions Of Teaching Business Ethics In Asia:

Dimensions of Teaching Business Ethics in Asia Stephan Rothlin, Parissa Haghirian, 2013-04-15 A growing number of higher education institutions in Asia are now integrating ethics courses in their curricula But the challenge remains to develop courses that can effectively reach their objectives and to create and use teaching materials appropriate to the particular profile of the students and executives in different regions and cultures In this context enhancing awareness for ethical dilemmas proposing frameworks and models to help managers handle difficult choices and demanding decisions while not being moralistic and imposing values and presenting alternative approaches through recent and relevant cases are the main objectives of this book It examines teaching methods learning tools and pedagogical methods effective in the teaching of ethics within the particular context of the rich diversity of Asian cultures and discusses ethics courses curricula aiming at developing the capacity to deal with a number of issues such as corruption intellectual property protection whistle blowing and consumer rights The relevance and limits of Asian philosophical and spiritual traditions and how their underlying values can be a meaningful aspect in the teaching of ethics to managers and business leaders are explored as are the benefits and limits of corporate codes of conduct and ways to enhance their effectiveness A similar approach is taken to the introduction of oaths and ethics pledges among business students which has been promoted in some business schools **The**

Contribution of Fiction to Organizational Ethics Howard Harris, Michael Schwartz, 2014-09-05 Stories are essential to any organization They help organizations define who they are what they do and how they do it In this issue we consider how fiction has questioned the moral rules and examined such situations and in doing so how it has contributed to our understanding of organizational ethics **Routledge Handbook of Corruption in Asia** Ting Gong, Ian Scott, 2016-11-25

Corruption in Asia ranges from the venal rent seeking of local officials to the million dollar bribes received by corrupt politicians from excessive position related consumption to future job offers in the private sector for compliant public servants from money laundering to white elephant projects that do little more than line the pockets of developers and their political partners The Routledge Handbook of Corruption in Asia addresses the theories issues and trends in corruption and anticorruption reform that have emerged from this diverse experience The book is divided into four major parts corruption and the state corruption and economic development corruption and society and controlling corruption strategies successes and failures Chapters compare and contrast corruption in different social and institutional contexts examine both successful and unsuccessful attempts to control it and consider what lessons can be drawn from these Asian experiences This academically rigorous and insightful book will be of interest to a wide range of students and scholars particularly those of Asian studies politics and sociology **Faith and Work** Timothy Ewest, 2018-01-01 Those who adhere to a faith tradition are longing for theories and insights into how they can be true to their faith within the workplace and yet be sensitive and respectful to others of varying faith commitments and beliefs Yet for Christians respect of other faith traditions is especially

difficult since Christianity as the dominate religion has become secularized and institutionalized within the workplace as represented in holidays and days off Within the multiple theoretical and research dimensions of management religion and spirituality this book explores theoretical conceptual and strategic theories and research which consider how individuals and organizations integrate their Christian faith in the workplace and how these groups attempt to change society as a whole This historical movement is characterized by a desire for people to live a holistic life which integrates their Christian faith into the workplace also deemed faith at work Historically Christian s faith integration is manifested individually or collectively and is demonstrated in the ways it shapes and informs the values systems ethics character and attitudes towards work This edited volume draws themes out of the three historical epochs of the faith and work movement traced by Miller 2007 in the book *God at work The history and promise of the faith at work movement* These organizing themes while not congruent to the historical epochs do capture the ways in which people of faith have historically attempted to integrate their faith into the workplace These themes include Individual integration organizational strategies for integration and societal integration

The New Era of the CCO Roger Bolton, Don W. Stacks, Eliot Mizrachi, 2018-01-24 The role of the chief communication officer CCO in today s enterprise has dramatically changed over the past 30 years Once focused on getting news out to media outlets today s CCO has become an integral part of any enterprise company corporation governmental and nongovernmental entity Today s CCO is responsible for internal and external communication with creating and implementing communication strategies that help mold enterprise mission vision value and character and with building enterprise reputation through stakeholder engagement As a part of the C Suite the CCO must understand not only the psychology and sociology of the business but also the role that she has in informing the C Suite and the chief executive officer what internal and external stakeholders are thinking and how this may affect corporate image in terms of credibility confidence trust relationship and reputation In short the new CCO must understand both the science and the art of communication and apply that knowledge to advancing her enterprise s goals and objectives through a faster and ever larger reaching set of media

Caring Management in the New Economy Ora Setter, László Zsolnai, 2019-04-23 This edited book frames a new ethos of management that cares for society future generations and nature whilst also serving the interests of business and the wider community Employing the practical wisdom of faith traditions the chapters develop the use of spirituality as a resource for creating business models that take pressing social problems such as quality of life at work over consumption environmental degradation and climate change into account Spanning entrepreneurship leadership management education and business models the chapters in this book aim to develop a spiritually based caring model of management to face the challenges and reality of the 21st century

Prosocial Leadership Timothy Ewest, 2017-08-01 This book explores the behavioral phenomenon that is intended to aid in the benefit of others known as prosocial behavior The author combines eight years of quantitative and qualitative research to explain and delineate the antecedents to prosocial leadership and align these

findings into an understandable model for prosocial leadership development This ground breaking text is the first to combine the elements of prosocial followership development and altruism as essential components to leadership It further explores the behaviors values and ideas leading to the formation of prosocial leadership within individuals and organizations

Socially Responsive Organizations & the Challenge of Poverty Milenko Gudić, Al Rosenbloom, Carole

Parkes, 2017-09-08 This book provides a combination of case studies and current action research describing how businesses and civil society organizations are working to alleviate poverty in local and global communities It intends to provide conceptual and research rationales for why management education and management institutions must address the issue of poverty The book responds to one of the major findings from the research of the PRME Working Group on Poverty that the topic of poverty still lacks a strong business case for management educators and program institutional administrators The distinctive features of this book are that it 1 includes examples of small and medium sized SME businesses 2 deals with the issue of poverty as a human rights violation 3 explores the issue of absolute versus relative poverty 4 deals with leadership challenges in organizations committed to poverty alleviation and 5 discusses the issues in terms of management education s responsibility for setting new management research institutional and intellectual agendas The first of two books to be produced by the PRME Working Group on Poverty Socially Responsive Organizations and The Challenge of Poverty aims to provide both researchers and practitioners with the most wide ranging coverage yet published on how business can be a positive force in alleviating poverty and how management education needs to adapt to this increasingly crucial prerogative

Business Ethics in East Asia Chris Rowley, Ingyu Oh, 2018-07-26 For organisations and management the role of business ethics is of key importance but to what extent business ethics are actually new or fashionable or universally applicable are interesting questions Asia has been the site of contests between competing economic and ethical views of how economic norms and institutions are organized This book examines the evolutionary similarities and differences of institutionalizing business ethics in Asia in a historical context and in comparison to better explored business ethics literature both empirically and theoretically This collection uses both historical and contemporary cases in Japan Korea and China to show that these countries have tried to balance their traditional business ethics norms and values with those that have been introduced from the West Underpinning the case studies is the fact that these countries have historically pursued ethical mandates in running private corporations although corruptive practices were also rampant during different historical periods *Corporate Social Responsibility in Asia* Kim Cheng Patrick Low, Samuel O. Idowu, Sik Liong Ang, 2013-11-09 This book presents a rich collection of research studies on the theory and practice of CSR in Asia It includes valuable contributions of practice oriented researchers from various Asian countries such as Brunei China India Indonesia Japan Korea Malaysia and Singapore and from several non Asian countries such as Australia Canada and the USA The book presents a comprehensive overview of the practice of CSR in Asia Normally CSR is seen in the Western angles but here in this book Asian philosophies and thoughts are

also examined Touted as the first of its kind the book also compares Western and Asian perspectives on CSR and presents them in the light of Asian philosophies and thoughts such as Confucian Islamic Koranic Indian Vedantic and other Asian ways of looking at CSR in their own rights and perspectives
