Exam With Complete Solution

Case Studies - Answer A terrible collision between a trailer truck and a bus has occurred on Route 91. Several of the passengers are rushed to area hospitals for treatment. We will follow a few of these people in clinical case studies that will continue through the book from one organ system to the next.

Chapter 5

Examination of Mrs. DeStephano, a 45-year-old woman, reveals several impairments of homeostasis. Relative to her integumentary system, the following comments are noted on her chart:

- epidermal abrasions of the right arm and shoulder
- severe lacerations of the right cheek and temple
- cyanosis apparent - Answer The lacerated areas are cleaned, sutured (stitched), and bandaged by the emergency room (ER) personnel, and Mrs. DeStephano is admitted for further tests.

1. What protective mechanisms are impaired or deficient in the abraded areas? -

Answer The skin separates and protects the internal environment of the body from potentially dangerous elements in the external environment. Mrs. DeStephano's chart indicates epidermal abrasions, which represent the loss of this barrier. Epidermal loss will also cost Mrs. DeStephano the acid mantle of her skin, protection against UV radiation, and dendritic cells, which protect against invasion by microorganisms.

2. Assuming that bacteria are penetrating the dermis in these areas, what remaining skin defenses might act to prevent further bacterial invasion? - Answer Macrophages found in the dermis can act as a backup system against bacterial and viral invasion when the epidermis is damaged.

3. What benefit is conferred by suturing the lacerations? - Answer Suturing brings the edges of wounds close together and promotes faster healing because smaller amounts of granulation tissue need to be formed. This is termed healing by first intention.

4. Mrs. DeStephano's cyanotic skin may hint at what additional problem (and impairment of what body systems or functions)? - Answer Cyanosis signals a decrease in the amount of oxygen carried by hemoglobin in the blood. Respiratory system and/or cardiovascular system impairments can lead to cyanosis.

Nursing

Knowledge and Practice E-Book Maggie Mallik, Carol Hall, David Howard, 2009-04-22 Nursing knowledge and practice is a comprehensive textbook which forms an ideal basis for foundation nursing students. The core emphasis in the organisation and presentation of knowledge in this third edition remains focused on the in depth knowledge required by nurses to deliver care in the practice setting. The chapter contents encompass knowledge that applies to all branches of nursing e.g. Communication, Confusion, Aggression and Rehabilitation, Safety and Risk, Infection Control, Medicines etc. The structure of all chapters is unique in integrating knowledge from subject areas often taught separately in the nursing curriculum. This enables the foundation student to integrate this range of knowledge in making decisions about the delivery of nursing care to patients/clients in all fields of nursing. Exercises are included to encourage reflection on practice and develop critical thinking skills. It also promotes the expansion of professional knowledge through the development of portfolio evidence. Building on the outstanding success of previous editions, the authors have drawn extensively on current best evidence including research, policy and substantial internet based resources reflecting UK and international perspectives. Each chapter begins with an overview of the content and concludes with a summary to help evaluate learning. Case studies reflect the diverse range of client needs and care settings of the four nursing branches and help relate theory to practice. Reflective exercises and suggestions for portfolio evidence along with decision making activities promote reflection on personal experience and links to nursing practice using a problem based approach. Current research is highlighted throughout demonstrating the evidence base for practice decisions. Key web sites annotated for further reading and references encourage readers to pursue contemporary evidence that underpins competency based practice. Full colour throughout. Content fully updated in line with developments in clinical practice, teaching requirements and the evidence base. Free electronic ancillaries on Evolve enhance the knowledge provided in each chapter with additional information, exercises and resources. An introductory chapter on Nursing Knowledge and Practice explores the role and context of nursing nationally and internationally, providing foundation information on core knowledge areas common to all nursing curricula.
