## **Casebook Of Clinical Neuropsychology:**

Casebook of Clinical Neuropsychology Joel E. Morgan, Ida Sue Baron, Joseph H. Ricker, 2010-10-29 Casebook of Clinical Neuropsychology features actual clinical cases drawn from leading experts in the field The ^A Neuropsychology Fact-Finding Casebook Kirk J. Stucky PsyD, ABPP, Shane S. Bush PhD, ABPP, 2017-01-04 Use of a structured fact finding approach that is based on sound clinical judgment and applied flexibility facilitates good clinical decision making and patient care in neuropsychology This Casebook is a standardized approach to fact finding that training programs at various levels can use to help trainees develop significant evaluation skills such as case conceptualization differential diagnosis and recommendations for patients with a wide range of presenting problems Trouble in Mind Jenni Ogden PhD, 2012-02-01 In Trouble in Mind neuropsychologist Jenni Ogden author of Fractured Minds transports the reader into the world of some of her most memorable neurological patients as she explores with compassion insight and vivid description the human side of brain damage These are tales of patients who as the result of stroke brain tumor car crash or neurological disease begin thinking and behaving strangely and with their loved ones support embark on the long journey to recovery acceptance of disability and sometimes death There is Luke the gang member who loses his speech but finds he can still sing his favorite blues number Trouble in Mind and HM who teaches the world about memory and becomes the most studied single case in medical history You will meet Julian who misplaces his internal map of the human body and Melody a singer who risks losing her song when she undergoes brain surgery to cure her epilepsy Then there is Kim with a severe head injury and Sophie who has just enough time to put her house in order before Alzheimer s dementia steals her insight For these and the many other patients whose stories are told in this book the struggle to understand their disordered minds and disobedient bodies takes extraordinary courage determination and patience For health professionals and researchers working with these patients the ethical and emotional challenges can be as demanding as the intellectual and treatment decisions they make daily Trouble In Mind is written in an accessible narrative style that is both accurate and intimate It will be enjoyed by readers whether students researchers or professionals in mental health and neuroscience patients with neurological disorders and their families or general readers who want to learn more about brain disorders and the doctors who care for those who suffer them **The Neuropsychology Casebook** Donna L. Orsini, Wilfred G. Van Gorp, Kyle B. Boone, 2013-11-11 The Neuropsychology Casebook was developed to fill the existing gap in the current body of literature on clinical neuropsychology Although texts are available that describe neuropsychological tests and others provide information on syndromes this volume provides descriptions of neuropsychological test performance for individuals with various syndromes It was designed to illustrate the process of clinical interpretation of test findings and report writing for the individual case Our aims are to provide both the student and practicing professional with a collection of actual neuropsychological case studies that typify many of the cardinal disorders or syndromes frequently seen by practicing clinical neuropsychologists We have

not provided an exhaustive survey of case studies representing many of the disorders commonly seen in neuropsychology rather we have focused on a few select cases that illustrate some of the more common disorders This book includes detailed case reports complete with referral questions historical information relevant neuroradiological findings actual neuropsychological test data and clinical interpretations that take into account all available information on the patient The cases are discussed in the chapter commentaries with reference to how each compares and contrasts with the prototypic case for that disorder or syndrome Such case studies help to highlight the various types of behavioral and cognitive sequelae associated with common clinical disorders The case studies which are examined through an hypothesis testing approach are also aimed at demonstrating how neuropsychological principles and methods are applied Neuropsychology of Malingering Casebook Joel E. Morgan, Jerry J. Sweet, 2008-11-19 Clinical neuropsychologists frequently evaluate individuals within a forensic context and therefore must address questions regarding the possible presence of reduced effort response bias and or malingering This volume offers a wide range of instructive real world case examples involving the complex differential diagnosis where symptom exaggeration and or malingering cloud the picture Written by expert forensic neuropsychologists the scenarios described provide informed empirically based and scientifically derived opinions on the topic Issues related to malingering such as response bias and insufficient effort are discussed thoroughly with regard to a large number of clinical conditions and assessment instruments Test data and non test information are considered and integrated by the numerous experts Expert guidance for clinicians who must address the issue of malingering is provided in a straightforward and well organized format To date there has not been a comparable collection of rich case material relevant to forensic practice in clinical neuropsychology *Forensic Neuropsychology Casebook* Robert L. Heilbrunner, 2005-06-15 Featuring compelling case presentations from experienced neuropsychologists this volume offers a window into the complexities of conducting forensic assessments and serving as an expert witness Covering both the civil and criminal arenas the contributors demonstrate evidence based procedures for evaluating premorbid functioning competency malingering and other forensic issues Each case includes step by step details on the clinical interview behavioral observations neuropsychological test results and preparation for deposition or courtroom testimony The concluding Ask the Experts section provides a thought provoking Q A on salient professional and ethical issues An ideal format for translating science to practice the casebook yields valuable insights on navigating the twists and turns of the legal system Neuropsychological Formulation Jamie A.B. Macniven, 2015-09-09 This forward looking reference defines and illustrates the process and themes of formulation in neuropsychology and places it in the vanguard of current practice The book explains the types of information that go into formulations how they are gathered and how they are synthesized into a clinically useful presentation describing psychological conditions resulting from neurological illness or injury Cases highlight the relevance and flexibility of narrative and diagram based formulation methods in approaching a diverse range of issues and conditions from decisional capacity to

cultural considerations Huntington's disease to deep dyslexia Throughout this volume formulation is shown as integral to treatment and rehabilitation planning alongside clinical assessment cognitive testing and diagnosis Included among the topics The interface of neuroimaging with neuropsychological findings in traumatic brain injury Neuropsychological aspects of temporal lobe epilepsy seeking evidence based practice An integrative approach to differential diagnosis of subarachnoid hemorrhage and Korsakoff's dementia Educational disengagement following mild TBI in childhood Themes in the formulation of repeat assessments Cognitive neuropsychological formulation Formulation is essential in good neuropsychological assessment as it provides the foundation for appropriate intervention by bringing together the results of different evaluations into a coherent whole Macniven's compelling and constructive book has assembled internationally known experts from diverse backgrounds to provide illumination of their own views and approaches to formulation which makes the book a pleasure to read and should establish it as essential reading on clinical psychology and neuropsychology training courses Professor Barbara A Wilson OBE Ph D D Sc Neuropsychologists clinical psychologists and rehabilitation specialists will find Neuropsychological Formulation of critical importance not only to the literature of the field but also to the developing role of clinical neuropsychology within healthcare systems A Casebook of Ethical Challenges in Neuropsychology Shane S. Bush, 2004-11-23 The American Psychological Association published a revision of the Ethical Principles of Psychologists and Code of Conduct in 2002 This text a companion to the 2002 text Ethical Issues in Clinical Neuropsychology by Bush and Drexler presents the reader with common ethical challenges in neuropsychology This text examines the differences between the 1992 and 2002 APA Ethics Codes as they relate to neuropsychological activities The authors present cases and discuss ethical issues related to neuropsychological practice with a variety of patient populations and in a variety of clinical settings In addition ethical issues in neuropsychological research and test development are examined The text also includes chapters on emerging and particularly challenging aspects of neuropsychological practice such as the assessment of response validity and the use of information technology and telecommunications Through the use of case illustrations the authors examine ethical issues in neuropsychology and the new Ethics Code offering a practical approach for understanding and promoting ethical neuropsychological practice Introduction to Clinical Neuropsychology Richard I.
