Living Memory Fabio Troncarelli, 2025-03-10 Fabio Troncarelli examines the Late Antique Cassiodorian edition of the *Consolation of Philosophy* by Boethius in this new study consisting of five chapters The first one offers a brief sketch of the lives of the two protagonists of the story The second concerns the medieval copies of the edition some very close to the original archetype preserving even its formal aspect and the indication of its first transcription in Ravenna in the sixth century The third chapter establishes a comparison between some typical rhetorical philosophical and editorial methods used by Cassiodorus and the ones found in Boethius's edition The fourth chapter explores possible reasons for Cassiodorus's decision to produce such an edition during the years of the collapse of Ostrogothic rule in Italy The final chapter discusses the living memory of Boethius's reputation at Vivarium and the relationships between his murder and Amalsuintha's murder as understood and covertly preserved by the Vivarian monks The Publications of the Champlain Society, 1977 *The Legend of Charlemagne in the Middle Ages* M. Gabriele, J. Stuckey, 2008-09-29 These essays take advantage of a new exciting trend towards interdisciplinary research on the Charlemagne legend Written by historians art historians and literary scholars these essays focus on the multifaceted ways the Charlemagne legend functioned in the Middle Ages and how central the shared if nonetheless fictional memory of the great Frankish ruler was to the medieval West A gateway to new research on memory crusading apocalyptic expectation Carolingian historiography and medieval kingship the contributors demonstrate the fuzzy line separating fact and fiction in the Middle Ages Embodiments of Will Michael Frampton, 2008 This book examines the two chief anatomical and physiological embodiment theories of voluntary animal motion which I call the cardiosineu and cerebroneuromuscular theories of motion from the time of Aristotle 384-322 B.C. to that of Mondino de' Liuzzi 1326 The study of animal motion commenced with the ancient Greek natural scientist Aristotle who wrote the monograph *On the motion of animals* *De motu animalium* Subsequent inquiries into voluntary animal motion may be found in a variety of Greek Latin and Arabic compendia commentaries and encyclopedias throughout the ancient and medieval periods The

motion of animals was considered relevant to natural philosophers and theologians investigating the nature of the soul and to physicians seeking to discover the causes of disorders of voluntary movement such as epilepsy and tetany The book fills a gap in the scholarly literature concerned with pre modern studies of the anatomical and physiological mechanisms of will and bodily movement The accompanying photographs of my own anatomical dissections illuminate ancient and medieval conceptual empirical and experimental methods of anatomical and physiological research **The Library Quarterly** ,1988
