

Child Care Experience™ Implementation Guide

Engage students with innovative, real-world career preparation.

"I don't think students really realize how much of a responsibility this field is until they have a little taste of that experience, and I think the Child Care Experience program really gave it to them. I even had one student, who used the program this past semester, tell me she thinks this is something she wants to do – she wants to be a preschool teacher. That's huge because these careers are in dire need of people who want to invest in the lives of children and so if they get a little taste of that, that's my goal as a teacher."

Modern manufacturing systems must be engineered as any other complex systems especially in the context of their integration. The book first presents the all embracing concept of the Extended Enterprise as way of inter enterprise integration. It then focusses on Enterprise Engineering methods and tools to address intra enterprise integration using a model based approach. Business process modelling and re engineering issues are particularly discussed and tools presented. Formal specification and Petri net based analysis methods for manufacturing systems complete the set of tools for Enterprise Engineering.
