Cost-Benefit Analysis for Public Sector Decision Makers Diana Fuguitt, Shanton J. Wilcox, 1999-10-30 Fuguitt and Wilcox skillfully guide analysts public sector managers and students of decision making through a full range of the essential steps to perform interpret and assess cost benefit analysis Their book shows how to grasp the principles of cost benefit analysis and several related economic valuation methods how to apply them in undertaking an objective analysis and how to use the analysis as a decision making tool across a wide range of fields and applications An extensive knowledge of economic theory calculus or advanced graphical analysis is not needed to understand the principles or techniques Accessible to those who understand basic algebra and have a beginner's hold on statistics the book also provides a bridge to the more advanced literature in economics and to other analyses used to perform sophisticated valuations A unique much needed presentation of all that is required to gain an immediate useful understanding of the topic The authors explain basic economic concepts and show how they are relevant to understanding an analytical approach They enumerate principles and detail such technical components as with and without analysis discounting decision criteria and uncertainty assessment The book provides especially extensive coverage of the contingent valuation method along with market valuation the travel cost and property value methods human life valuation and cost effectiveness analysis They explain empirical methods used to perform these valuation techniques and cover survey and regression analysis as well Most importantly Fuguitt and Wilcox treat the topic within its real world context as a decision making tool to assess a particular policy's efficiency and to provide the decision maker with necessary information Trade offs between efficiency and other policy objectives are also addressed as is the interdisciplinary setting within which cost benefit analysis is interpreted enabling readers to understand that policy advocates and adversaries bring their own values and competing interests to bear on any decision making process
