Court Protection Made Clear Users:

The Court of Protection Made Clear Claire Wills-Goldingham, Marie Leslie, 2017-06 The essential plain English guide to Court of Protection law practice *Court of Protection Made Clear A User's Guide* aims to help everyone involved in Court of Protection proceedings The book deliberately sets out to bridge the gap between the people using the Court and the professionals who advise them so that all involved can make fully informed decisions about money and welfare at what can be a stressful time Using plain English it demystifies the law language and procedure and is enhanced by a raft of invaluable flowcharts tables and model documents that help put the guidance into practice While accessible to the non lawyer the book also provides the professional legal adviser with a quick clear first point of reference It will therefore be an essential reference for all care home managers and senior staff local authority staff working in elderly care services other professionals acting as deputies or advising on family affairs individuals who have become involved in Court of Protection proceedings for whatever reason private client family lawyers undertaking Court of Protection work

The Right to be Forgotten George Brock, 2016-09-30 The human race now creates distributes and stores more information than at any other time in history Frictionless and cheap digital networks circulate information in ways which either authors or subjects are unable to trace or control Servers store data which can be found on the world wide web years after it has ceased to be accurate or relevant to its original use These developments have given rise to a movement promoting a right to be forgotten an argument that freedom of expression should be balanced by a right to erase information which affects an individual under certain conditions Rights to privacy therefore need extending and strengthening in the digital era This strand of thinking influenced a significant judgement delivered by the European Court of Justice in May 2014 As a result the dominant internet search engine in Europe Google has been required to remove links to hundreds of thousands of pieces of information on application from individuals who considered their interests harmed We know very little of how these delinking choices are made This book looks at the implications of this controversial decision for free expression journalism and information in the digital public sphere Two rights free speech and privacy collide in a new way in age of information saturation Is the judgement a threat to freedom of information and the accuracy of the historical record or the first step in establishing essential new rights in the digital era

The Responsibility of Online Intermediaries for Illegal User Content in the EU and the US Folkert Wilman, 2020-11-27 Featuring foreword from Maciej Szpunar First Advocate General at the Court of Justice of the European Union and Professor at the University of Silesia in Katowice This book delivers a comprehensive examination of the legal systems that regulate the responsibilities of intermediaries for illegal online content in both the EU and the US It assesses whether existing systems are capable of tackling modern challenges ultimately advocating for the introduction of a double sided duty of care requiring online

intermediaries to do more to tackle illegal content whilst also better protecting their users rights Modern China's Copyright Law and Practice Yimeei Guo, 2017-07-25 This book presents selective case studies concerning China's Copyright Law especially the typical cases chosen by China's Supreme People's Court and the Beijing Shanghai and Guangzhou IP courts in recent years as the local court's guiding reference cases the goal is to help readers familiarize themselves with China's dispute and resolution system from a practical point of view The major aspects covered include copyright object copyright subject copyright content copyright limitations neighboring rights copyright infringement and enforcement software copyright protection collective management societies and online copyright protection Generally speaking the book highlights selected typical cases involving various categories of current China's Copyright Law In addition it introduces readers to relevant laws and regulations and discusses some hot issues in the academic field including the extended collective license ECL implementation problem and the definition of know of Internet Service Providers ISPs in China As such the book successfully combines legal theory and realities offering readers especially graduate students and researchers a clear and sensible overview of modern China's Copyright Law and practice as well as the chance to better understand China's judicial and administrative efforts to protect copyright while also satisfying the requirement of transparency ever since China's entry to the WTO in 2001 **EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility** Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e-commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so-called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical

literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

Copyright and Anonymity in the Creative User-Generated World Rachel Maguire,2025-05-01 This book explores the relationship between copyright law online anonymity and creative user generated content CUGC Presenting original empirical findings the book evaluates the co existence of copyright law and normative systems regulating a CUGC landscape made up of artists photographers and writers and makes novel recommendations for copyright reform It takes a multi jurisdictional approach across Anglo American and EU legal systems using the UK USA and Germany as representative jurisdictions for legal analysis Qualitative findings are drawn from creators and communities on Reddit and 4chan Copyright subsists in much CUGC but pervasive anonymity makes it difficult for the law to regulate it effectively Simultaneously anonymity offers creative benefits in a way that highlights flaws in traditional justifications of copyright Comparisons between community norms and copyright law identify practical differences but also fundamental compatibilities in terms of ownership expectations However the simultaneous existence of legal and normative enforcement mechanisms complicates matters for creators and potential users with negative implications for creativity and copyright law While existing reform efforts have made suggestions to create a UGC exception these overlook and undermine the role of CUGC creators as copyright holders This can be addressed through the consideration of a framework of supplementary CUGC guidelines when developing such reforms This valuable resource for researchers and students provides a distinct perspective in framing CUGC creators as copyright holders examining online anonymity as a pivotal factor influencing regulation
