30 years of research in this area from the disciplines of law and social psychology      **Arresting Cinema** Karen Fang, 2017-01-11 When Ridley Scott envisioned Blade Runner's set as Hong Kong on a bad day he nodded to the city's overcrowding as well as its widespread use of surveillance. But while Scott brought Hong Kong and surveillance into the global film repertoire, the city's own cinema has remained outside of the global surveillance discussion. In *Arresting Cinema*, Karen Fang delivers a unifying account of Hong Kong cinema that draws upon its renowned crime films and other unique genres to demonstrate Hong Kong's view of surveillance. She argues that Hong Kong's films display a tolerance of and even opportunism towards the soft cage of constant observation, unlike the fearful view prevalent in the West. However, many surveillance cinema studies focus solely on European and Hollywood films, discounting other artistic traditions and industrial circumstances. Hong Kong's films show a more crowded, increasingly economically stratified and postnational world that nevertheless offers an aura of hopeful futurity. Only by exploring Hong Kong surveillance film can we begin to shape a truly global understanding of Hitchcock's rear window ethics      *Football, Violence and Social Identity* Richard Guilianotti, 2004-07-31 Drawing on research from Britain, Europe, Argentina and the USA, this volume examines the culture and loyalties of soccer players and crowds and their relationships to social order, disorder and violence. This informative and accessible book will be of interest to students of Sport Science and to all of those who love the game of soccer      **Pre-crime** Jude McCulloch, Dean Wilson, 2015-07-24 Pre-crime aims to pre-empt would-be criminals and predict future crime. Although the term is borrowed from science fiction, the drive to predict and pre-empt crime is a present-day reality. This book critically explores this major twenty-first century development in crime and justice. This first in-depth study of pre-crime defines and describes different types of pre-crime and compares it to traditional post-crime and crime risk approaches. It analyses the rationales that underpin pre-crime as a response to threats, particularly terrorism, and shows how it is spreading to other areas. It also underlines the historical continuities that prefigure the emergence of pre-crime, as well as exploring the new technologies and forms of surveillance that claim the ability to predict crime and identify future criminals. Through the use of examples and case studies, it provides insights into how pre-crime generates the crimes it purports to counter, providing compelling evidence of the problems that arise when we act as if we know the future and aim to control it through punishing, disrupting or incapacitating those we predict might commit future crimes. Drawing on literature from criminology, law, international relations, security and globalization studies, this book sets out a coherent framework for the continued study of pre-crime and addresses key issues such as terminology, its links to past practices, its likely future trajectories and its impact on security, crime and justice. It is essential reading for academics and students in security studies, criminology, counter-terrorism, surveillance, policing and law, as well as practitioners and professionals in these fields      **Managing Intelligence** John Buckley, 2017-07-27 *Managing Intelligence: A Guide for Law Enforcement Professionals* is designed to assist practitioners and agencies build an efficient system to gather and manage intelligence effectively and lawfully, in line with the
