

Cow Heart Dissection

Name: _____

Observation: External Anatomy

1. Identify the right and left sides of the heart. Look closely and on one side you will see a diagonal line of blood vessels that divide the heart. The half that includes all of the apex (pointed end) of the heart is the left side.

2. Confirm this by squeezing each half of the heart. The left half will feel much firmer and more muscular than the right side. (The left side of the heart is stronger because it has to pump blood to the whole body. The right side only pumps blood to the lungs.)

3. Locate the **coronary arteries** and veins that are on the surface of the heart.

4. Find the flaps of dark tissue on the top of the heart. These ear-like flaps are called **auricles**.

5. Turn the heart so that you are looking at its dorsal side (the back of the heart). Find the large opening at the top of the heart next to the right auricle. This is the **superior vena cava**, which brings blood from the top half of the body to the **right atrium** (the atria are the top chambers in the heart). Stick a probe down this vessel. You should feel it open into the right atrium.

6. A little down and to the left of the superior vena cava there is another blood vessel opening. Insert your probe into this; it should also lead into the right atrium. This is the **inferior vena cava**, which brings blood from the lower tissues.

7. You can also see another blood vessel next to the left auricle. This is a **pulmonary vein** that brings blood from the lungs into the **left atrium**.

8. Sticking straight up from the center of the heart is the largest blood vessel you will see. This is the **aorta**, which takes oxygenated blood from the **left ventricle** to the rest of the body (the ventricles are the lower chambers of the heart).

9. Behind and to the left of the aorta there is another large vessel. This is the **pulmonary artery** which takes blood from the **right ventricle** to the lungs.

Checkpoint: Make sure you know the location of each of the following before continuing to the internal anatomy of the heart:
