KEYWORDS:

Funding allocated: £

The project involved the following activities:

- a) Audit of materials available on the internet for investigating the idea of convergence in Mathematical Analysis; this is a subject which students typically find difficult.
- b) Production of java applets for exploration of the ideas of convergence in analysis.
- c) Identification of partners in the sector for the development of tools for computer aided assessment.
- d) Training of Leicester colleagues in the use of software developed by colleagues from the sector.
- e) Installation of software system for computer-aided assessment (this has not worked).
- f) Dissemination to staff in the department through staff meetings.
- g) The broadening of departmental activity in the area of computer aided learning.
- h) The increase of experience developed in the department to the use of technologies for distance learning.

1. PROJECT OUTCOMES AND ACHIEVEMENTS

We have learnt a great deal on how to design and implement questions for online assessment, which proved to be a substantially different endeavour to designing questions in classical Problem Sheets. We also developed effective ways of giving fair marking schemes, as when working on a CAA-problem the whole calculation of the student is not available (hence, marks can only come from the answer). We also understood for which classes of problems it is beneficial to use CAA. Also, we have established collaboration and communication with Dr. Robert Scheichl and his group from the Department of Mathematics at the University of Bath, UK, that has already developed two CAA revision Problem Sheets for their Vector Calculus module. Moreover, a joint pool of template exercises and frequent discussion between the Leicester and Bath CAA teams are, currently, in place.
