Clifford Geertz Culture Custom And Ethics:

Clifford Geertz Fred Inglis, 2000-08-02 This is the first full scale study of the work of Clifford Geertz who is one of the best known anthropologists in the world today In a lively and accessible introduction to his work Fred Inglis situates Geertz's thought in the context of his life and times reviewing its forty year range The book begins with a chapter long biography and places Geertz in the anthropological tradition from which he broke so decisively This break was inspired by the work of Wittgenstein and Kenneth Burke who provided Geertz with the lead to construct his theory of symbolic action This theory was vigorously at odds with the dominant idiom of scientific inquiry in the human sciences and since then Geertz has led the practice of these sciences in quite a different direction Geertz's progress is charted in detail by his field work in Java Bali and Morocco as well as his work in the Institute for Advanced Study in Princeton His two remarkable collections of essays the *Interpretation of Cultures* and *Local Knowledge* are enthusiastically summarized and criticized The celebrated and controversial essay on the Balinese cock fight is defended against its critics and in an extended conclusion his account of the Balinese Theatre State is as Geertz suggests proposed as a more adequate method for the combined study of culture and politics than the professionals routine application of heavy handed concepts such as power and status This book provides a comprehensive overview of one of the most gripping lucid and entertaining of contemporary thinkers and in so doing makes anthropology once again the popular science It will be of great interest to anthropologists and to students and scholars of cultural studies

Clifford Geertz Fred Inglis, 2000 *Theory in Social and Cultural Anthropology* R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why In response SAGE Reference is publishing the two volume *Theory in Social and Cultural Anthropology An Encyclopedia* Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader's Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader's Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a

Master Bibliography at the end guide readers to sources for more detailed research and discussion

Culture. A Philosophical Perspective Martine Lejeune , 2016-12-12 This book attempts to grant a clear insight into the problem of culture Thinking about culture we are faced with the inevitable and apparently insuperable problem of how to study culture in the absence of a consensual definition of this notion For several reasons the anthropologists Claude L vi Strauss and Clifford Geertz provide an ideal starting point for tackling this issue Firstly both graduated in philosophy before turning to anthropology Secondly the linguistic model based approach they initiated is founded on the general belief that language is a feature which all men have in common And thirdly when taken together the conclusions reached by L vi Strauss and Geertz which contradict one another yield a clear view on the conceptual complexity of culture
