Duvall,2019-05-09 After arriving from South Asia approximately a thousand years ago cannabis quickly spread throughout the African continent European accounts of cannabis in Africa often fictionalized and reliant upon racial stereotypes shaped widespread myths about the plant and were used to depict the continent as a cultural backwater and Africans as predisposed to drug use These myths continue to influence contemporary thinking about cannabis In *The African Roots of Marijuana* Chris S Duvall corrects common misconceptions while providing an authoritative history of cannabis as it flowed into throughout and out of Africa Duvall shows how preexisting smoking cultures in Africa transformed the plant into a fast acting and easily dosed drug and how it later became linked with global capitalism and the slave trade People often used cannabis to cope with oppressive working conditions under colonialism as a recreational drug and in religious and political movements This expansive look at Africa s importance to the development of human knowledge about marijuana will challenge everything readers thought they knew about one of the world s most ubiquitous plants **Cannabis Sativa** S. T. Oner,2012 Cannabis plants are classified into two main groups Indica and Sativa This book focuses on Cannabis Sativa an especially tall and potent species of marijuana plant that true connoisseurs love not only for its smoke that induces a desire to create art and socialize with people but also for the interesting challenges it presents to growers due to its size No other strain guide
