Ligang Song, Wing Thye Woo

Chinas Dilemma Economic Growth The Environment And Climate Change:

China's Dilemma Ligang Song, Wing Thye Woo, 2008 China's Dilemma discusses key questions that will have an impact on China's growth path and offers some in depth analyses as to how China could confront these challenges. The authors address the effect of the global credit crunch and financial shocks on China's economic growth, China's contribution to greenhouse gas emissions and emissions reduction schemes, the environmental consequences of foreign direct investment in China, the relationship between air pollution and mortality, the effect of climate change on agricultural output, the coal industry's compliance with tougher regulations and the constraints water shortages may impose on China's economy. It also emphasizes the importance of managing the rising demand for energy to moderate oil price increases and placating domestic and international concerns about global warming.

China's Dilemma Ligang Song, Wing Thye Woo, 2008-07-01 China's Dilemma Economic Growth the Environment and Climate Change examines the challenges China will have to confront in order to maintain rapid growth while coping with the global financial turbulence, some rising socially destabilising tensions such as income inequality, an over exploited environment and the long term pressures of global warming. China's Dilemma discusses key questions that will have an impact on China's growth path and offers some in depth analyses as to how China could confront these challenges. The authors address the effect of the global credit crunch and financial shocks on China's economic growth, China's contribution to greenhouse gas emissions and emissions reduction schemes, the environmental consequences of foreign direct investment in China, the relationship between air pollution and mortality, the effect of climate change on agricultural output, the coal industry's compliance with tougher regulations and the constraints water shortages may impose on China's economy. It also emphasises the importance of managing the rising demand for energy to moderate oil price increases and placating domestic and international concerns about global warming. In the thirty years since China started on the path of reform, it has emerged as one of the largest and most dynamic economies in the world. This carries with it the responsibility to balance the requirements of key industries that are driving its development with the need to ensure that its growth is both equitable and sustainable. China's Dilemma highlights key lessons learned from the past thirty years of reform in order to pave the way for balanced and sustained growth in the future.

The Chinese Steel Industry's Transformation Ligang Song, Haimin Liu, 2012 Chinese economic reform and opening to the international economy since the late 1970s have changed the country and the world. The developments in the steel industry through the reform period are central to those changes, illuminative of them and of immense significance in themselves. This book throws new light on these historic changes for Chinese and foreign readers alike. From the foreword by Ross Garnaut, University of Melbourne, Australia.

Forecasting China's Future Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes. It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era. This book presents an illuminating and comprehensive

summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction this book will be of particular interest to students and scholars of political economic environmental and international relations issues in China and Asia as well as to readers in business and government

China's Challenges in Moving towards a High-income Economy Ligang Song, Yixiao Zhou, 2021-09-02 With its per capita income surpassing US 10 000 China has now drawn up ambitious plans to further lift its income to the level of developed countries Yet various constraints need to be overcome if China is to build on the achievements of the last 40 years and further boost its growth potential Besides these constraints the year 2020 saw human societies hit heavily by the COVID 19 pandemic and the global economy caught off guard and dipped into recessions caused by lockdown measures for controlling the spread of the pandemic Nations around the world have experienced grave loss of human life and lockdown measures have knocked economies from their normal growth trajectories Even as the pandemic continues to unfold all signs point to China as being the first major economy to have emerged out of the crisis But many questions remain Has the Chinese economy emerged from the pandemic crisis relatively unscathed What are the long term prospects for its economy This year's Update book *China's Challenges in Moving towards a High income Economy* explores the challenges faced by the Chinese economy in the transition towards a high income economy including agricultural development finance and fiscal system reform RMB internationalisation trends in urbanisation as well as topics related to innovation corporate sector development and market competition China's growth experience has been full of exciting changes and important lessons for reform and structural changes and this year's China Update is again the way to gain insights into these
