William Lanouette,2013-09-01 Well known names such as Albert Einstein Enrico Fermi J Robert Oppenheimer and Edward Teller are usually those that surround the creation of the atom bomb One name that is rarely mentioned is Leo Szilard known in scientific circles as father of the atom bomb The man who first developed the idea of harnessing energy from nuclear chain reactions he is curiously buried with barely a trace in the history of this well known and controversial topic Born in Hungary and educated in Berlin he escaped Hitler s Germany in 1933 and that first year developed his concept of nuclear chain reactions In order to prevent Nazi scientists from stealing his ideas he kept his theories secret until he and Albert Einstein pressed the US government to research atomic reactions and designed the first nuclear reactor Though he started his career out lobbying for civilian control of atomic energy he concluded it with founding in 1962 the first political action committee for arms control the Council for a Livable World Besides his career in atomic energy he also studied biology and sparked ideas that won others the Nobel Prize The Salk Institute for Biological Studies in La Jolla California where Szilard spent his final days was developed from his concepts to blend science and social issues *The Cross, the Plow and the Skyline* Ernest J. Yanarella,2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition s critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensconced in the cultural social and political zeitgeist of the New Millennium s first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth s social and environmental crises of our times and coming decades *Crime and Justice, Volume 50* Michael Tonry,2022-07-01 Since 1979 the Crime and Justice series has presented a review of the latest international research providing expertise to enhance the work of sociologists psychologists criminal lawyers justice scholars and political scientists The series explores a full range of issues concerning crime its causes

The Nature of Tomorrow Michael Rawson, 2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon's New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress Yearbook of German-American Studies, 1998

Truth and Lies in Literature, A Writer's Ten Commandments Stephen Vizinczey, Published directly by author <http://stephenvizinczey.com> This ebook edition is a revised and expanded version of the printed book including many essays which previously appeared only in recent foreign language editions I don't usually review older books in this space but I decided to make an exception for this classic book of reviews and essays he is a remarkable writer of enormous personality and skill as this book of essays and his own classic novel In Praise of Older Women The Amorous Recollections of András Vajda attests Writers will thrill to read his enabling and energizing Ten Commandments and reviewers would gain much from his own loosely styled criticism so distant and so distinct from what we often read by professional reviewers These are reviews for the ages thebowedbookshelf.blogspot.com Mr Vizinczey can make us care about his favorite writers like Kleist and Stendhal because the flavor of his own writing makes it apparent without tedious egotism that he himself has experienced the rapture of love and reflected on its immutable meaning In a word he unerringly knows how to find the weight of experience and states it in unflinching aphoristic English Mark Le Fanu The Times London Vizinczey comes on like a pistol packing stranger here to root out corruption and remind us of our ideals He carries the role off with inspired gusto His own essays convey the sheer fun of getting worked up about art Vizinczey's boldness and pugnacity are bracing and can be very funny Ray Sawhill Newsweek The real function of the critic should be to draw the reader to the work of art and that is precisely what Vizinczey one of the greatest critics I have ever encountered does Edwin Howard Memphis Business Journal
