Cognitive Rehabilitation An Integrative Neuropsychological Approach:

Cognitive Rehabilitation McKay Moore Sohlberg, Catherine A. Mateer, 2017-02-13 Sohlberg and Mateer's landmark introductory text helped put cognitive rehabilitation on the map for a generation of clinicians, researchers, educators, and students. The second edition reflects advances in neuroscience and computer technology coupled with changes in service delivery models. The authors describe a broad range of clinical interventions for assisting persons with acquired cognitive impairments, including deficits in attention, memory, executive functions, and communication, and for managing associated emotional and behavioral issues. For each approach, theoretical underpinnings are reviewed in depth, and clinical protocols are delineated. Difficult concepts are explained in a clear, straightforward fashion, with realistic case examples bringing the material to life. Also included are samples of relevant assessment instruments, rating scales, and patient handouts. Throughout the volume, emphasis is placed on the need to work from a community perspective, providing a framework for forming collaborative partnerships with families and caregivers. It is an essential resource for professionals across a wide variety of rehabilitation specialties.
