Differential Evolution In Search Of Solutions Springer Optimization And Its Applications:

Differential Evolution Vitaliy Feoktistov, 2007-02-15 Differential evolution is one of the most recent global optimizers. Discovered in 1995 it rapidly proved its practical efficiency. This book gives you a chance to learn all about differential evolution. On reading it you will be able to profitably apply this reliable method to problems in your field. Asforme my passion for intelligent systems and optimization began as far back as during my studies at Moscow State Technical University of Bauman the best engineering school in Russia. At that time I was gathering material for my future thesis. Being interested in my work the Mining School of Paris proposed that I write a dissertation in France. I hesitated some time over a choice but my natural curiosity and taste for novelty finally prevailed. At present Docteur es science en informatique de l'Ecole des Mines de Paris I am concentrating on the development of my own enterprise. If optimization is my vocation my hobbies are mathematics and music. Although mathematics disciplines the mind music is filled with emotions. While playing my favorite composition I decided to write this book. The purpose of the book is to give in a condensed but overview form a description of differential evolution. In addition this book makes accessible to a wide audience the fruits of my long research in optimization. Namely I laid the foundation of the universal concept of search strategies design suitable not only for differential evolution but for many other algorithms. Also I introduced a principle of energetic selection an efficient method of hybridization and advanced paralleling techniques.

Theory and Practice of Natural Computing Adrian-Horia Dediu, Manuel Lozano, Carlos Martín-Vide, 2014-12-05 This book constitutes the refereed proceedings of the Third International Conference TPNC 2014 held in Granada Spain in December 2014. The 22 revised full papers presented in this book were carefully reviewed and selected from 47 submissions. The papers are organized in topical sections on nature inspired models of computation synthesizing nature by means of computation nature inspired materials and information processing in nature.

Swarm and Evolutionary computation Leszek Rutkowski, Marcin Korytkowski, Rafał Scherer, Ryszard Tadeusiewicz, Lotfi Zadeh, Jacek Zurada, 2012-04-15 The volume LNCS 7269 constitutes the refereed proceedings of the International Symposium on Swarm Intelligence and Differential Evolution SIDE 2012 held in Zakopane Poland in April May 2012 in conjunction with the 11th International Conference on Artificial Intelligence and Soft Computing ICAISC 2012 proceedings published as two volume set LNAI 7267 and 7268. The 212 revised full papers presented were carefully reviewed and selected from 483 submissions. The volume is divided into two topical parts: proceedings of the 2012 symposium on swarm intelligence and differential evolution and on evolutionary algorithms and their applications.

Applications of Evolutionary Computation Cecilia Di Chio, Stefano Cagnoni, Carlos Cotta, Marc Ebner, Aniko Ekart, Anna I. Esparcia-Alcázar, Chi-Keong Goh, Juan J. Merelo, Ferrante Neri, Mike Preuss, Julian Togelius, Georgios N. Yannakakis, 2010-04-03 Evolutionary Computation EC techniques are efficient nature inspired methods based on the principles of natural evolution and genetics. Due to their efficiency and simple underlying principles these methods can be used for a

diverse range of activities including problemsolving optimization machine learning and pattern recognition A large and continuously increasing number of researchers and professionals make use of EC techniques in various application domains This volume presents a careful selection of relevant EC examples combined with a thorough examination of the techniques used in EC The papers in the volume illustrate the current state of the art in the application of EC and should help and inspire researchers and professionals to develop efficient EC methods for design and problem solving All papers in this book were presented during EvoApplications 2010 which included a range of events on application oriented aspects of EC Since 1998 EvoApplications formerly known as EvoWorkshops has provided a unique opportunity for EC researchers to meet and discuss application aspects of EC and has been an important link between EC research and its application in a variety of domains During these 12 years new events have arisen some have disappeared

while others have matured to become conferences of their own such as EuroGP in 2000 EvoCOP in 2004 and EvoBIO in 2007 And from this year EvoApplications has become a conference as well

Adaptation and Hybridization in Computational Intelligence Iztok Fister, Iztok Fister Jr., 2015-01-24 This carefully edited book takes a walk through recent advances in adaptation and hybridization in the Computational Intelligence CI domain It consists of ten chapters that are divided into three parts The first part illustrates background information and provides some theoretical foundation tackling the CI domain the second part deals with the adaptation in CI algorithms while the third part focuses on the hybridization in CI This book can serve as an ideal reference for researchers and students of computer science electrical and civil engineering economy and natural sciences that are confronted with solving the optimization modeling and simulation problems It covers the recent advances in CI that encompass Nature inspired algorithms like Artificial Neural networks Evolutionary Algorithms and Swarm Intelligence based algorithms

Advances in Knowledge-based and Intelligent Information and Engineering Systems Manuel Graña, 2012 In this 2012 edition of Advances in Knowledge Based and Intelligent Information and Engineering Systems the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world The 228 papers that are included cover a wide range of topics One emphasis is on Information Processing which has become a pervasive phenomenon in our civilization While the majority of Information Processing is becoming intelligent in a very broad sense major research in Semantics Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living Ontologies play a major role in the development of Knowledge Engineering in various domains from Semantic Web down to the design of specific Decision Support Systems Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here Other subjects in this volume are modern Machine Learning Lattice Computing and Mathematical Morphology The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and

Differential Evolution In Chemical Engineering:

Developments And Applications Gade Pandu Rangaiah, Shivom Sharma, 2017-05-29 Optimization plays a key role in the design planning and operation of chemical and related processes for several decades. Techniques for solving optimization problems are of deterministic or stochastic type. Of these stochastic techniques, some can solve any type of optimization problems and can be adapted for multiple objectives. Differential evolution (DE) proposed about two decades ago is one of the stochastic techniques. Its algorithm is simple to understand and use. DE has found many applications in chemical engineering. This unique compendium focuses on DE, its recent developments and applications in chemical engineering. It will cover both single and multi objective optimization. The book contains a number of chapters from experienced editors and also several chapters from active researchers in this area.

Evolutionary Algorithms in Intelligent Systems

Alfredo Milani, Arturo Carpi, Valentina Poggioni, 2020-12-07 Evolutionary algorithms and metaheuristics are widely used to provide efficient and effective approximate solutions to computationally hard optimization problems. With the widespread use of intelligent systems in recent years, evolutionary algorithms have been applied beyond classical optimization problems to AI system parameter optimization and the design of artificial neural networks and feature selection in machine learning systems. This volume will present recent results of applications of the most successful metaheuristics from differential evolution and particle swarm optimization to artificial neural networks, IoT allocation and multi objective optimization problems. It will also provide a broad view of the role and the potential of evolutionary algorithms as service components in AI systems.

Modeling Applications and Theoretical Innovations in Interdisciplinary Evolutionary Computation

Samuelson Hong, Wei-Chiang, 2013-03-31 Evolutionary computation has emerged as a major topic in the scientific community as many of its techniques have successfully been applied to solve problems in a wide variety of fields. Modeling Applications and Theoretical Innovations in Interdisciplinary Evolutionary Computation provides comprehensive research on emerging theories and its aspects on intelligent computation. Particularly focusing on breaking trends in evolutionary computing algorithms and programming, this publication serves to support professionals, government employees, policy and decision makers as well as students in this scientific field.

NEURAL NETWORKS, FUZZY SYSTEMS AND EVOLUTIONARY

ALGORITHMS : SYNTHESIS AND APPLICATIONS S. RAJASEKARAN, G.A. VIJAYALAKSHMI PAI, 2017-05-01 The second edition of this book provides a comprehensive introduction to a consortium of technologies underlying soft computing, an evolving branch of computational intelligence which in recent years has turned synonymous to it. The constituent technologies discussed comprise neural network (NN), fuzzy system (FS), evolutionary algorithm (EA) and a number of hybrid systems which include classes such as neuro fuzzy, evolutionary fuzzy and neuro evolutionary systems. The hybridization of the technologies is demonstrated on architectures such as fuzzy backpropagation network (NN-FS), hybrid genetic algorithm based backpropagation network (NN-EA), hybrid simplified fuzzy ARTMAP (NN-FS), hybrid fuzzy associative memory (NN-FS).

hybrid fuzzy logic controlled genetic algorithm EA FS hybrid and evolutionary extreme learning machine NN EA hybrid Every architecture has been discussed in detail through illustrative examples and applications The algorithms have been presented in pseudo code with a step by step illustration of the same in problems The applications demonstrative of the potential of the architectures have been chosen from diverse disciplines of science and engineering This book with a wealth of information that is clearly presented and illustrated by many examples and applications is designed for use as a text for the courses in soft computing at both the senior undergraduate and first year postgraduate levels of computer science and engineering It should also be of interest to researchers and technologists desirous of applying soft computing technologies to their respective fields of work
