Digital Storytelling Mediatized Stories Digital Formations Paperback 2008 Knut Lundby:

Digital Storytelling, Mediatized Stories Knut Lundby, 2008 Recent years have seen amateur personal stories focusing on me flourish on social networking sites and in digital storytelling workshops The resulting digital stories could be called mediatized stories This book deals with these self representational stories aiming to understand the transformations in the age old practice of storytelling that have become possible with the new digital media Its approach is interdisciplinary exploring how the mediation or mediatization processes of digital storytelling can be grasped and offering a sociological perspective of media studies and a socio cultural take of the educational sciences Aesthetic and literary perspectives on narration as well as questioning from an informatics perspective are also included *Mediatization of Physical Activity*

Katarzyna Kopecka-Piech, 2019-02-25 This book demonstrates how media technologies shape amateur sports and how some of these sports are modified The author uses an innovative measuring approach to analyze how people use media technologies in conjunction with sports and how their relationship with physical activity is affected by the ever present influence of the media The research used includes a meta theoretical analysis of the current mediatization theory as well as quantitative and qualitative empirical research The author integrates these aspects into the new concept of media saturation supplementing the current theory and contributing to the wider body of knowledge in the field of media and physical activity The book analyzes different perspectives in an interdisciplinary examination ranging from media and sport researchers to scholars in culture studies sociology and psychology *From Twitter to Tahrir Square* Bala A. Musa, Jim Willis, 2014-06-24 This timely guide examines the influence of social media in private public and professional settings particularly the ethical implications of the cultural changes and trends created by their use In the quest for quick dissemination of information web users and content providers find both opportunity and liability in digital broadcasts Examples abound Twitter members tap into news reports well in advance of traditional print media but stories are prone to inaccuracies and misinformation Facebook shares useful data mined from member profiles but this sharing often compromises privacy It is no surprise that use of social media gives rise to a host of moral dilemmas never before encountered This book sheds light on the effects of this new medium on the individual and society Through two volumes chock full of topics found in news headlines everyday the authors look at evolving trends in social media and their impact on privacy politics and journalism The first volume explores the role of this technology on national and international security Volume 2 focuses on the individual as both a producer and consumer of internet content showing how the media itself is changing notions of self identity relationships and popular culture The book s content covers such topics as individual and community psychology citizen journalism and corporate technology *Migrant Feelings, Migrant Knowledge* Robert Irwin, 2022-11-08 A collection of digital stories from the Humanizing Deportation project that reveals a uniquely expert point of view of Mexican and Central American migrant experiences those of the migrants themselves *Mediating Social Challenges* Eva Bauer, Nicole Haring, Roberta

Maierhofer,2025-03-27 In the face of social inequalities digital divides hegemonic power relations capitalist conflicts of interests asymmetric gender relations and international border and migration regimes educational and social actions are becoming more challenging Mediating these social challenges demands new methods and approaches Thus the contributors to this volume use critical pedagogies to reflect on art literature storytelling and digital methods as a means to mediating social challenges in teaching practices The contributions challenge normative perceptions of identity while also promoting students multiliteracy skills

After the Break Marijke Valck,Jan Teurlings,2025-10-01 Television as we knew it is irrevocably changing Some are gleefully announcing the death of television others have been less sanguine but insist that television is radically changing underneath our eyes Several excellent publications have dealt with television s uncertain condition but few have taken the specific question of what television s transformations mean for the discipline of Television Studies as a starting point The essays collected in this volume aim to fill this void Two fundamental questions string the various contributions together First is television really in crisis or is the present not so extraordinary when revisiting television s development Second should we invent new theoretical concepts or are our old ones still perfectly relevant To answer such questions the authors in this volume take up diverse case studies ranging from the academic series Reading Contemporary Television to Flemish Fiction from nostalgic programming on broadcast television to YouTube from tell sell television shows to public television art in the 1980s
