Atwood, 2022-10-31 is vital to the Hebrew Bible's understanding of God the world and humanity However the word defies easy categorisation or casual analysis especially when referring to humans and their experiences Integrating insights from several sub fields of Cognitive Linguistics with detailed exegesis this book examines each anthropological use of in Proverbs Job and Ecclesiastes demonstrating how even complicated words in difficult passages can be fruitfully understood As well as furthering the application of contemporary linguistics to ancient texts this study sheds new light on the Hebrew Bible's understanding of humanity and their relationship to the world and to the divine

The Concept of Body in Judaism, Christianity and Islam Christoph Böttigheimer, Konstantin Kamp, 2023-12-18 This volume of the series Key Concepts in Interreligious Discourses investigates the roots of the concept of body in Judaism Christianity and Islam The Body and being a created being stands in the focus of all the three major monotheistic faiths It is not just by the christian idea of man's likeness to God that indicates that the human body is a central object of religious thinking both culturally and theologically charged Here the body stands in the crossfire of terms like pure and unpure sacred and profane male and female And besides the theological controversies everyday experiences like sexuality gender equality and how to dispose of the own body and that of others are undoubtedly recent and highly contentious discussion points in the debate of a peaceful living together of different religions and cultures The volume presents the concept of body in its different aspects as anchored in the traditions of Judaism Christianity and Islam It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about peace within these three traditions The book offers fundamental knowledge about the specific understanding of the body in each one of these traditions their interdependencies and their relationship to secular world views

Proverbs 1-15 Bernd U. Schipper, 2019-11-05 The book of Proverbs is more than the sum of its parts Even if some individual proverbs and collections could be older the overall composition

stems from the late Persian or early Hellenistic period In its present form the book of Proverbs introduces the scribal student to the foundations of sapiential knowledge and its critical reflection By discussing different worldviews and contrasting concepts on the relationship between God the world and humanity the book of Proverbs paves the way to both the critical wisdom of Job and Ecclesiastes and the masterful combination of Wisdom and Torah in Sirach Scholarly research has long situated the book of Proverbs within ancient Near Eastern literature but declared it to be something alien within the Hebrew Bible In contrast to such a position the present commentary interprets the book of Proverbs against the background of both ancient Near Eastern literature and the literature of the Hebrew Bible One aim of the commentary is to discuss new ancient Near Eastern parallels to the book of Proverbs with a special focus on Egyptian wisdom literature including Demotic texts from the sixth to fourth centuries BCE An equally important aim of this commentary is a detailed exegesis of Proverbs 1 15 as well as an analysis of the overarching strategy of the book of Proverbs as a whole Taking the prologue of the book in Prov 1 1 7 as a hermeneutical key the book of Proverbs turns out to be a masterful composition addressing both the beginner and the advanced sage With its allusions to other biblical texts including the book of Deuteronomy the Psalms and the Prophets the book of Proverbs can be connected to forms of scribal exegesis in Second Temple literature By using the same scribal techniques as other literati of his time the scribal sage responsible for some parts of the book as well as its final compilation seeks to provide deeper insight into the complex world of scribal knowledge and sapiential thought **Academic**

Households in Early Modern Northern Europe Mari Välimäki, 2025-08-08 This volume explores academic households in early modern c sixteenth to eighteenth century Northern Europe examining changing dynamics of family and gender During the Middle Ages Christian scholars were expected to spend their lives unwed and instead focus on educating the young However a gradual easing of prohibitions against the marriage of scholars began in different areas of Europe in the late fourteenth century By the end of the sixteenth century a great number of professors were men with families and establishing their own households This was especially the case in the German speaking Protestant areas of Europe and the Swedish realm from the first half of the seventeenth century The contributors of this volume concentrate on universities that took on the new idealised understanding of professors and other members of academic communities as married men They analyse how professors and other members of the academic communities viewed family and household what academic family life was like and how the members of the academic community utilised family and the household for academic self fashioning and building networks Furthermore they pay special attention to the wives and widows of professors and other academics and discuss the agency of these women This book is an excellent resource for students and professional readers alike who are interested in the histories of early modern universities families and gender **Dimensionen der Leiblichkeit** Bernd Janowski, Christoph Schwöbel, 2015-07-13
