Criminal Brain Nicole Hahn Rafter,2008-01-01 The epidemic of mass rape in the former Yugoslavia has illustrated once again and in particularly brutal fashion the inextricable relationship between national politics sexual politics and body politics The nexus of these three forces is highly charged in any culture at any time in history but especially so among cultures in which rapid even cataclysmic changes in material realities and national self conceptions are eroding or overwhelming previously secure boundaries The postcommunist moment in the so called Second World Central and Eastern Europe and the former Soviet Union has dramatically exposed the opportunities and dangers that arise when the political cultural and economic foundations of a society are de and then re structured Gender roles and relations expressions of sexuality or attempts to recontain them representations of the body especially the female body and the larger cultural meanings it assumes are particularly marked sites to witness the performance of complex national dramas of crisis and change This groundbreaking volume turns its attention to the Second World specifically to such subjects as the birth of the sex media and porn industry in Russia Russian women and alcoholism cinema in post communist Hungary patriotism and

The Criminal Brain Nicole Rafter, 2008-10-01 What is the relationship between criminality and biology Nineteenth century phrenologists insisted that criminality was innate a trait inherent in the offender's brain matter While they were eventually repudiated as pseudo scientists and self deluded charlatans today the pendulum has swung back Both criminologists and biologists have begun to speak of a tantalizing but disturbing possibility that criminality may be inherited as a set of genetic deficits that place one at risk for theft violence and sexual deviance If that is so we may soon confront proposals for genetically modifying at risk fetuses or doctoring up criminals so their brains operate like those of law abiding citizens In *The Criminal Brain* well known criminologist Nicole Rafter traces the sometimes violent history of these criminological theories and provides an introduction to current biological theories of crime or biocriminology with predictions of how these theories are likely to develop in the future What do these new theories assert Are they as dangerous as their forerunners which the Nazis and other eugenicists used to sterilize incarcerate and even execute thousands of supposed born criminals How can we prepare for a future in which leaders may propose crime control programs based on biology Enhanced with fascinating illustrations and written in lively prose *The Criminal Brain* examines these issues in light of the history of ideas about the criminal brain By tracing the birth and growth of enduring ideas in criminology as well as by recognizing historical patterns in the interplay of politics and science she offers ways to evaluate new theories of the criminal brain that may radically reshape ideas about the causes of criminal behavior
