The Shifting Sands of Educational Philosophy in India KHRITISH SWARGIARY,2025-05-01 The journey of a nation is often charted through the evolving philosophies that guide its progress and nowhere is this more evident than in the realm of education As India transitioned from the throes of colonialism to the promise of self determination the imperative to forge a cohesive equitable and progressive educational system became paramount This book *The Shifting Sands of Educational Philosophy in India A Critical Analysis of the National Policies on Education 1968 1986 2020* embarks on a critical exploration of this very trajectory not merely as a chronological recounting of policy documents but as a deep dive into the underlying intellectual currents and societal forces that have shaped and been shaped by these landmark pronouncements Our endeavor distinguishes itself by moving beyond a descriptive account of the three National Policies on Education NPEs Instead we adopt a unique lens one that scrutinizes these policies through the prism of evolving educational philosophies We contend that each NPE those of 1968 1986 and its subsequent modification in 1992 and 2020 is not a discrete entity but rather a reflection of the dominant socio political zeitgeist and the prevailing ideas about the purpose and practice of education By situating these policies within their specific historical contexts we aim to unravel the intricate dance between societal aspirations political ideologies and the formulation of educational blueprints This book seeks to answer fundamental questions that lie at the heart of India s educational journey What were the core philosophical underpinnings that informed each policy How did the socio political landscape of the time marked by its own unique challenges and opportunities mold these philosophies And crucially how did these policies in turn aspire to shape the very fabric of Indian society By meticulously examining the underlying ideologies the intended societal outcomes and the practical implications of each policy we illuminate the threads of continuity the points of divergence and the moments of radical reorientation that mark India s educational evolution To achieve this nuanced understanding the book is structured in three distinct yet interconnected parts Part I Laying the Foundation Context and Theoretical Framework sets the stage by tracing the early

debates and influences that led to the first NPE introducing the key philosophical concepts that will serve as analytical tools throughout our exploration. It also establishes the theoretical lenses drawing from sociological, political and philosophical perspectives that will enable a rigorous and multifaceted analysis. Finally, this section provides a crucial historical overview of the socio-political landscape of India from independence to 2020, underscoring the dynamic context within which these policies were conceived and implemented.

Part II: Deconstructing the National Policies on Education delves into the heart of our inquiry, dedicating individual chapters to each of the three NPEs. For each policy, we undertake a detailed examination of its philosophical underpinnings, key provisions, the socio-political context of its formulation, the challenges and successes of its practical implementation, and a critical assessment of its internal logical reasoning. This structured approach allows for a thorough and comparative understanding of each policy in its own right.

Finally, Part III: Comparative Analysis and Future Directions draws together the threads of our analysis. Through a comparative lens, we identify the continuities and discontinuities across the three NPEs in terms of their philosophical orientations, focus areas, proposed structural changes, emphasis on equity and social justice, and the envisioned role of the state and private sector. The concluding chapter synthesizes our key findings, reflects on the enduring legacy of these policies, and offers insights into the potential future trajectories of educational policy in India, addressing critical questions about the extent of goal attainment, persistent challenges, the potential impact of NEP 2020, and alternative philosophical approaches that could inform future directions.

The strength and originality of this book lie in its consistent application of philosophical frameworks to dissect the policies, moving beyond mere descriptive analysis to offer a deeper and more nuanced understanding. By explicitly linking the policies to the prevailing socio-political contexts, we provide a richer and more historically grounded analysis. Furthermore, our approach is inherently critical, evaluating the underlying assumptions, internal logic, and practical implications of each policy. The comparative perspective adopted throughout the latter part of the book illuminates the evolution of educational thinking in India and identifies crucial turning points in its trajectory.

This work is grounded in theoretical rigor, drawing upon established theories of education, sociology, and political science. It seeks to be practical by examining the implementation challenges and real-world impact of the policies. Above all, it strives for logical reasoning, analyzing the internal consistency and the anticipated consequences of the proposed strategies within each policy in relation to their stated aims.

Maintaining a scholarly tone and grounding our analysis in historical documents, policy texts, and existing scholarly literature, we aim to contribute a well-researched and insightful perspective to the ongoing discourse on Indian education. We trust that this critical engagement with the National Policies on Education will offer valuable insights for academics, policymakers, educators, and anyone invested in understanding the forces that have shaped and will continue to shape the educational landscape of India.
