Diller Scofidio Renfro Architecture After Images:

Diller Scofidio + Renfro Edward Dimendberg, 2013-03-20 In *Diller Scofidio Renfro Architecture after Images* Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios Since founding their practice in 1979 Elizabeth Diller and Ricardo Scofidio have integrated architecture urban design media art and the performing arts in a dazzling array of projects which include performances art installations and books in addition to buildings and public spaces At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture Dimendberg provides an extensive overview of these concerns and the history of the studio revealing how principals Elizabeth Diller Ricardo Scofidio and Charles Renfro continue to expand the definition of architecture question the nature of space and vision in contemporary culture and produce work that is endlessly surprising and rewarding from New York's High Line to *Blur* an artificial cloud and *Facsimile* a video screen that moves around a building facade Dimendberg also explores the relation of work by DS+R to that by earlier modernists such as Marcel Duchamp and John Hejduk He reveals how the fascination of the architects with evolving forms of media technology and building materials has produced works that unsettle distinctions among architecture and other media Based on interviews with the architects their clients and collaborators as well as unprecedented access to unpublished documents sketchbook entries and archival records *Diller Scofidio Renfro* is the most thorough consideration of DS+R in any language Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers this book is an essential study of one of the most significant and creative architecture and design studios working today *Architecture After Deleuze and Guattari* Chris L. Smith, 2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas *The Moving Image as Public Art* Annie Dell'Aria, 2021-05-08 This book maps the presence of moving images within the field of public art through encounters with passersby It argues that far from mere distraction or spectacle moving images can produce moments of enchantment that can renew intensify or challenge our everyday engagement with public space and each other These artworks also offer frameworks for understanding how moving images operate in public space how they move viewers and reconfigure the site of the screen Each chapter explores a mode of address that examines how artists and curators leverage the moving image's

attentional power to engage audiences create spaces make place and challenge assumptions This book also examines the difficulties and compromises that arise when using urban screens for public art Global Cinematic Cities Johan Andersson, Lawrence Webb, 2016-09-13 Cinema and audiovisual media are integral to the culture economy and social experience of the contemporary global city But how has the relationship between cinema and the urban environment evolved in the era of digital technology new media and globalization And what are the critical tools and concepts with which we can grasp this vital interconnection between space and screen viewer and built environment Engaging with a rapidly transforming urban world the contributions to this collection rethink the cinematic city at a global scale By presenting a global constellation of screen cities within one volume the book encourages juxtapositions and comparisons across the North and South to capture the global city and its dynamics of exchange hybridity and circulation The contributions examine film and screen cultures in a range of locations spanning five continents Antibes Beijing Buenos Aires Busan Cairo Caracas Copenhagen Jakarta Kolkata Lagos Los Angeles Malm Manila Mumbai Nairobi Paris Seoul S te and Shanghai The chapters address topics that range across the contemporary film and media landscape from popular cinema art cinema and film festivals to serial television public screens multimedia installations and video art Contributors Chris Berry Yomi Braester Jinhee Choi Pei Sze Chow Thomas Elsaesser Malini Guha Jonathan Haynes Will Higbee Igor Krstic Christian B Long Joanna Page Lawrence Webb *Participation in Art and Architecture* Martino Stierli, Mechtild Widrich, 2015-10-16 Does participatory art and architecture shape social reality or is it shaped by it Shifting the ground of this debate which tends to assume one or other direction of influence this innovative book explores the inherently dialectic relationship between society and the built environment At the same time it strives for a historically conscious discussion of a very contemporary issue Chapters rethink the top down model of participation and audience activation of high modernism from Alexander Dorner s immersive museum to Mies van der Rohe s room s for play investigate participation in spaces under political pressure from exhibitions in bombed out buildings in besieged Sarajevo 1992 5 to the art and organizing of revolution in Egypt 2012 13 draw historical parallels between modes of participation and the exercise of power that are seldom compared with one another from sites of occupation in 1968 Mexico and 2011 Spain finally creating links between cartography and feminism and between tourism and internet surveillance With these juxtapositions of the aesthetic and the everyday and the built and the mediated new questions arise is space formed once and for all or is it the changeable product of changeable patterns of use Does the aesthetic always correspond to the political or might an aesthetically authoritarian space be conducive to social justice In exploring these questions this book looks at how participants themselves exert power rather than being victimised or liberated from it *Manhattan's Public Spaces* Ana Morcillo Pallarés, 2021-11-29 Manhattan s Public Spaces Production Revitalization Commodification analyzes a series of architectural works and their contribution to New York s public space over the past few decades By exploring a mix of urban mechanisms supportive frameworks legal systems and planning

guidelines for the transformation of the city's collective realm the text frames Manhattan as a controversial landscape of interests and concerns to authorities communities and very importantly developers The production revitalization and commodification of Manhattan's public spaces as a phenomenon and as a subject of study also highlights the vicissitudes of the reconciliation of the many different agents which are part of the process The challenge of the book does not only lie in the analysis of good design but more importantly in how to understand the functional mechanisms for the current trends in the production of space for public use A complex framework of actors governance and market monopolies which invites the reader to participate in the debate of how these interventions contribute or not to an inclusive environment anchored in the existing built fabric Manhattan's Public Spaces invites reflection on the revitalization of the city's shared space from all dimensions Beautifully illustrated in black and white with over 50 images this book will be of interest to scholars and students in architecture planning and urban design *A Companion to Los Angeles* William Deverell, Greg Hise, 2014-01-28

This Companion contains 25 original essays by writers and scholars who present an expert assessment of the best and most important work to date on the complex history of Los Angeles The first Companion providing a historical survey of Los Angeles incorporating critical multi disciplinary themes and innovative scholarship Features essays from a range of disciplines including history political science cultural studies and geography Photo essays and contemporary voice sections combine with traditional historiographic essays to provide a multi dimensional view of this vibrant and diverse city Essays cover the key topics in the field within a thematic structure including demography social unrest politics popular culture architecture and urban studies **Architecture and the Image at the Turn of the 21st Century** Sanja Rodeš, 2024-06-28

This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture's far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This

book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies *Perspective as Logic: Positioning Film in Architecture* Stefanos Roimpas, 2023-04-28 Perspective as Logic offers an architectural examination of the filmic screen as an ontologically unique element in the discipline's repertoire. The book determines the screen's conditions of possibility by critically asking not what a screen means but how it can mean anything of architectural significance. Based on this shift of enquiry towards the question of meaning it introduces Jacques Lacan and Alain Badiou in an unprecedented way to architecture since they exemplify an analogous shift of perspective towards the question of the subject and the question of being accordingly. The book begins by positing perspective projection as being a logical mapping of space instead of a matter of sight. Alberti, Lacan. Secondly it discusses the very nature of architecture's view and relation to the topological notion of outside between immediacy and mediation. Diller and Scofidio. The Slow House. It examines the limitation of pictorial illusion and the productive negativity in the suspension of architecture's signified equivalent to language's production of undecidable propositions. Eisenman, Badiou. In addition the book outlines the difference between the point of view and the vanishing point by introducing two different conceptions of infinity. Michael Webb, Temple Island. Finally a series of design experiments playfully shows how the screen exemplifies architecture's self-reflexive capacity where material and immaterial components are part of the spatial conception to which they refer and produce. This book will be particularly appealing to scholars of architectural theory especially those interested in the domains of philosophy, psychoanalysis and the linguistic turn of architecture.

Scenographic Design Drawing Sue Field, 2020-12-14 This enlightening study explores the set design drawings for theatre and live performance highlighting their unique qualities within the greater arena of drawing practice and theory. The latest volume in the Drawing In series. Scenographic Design Drawing encourages an interdisciplinary dialogue in the field of drawing with the inclusion of illustrations throughout. Scenographic design drawings visualize the images in the designer's mind's eye early in the design process. They are the initial design tool in the creative engagement with theatre, opera, dance and non-text based performance. It is in particular this body of drawings that is unique as both a performative and a theatrical representation of multiple worlds within the stage space. Sue Field illuminates this illustration process and identifies how these drawings have functioned and developed over time. Scenographic Design Drawing serves to satisfy an emerging global curiosity and a thirst for new knowledge and understanding in relation to the drawings executed by the historical and contemporary scenographer. This work addresses a critical research gap and shows how the scenographic design drawing continues to be a principal site of innovation, subjectivity, originality and authorship in theatre and live performance.
