Hess, Ingo B. Jahrsetz, Judith Miller, 2018-04-18 This volume brings together a group of transpersonal psychotherapists and spiritual teachers to tell of their own very personal and intimate explorations of consciousness What has the experience of coming home meant to them Has it meant connecting with God the Divine Feminine the Cosmos the Sacred Has it meant arriving at home in themselves in their very center in their essence Where is home Is it inside is it outside or is it both All world cultures have stories about this particular place In addition to describing their own unique quests the contributors also share how radically such a journey challenged them to face their own vulnerabilities and shadow parts Various very different and often startling personal stories are told Through reading of the very human trials and psycho

spiritual challenges that these nine international teachers have endured on their journeys home readers will gain insights and greater understanding regarding their own explorations of consciousness They will realize that the spiritual journey can have many faces and take many paths The one thing however that all authors have in common is the longing to be fully and wholly oneself

A Wave-Particle Theory of Conscious Awareness (A Philosophical Viewpoint) Carter Blakelaw, Jack Calverley, 2024-12-12 2025 updated edition new chapters on why AIs cannot be conscious the nature of evil the place of evolution and the intellectual and natural unnatural equivalence fallacies To explain consciousness we must explain not just sensations but how a three dimensional world is perceived without relying on an inner eye or homunculus that can make sense of depth cues etc Both

problems are tackled here as well as language aesthetics and morality The text systematically and ruthlessly dismantles the apparent mechanism of the inner eye or the homunculus and shows how all thought and experience and the apparent individual point of view can be accounted for in terms of fundamental quanta of sensation before going on to show how these remaining basic units of sensation are not and cannot be emergent phenomena but must be part of a field effect The strategy for the text is to systematically remove any and all conceptual need for a homunculus in the explanation of consciousness and to scrutinize what must be the case for what remains

Step One Perceptions and the Brain Preamble A In everyday discourse about our experience the content of perception the pale blue of a region of sky the tone of the bass guitar in the beat of a dance track or the sweet almond flavour of marzipan might be thought of as distinct from the perceiving since I can choose where I focus my attention on the view through a restaurant window on the music coming from the caf opposite or on the marzipan coating of the slice of Battenberg cake I am eating However let us for the purpose of this enquiry start by treating the content of perception and our experiencing that perception the perceiving as it were as inseparable There is no content without the experience there is no experience without the content For our purposes the perceiving is distinct from the deliberate or otherwise action of setting the focus of one s attention here or there on the cake or on the music Preamble B It is ultimately an aggregation of these content perceiving pairings that constitutes the totality of our conscious awareness Which is to say that any other aspect of our brain s conscious processes the focussing of attention acts of will or anger greed and so on must either be incorporated into the scheme as content perceiving pairings themselves or be explicable in terms of some arrangement of content perceiving pairings Which is to say there is nothing in our consciousness beyond these content perceiving pairings so every conscious experience must be capable of expression in terms of some or other or set of content perceiving pairings

Idea Perceptions belong to the brain are generated by the brain are private to the brain exist only within the brain and do not extend into the external world beyond our bodies Elaboration The sky is not blue Rather photons of light of certain frequencies arrive on the backs of our eyes from the atmosphere Light receptor cells in our eyes then send electro chemical signals into the brain and the brain generates the sensation of some or other colour in response to the electro chemical signals Our perceptions are generated by our brains we do not swim in a sea of perceptions picking up those useful to us as we pass through them or them through us

Corollary At first blush the perceptions described here accord with the philosophical concept of Secondary Qualities

Play Therapy Dimensions Model Lorri Yasenik, Ken Gardner, 2023-11-21 An updated take on a fundamental decision making framework this practical guide explores the dimensions of play therapy and how they apply to today s practitioner In depth case studies illustrate the interplay between theory and practice demonstrating an integrative case conceptualization approach Scales have been updated to reflect current best practice and developments in the field and combine with the core decision making framework for a deeper expanded use of the model New chapters delve into parent work and case conceptualization utilizing observational and self reflective forms

Downloadable video content brings the text to life including a new video illustrating the essentials of consultation with parents The interface between practitioner and client also takes centre stage New sections on self reflection and cultural sensitivity guide you through ways to foster a welcoming compassionate environment throughout your practice Whether you re a seasoned play therapist or just starting out this fresh take on the dimensions of play therapy will foster self reflection of the who what when why and how of play therapy

God, Souls, and Consciousness Joshua R. Farris, 2025-10-15 This book provides a critique of naturalistic views of subjects and agency arguing that these are conditioned ways of conceiving of the mind and the cosmos It draws on the relevant literature on substance dualism idealism and theism to draw out the implications for a theistic view of the world In contemporary analytic philosophy of mind naturalism is the default position for thinking about the mind in relation to the world This book argues that we should reconsider naturalistic paradigms in favor of a more holistic and bigger picture of the mind It defends a form of theistic dualism in light of varying naturalistic trends that arguably place limiting pressures on our constructive views of humans as ensouled beings The book takes seriously the notion of first person phenomenological perspectives as the starting point for constructing a metaphysical view of the world The author s arguments touch on the topics of consciousness dualism cosmic purpose science and religion and the meaning of life He proceeds to explore the implications of deconditioning on the philosophy of mind theism science and the social sciences God Souls and Consciousness will appeal to scholars and graduate students working in the philosophy of mind philosophy of religion religion and science and analytic theology
