

Phonological decoding skills are closely related to spelling skills. Creating rhymes, learning to syllabicate and phonemics are useful for students.

Improving vocabulary: emphasis on content clues, analysis of the word structure and opposition (relationship between two or more words or phrases in which two units are grammatically parallel and the same different)

Evaluating progress:

- What is the purpose of the activity?
- What is the activity for?
- What is going to evaluate the activity? The teacher, student, or class
- What kind of content is being taught?
- What methodology will be used? Whole, listening or both
- What will the learner do? taught? Before instructions, during, or after

Evaluation checklist:

- Material availability (Where can I purchase it? Is it available locally?)
- Layout/physical characteristics (Interesting? Attractive? Clear and organized?)
- Cultural components (Target culture content? Free of stereotypes? Inclusive of all cultures?)
- Skills (Does it integrate skills well? Offer good balance?)
- Language (Authentic? Idiomatic?)
- Exercises (Meaningful? Balance between free and controlled exercises? Promote communication?)
- User definition (Well defined? Are there exact descriptions of what the student should be able to do once they have completed the text?)

Syntax: involves the order in which words are arranged to create meaning. Syntax also refers to the rules for creating correct sentence patterns.

Language acquisition: The process of second language acquisition includes forming generalizations about the new language and internalizing the rules. During the silent period, before learners are willing to attempt verbal communication, they are engaged in the process of building a set of semantic rules for creating correct sentences in the second language. Learners go through the process of observing, drawing conclusions about language constructs and testing the validity of their conclusions. Some use cognitive processing procedures, that their learning takes place more through thought processes. Other learners use psycholinguistic procedures, which strongly stress practice as a means of learning.

Stages of development

1. Single words
2. I-V-O structures (Subject, verb, object)
3. Wh-fronting (Where are you?), do-fronting (Do you like me?), adverb fronting (Today I go to school), negative n-verb (She is not nice)
4. Yes/no inversion (Is he at school?), copula-linking verb inversion (Is he at school?), particle shift (Take your hat off)
