

OPERATING THE TRACTOR

TRACTOR BREAK-IN PROCEDURE

Never operate a new engine immediately under full load. Break it in carefully as shown in the table below.

Period	Engine Throttle Control Lever Position			Load
	1/2	3/4	Full	
1st hour		X		None
2nd hour	X			Light drawbar load or Mowing with tractor at slow speed
3rd through 10th hour		X		Medium drawbar load or Normal mowing

SPEED CONTROL LEVER STOP

An adjustable speed control lever stop is provided to allow the operator to return to a pre-determined speed.

Do not bypass the speed control lever stop to obtain a higher tractor speed. If a higher speed is desired, reset the stop. Refer to "Instrument and Controls".

STARTING THE ENGINE

1. Be sure there is an adequate supply of gasoline in the fuel tank.

CAUTION! To avoid fire or injury, tighten fuel cap securely. Never remove the fuel tank cap or fill the fuel tank when the engine is running, or hot, or indoors. Also, do not smoke when working around flammable fuel.

2. Be sure the fuel shut-off valve is open.

3. Pull choke control button to full choke position. Less choking may be necessary due to variations in temperature, grade of fuel, etc. Little or no choking will be needed when the engine is warm.

4. Place the throttle just off "SLOW" position.

5. To start the engine, safety starting switches must be activated by pressing the brake pedal all the way down and moving the power take-off clutch switch to the disengaged position.

NOTE: The speed control lever will return to neutral when the brake pedal is pressed all the way down.

6. Turn the ignition key clockwise to the "START" position and release it as soon as the engine starts; however do not operate the starter for more than 30 seconds at any one time. If the engine does not start within this time, turn the key "OFF" and wait a few minutes, then try again.

7. After the engine starts, slowly release the brake pedal and gradually push the choke control button all the way in. Do not use the choke to enrich the fuel mixture, except as necessary to start the engine.

STOPPING THE ENGINE

Move the throttle lever to the "SLOW" position and allow the engine to idle for a short time before stopping. Then turn the key to the "OFF" position.

COLD WEATHER STARTING

Engine starting is possible in cold weather providing the correct weight of engine oil is used, the battery is fully charged, and the proper starting procedure is followed. The best procedure for starting at temperatures near or below freezing is as follows:

Cub Cadet 782 Owners Manual

Kenneth Updike

Cub Cadet 782 Owners Manual:

Original Farmall Cub and Cub Cadet Kenneth Updike, Author Kenneth Updike presents the most complete and authoritative text available for those wishing to restore their Farmall Cub Cub Lo Boy and Cub Cadet from their inception in the 1940s through the end of production The detailed text includes hard to find information on the development and design of each model with all the relevant information on implements improvements serial numbers dates codes engines and carburetors *Farmers and Consumers Market Bulletin* ,2011 Ohio Curriculum Materials, 1987 Catalog ,1987
